Carters

1908

IRISH INTERNATIONAL EXHIBITION, DUBLIN, 1907.

Presented to the L. H. Bailey Hortorium
by the Missouri Botanical Garden, 1972.

A Photograph of part of Carters' Lawns and Flower Beds. These formed an attractive feature in the Exhibition Grounds, and were much admired and appreciated by all the Visitors. Our Lawns and Flowers covered five large sections similar to above, making in all about five acres.

Six Highest Awards were conferred (in competition) upon our House, as follows :—

Highest Diploma, Grass Lawns (as shown above).

- | | | |
|---|---|---|
| " | " | Annuals (embracing 300 varieties of Flowers). |
| " | " | Sweet Peas (55 distinct varieties). |
| " | " | Mignonette (Carters' <i>Perfection</i>). |
| " | " | Begonias (<i>Crown Jewels</i> , for bedding, Double and Single). |
| " | " | Gladiolus (Carters' <i>Butterfly</i>). |

The above honours were awarded for excellence as displayed by the produce of our Seeds, and we are sure that our Customers will, with us, feel gratified to know that Carters' "Tested" Seeds have again received the highest recognition in international and keen competition.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

PART OF POD OF CARTERS' LEVIATHAN BEAN.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' LEVIATHAN BROAD BEAN.

(WHITE SEEDED.)

A champion Exhibition variety.

10 First Prizes reported by customers in 1906.

15 " " " 1907.

We continue to re-select this well-known Broad Bean, the seeds being carefully saved from the finest pods taken from the most prolific plants, so that our customers may feel that they are growing really the very finest Broad Bean in cultivation. It cannot be excelled for Table or Exhibition.

Price **2s. 6d.** per quart, **1s. 6d.** per pint.

CARTERS' EXTRA EARLY BROAD BEAN.

The earliest maturing variety yet introduced. Resists the aphid-fly better than any other. It has a much smaller pod than the above variety, but it is the earliest Broad Bean that we know of, and is most prolific.

Price **2s. 6d.** per quart, **1s. 6d.** per pint.

The Cultivation of Broad Beans.—*Early Mazagan* and *Dwarf Fan* Beans may be planted in November, and a second sowing made in February, the rows being about 15 inches apart; to be followed by the Long-Podded and *Windsor* varieties to secure a succession. The later sorts should be about 6 inches from plant to plant, and 3 feet from row to row. This crop succeeds best on deep rich soil in an exposed position. On light and dry soils it generally gets attacked by the black blight and spoils. When the points suffer from this pest it becomes imperative to pinch them out and burn them.

Photographed and Copyrighted by J. C. & Co.
CARTERS' MAMMOTH WINDSOR BROAD BEAN.

BROAD BEANS.

WHITE-SEEDED VARIETIES.

- ✕ **Carters' Mammoth Windsor.**—The longest podded Windsor Bean in existence, and the finest for exhibition. The pods of this superb strain often contain as many as five and six gigantic beans. A grand selection.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters' Market Garden Windsor.—Very superior to the ordinary type. Per quart—s. d.
 The eye retains its white colour to the last 2 0

Carters' Improved Windsor.—Large and productive, bushy habit, well podded from top to bottom of stem 1 6

Carters' Mammoth Longpod.—A decided improvement upon the *Early Longpod*. Sent out originally by us, and awarded the First Class Certificate, R.H.S. 2 0

Seville Giant Longpod.—Distinct and handsome, 18 inches high, with pods often 12 inches in length. First Class Certificate, R.H.S. 1 6

Carters' Broad Bean.—Selected for length of pod and productiveness 1 6

Aquadulce Longpod.—Early and long-podded... .. 1 6

Johnson's Wonderful.—One of the oldest long-podded varieties 1 0

Minster Giant Longpod.—An old favourite, of good habit and appearance 1 0

Monarch Longpod.—Useful for general crop; pods of moderate length 1 0

Royal Dwarf Fan or Cluster-headed.—Early, dwarf, and good flavour 1 0

Early Longpod.—Robust habit; pods well 0 8

Early Mazagan.—One of the earliest; small pods 0 8

Carters 217, 238, & 97, HIGH HOLBORN, LONDON. 1908.

BROAD BEANS.—*Continued.*

Carters' Green Leviathan (Green Seeded).

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says :—"Pods of great length, and one of the best of the long pod section; good crop."

We introduced this fine Bean as a fitting companion to its prototype, Carters' *Leviathan* (*White Seeded*). When we state that the Bean we now offer carries pods of equally enormous proportions, and has the additional advantage of a beautiful green colour which is retained when cooked, its merits will be at once recognised. Its flavour is most mellow and delicious.

Price 2s. 6d. per quart, 1s. 6d. per pint.

GREEN-SEEDED VARIETIES.

Per quart—s. d.

Carters' Harlington Green Windsor.—

A distinct and valuable Green selection from an old favourite variety. These Green Beans are preferred by many on account of their colour when sent to table 2 0

Carters' Masterpiece Longpod.—An

exhibition Green Longpod Bean. It combines all the best properties of a first-class Broad Bean, and possesses the fine quality and flavour of the Green over the White Bean. It is most prolific, a great part of the pods hanging in pairs 1 6

BECK'S DWARF GREEN GEM.—Early and prolific ... 1 3

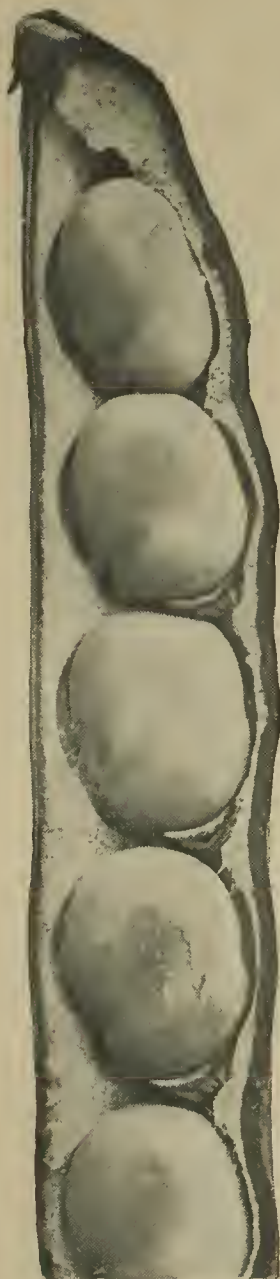

GREEN NONPAREIL.—Fine cropper, of good flavour ... 1 3

GREEN WINDSOR.—Large beans, of fine colour ... 1 3

GREEN LONGPOD.—Large podded and productive ... 0 10

PART OF POD.

CARTERS' GREEN LEVIATHAN.

Photographed and Copyrighted by J. C. & Co.

CARTERS' JULY CLIMBING FRENCH BEAN WITH STRINGLESS PODS.

We had the pleasure to bring to the notice of our customers a climbing stringless variety, which we strongly recommended, and we have no reason to alter the opinion expressed last year. It bears round pods so freely produced that we have counted as many as forty on a stalk. It holds well to the sticks and is the earliest Bean we know of.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *July Climbing French Bean*. Flower white, height 3 feet, foliage dark green; pods long, thin, straight, averaging 6 inches in length, usually in pairs; good crop; pods stringless."

"An early fruiting Climbing French Bean. The pods are thick, medium sized, and very like the excellent Butter Beans in form. Not in July alone, but it keeps on fruiting over quite a long season, and is as good now in September as it was at first. The actual bean is very small, and the pods keep tender longer than any variety I have tried."—Mr. J. C. TALLACK, Head Gardener to E. M. MUNDY, Esq., Shipley Hall.

Price 2s. 6d. per quart; 1s. 6d. per pint.

CARTERS' CLIMBING FRENCH BEAN SUCCESSOR.

A large-podded Climbing French Bean, selected from our *Ten Weeks*. It is superior to that variety as the pods are almost half as long again, and very delicate eating. It comes in after our *July Climbing*.

Price 2s. 6d. per quart; 1s. 6d. per pint.

Ordinary Climbing French Beans, 2s. per quart.

Carters' *Ten-weeks* Climbing French Beans, 1s. 6d. per pint.

Hints on Culture.—Sow in pots under glass wherever wanted, transplant in prepared beds for training, or grow on in larger pots. For outdoor culture they must not be sown until May is well in—very similar to Scarlet Runners, only that they do not grow quite so robust and do not need such tall stakes. It is ready after our *July Climbing*, hence the same *Successor*.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.—REDUCED IN SIZE.

DWARF FRENCH BEANS.

Carters' Stringless Dwarf French Bean, Holborn Wonder.—The great success which has attended our introduction of the first stringless Green-podded Bean, Carters' *Canadian Glory*, has encouraged us to pursue our efforts in selecting stringless Beans for general use. Our *Holborn Wonder* will be found to be free from threads, is quite distinct and very prolific, and we confidently recommend it.

Price 3s. 6d. per quart, 2s. per pint, 1s. and 6d. per packet.

Carters' Stringless Dwarf French Bean, Canadian Glory.—An *Extra Early* Dwarf Green-podded French Bean, possessing the invaluable quality of bearing pods absolutely without strings or threads. It is equally valuable eaten as a *Flageolet* or *Haricot*, as on the Continent.

Price 3s. 6d. per quart, 2s. per pint, 1s. and 6d. per packet.

The Cultivation of French Beans.—Sow in pots under glass for forcing from December to April, and about May in the open borders, followed by two or three successional sowings at intervals of a fortnight. The rows ought to be from 2 feet to 2 feet 6 inches apart, and the plants thinned to about 1 foot apart. They are rather delicate, and should not be sown out of doors until the warm weather sets in.

ALL SEEDS CARRIAGE FREE. FIVE PER CENT. DISCOUNT FOR CASH PAYMENTS.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

DWARF FRENCH BEANS.

in 1907.

Photographed and Copyrighted by J. C. & Co.

Carters' Canadian Wonder.—We were one of the first to make the merits of this fine dwarf Bean known, and its popularity to-day is probably unequalled. The pods are of great length and good for exhibition.
Price 2s. per quart, 1s. 3d. per pint.

Carters' Longsword.—This is a variety which we can recommend either for forcing or for general use. It is very prolific and early, pods of good length, and of very delicate texture.
Price 2s. per quart, 1s. 3d. per pint.

CARTERS' SCARLET EMPEROR RUNNER BEAN.

THE LONG SMOOTH-PODDED SCARLET RUNNER.

Some Reports and First Prizes Awarded in Open Competition during 1906 and 1907.

His Grace The Duke of Portland's Head Gardener says:—"I have given an extended trial to Carters' *Scarlet Emperor* this season, and I am pleased to say that it has more than ever borne out the good opinion I had of it last season. It is a splendid cropper, with long narrow pods, with a splendid dark green colour. It also has much less of the coarse skin usual in Runner Beans."—Mr. JAMES GIBSON, The Gardens, Welbeck.

The Right Hon. Viscount Portman's Head Gardener says:—"Without doubt the finest Runner Bean ever introduced. It is a prodigious cropper, having straight pods from 12 to 15 inches in length, produced in abundance on each raceme."—Mr. PRINSEP, The Gardens, Buxted Park.

The Right Hon. Lord Poltimore's Head Gardener says:—"Carters' *Scarlet Emperor* is probably the finest Runner Bean yet introduced. It has yielded more beans this dry season than any other variety we have growing."—Mr. T. H. SLADE, The Gardens, Poltimore Park.

Sir Edmund Loder, Bart.'s Head Gardener says:—"A very fine variety which bears most profusely, and quite the finest Runner Bean. I have measured plenty 12 inches in length on stalks bearing a dozen beans. What would they be if thinned?"—Mr. W. A. COOK, Leonardslee.

"Carters' *Scarlet Emperor* Runner Bean has proved a great success; your catalogue description has been reached with me, viz., 15 inches long and in bunches."—Mr. R. A. BAILEY, Castleby.

"Carters' *Scarlet Emperor* Runner Bean is a strong grower, flowers very freely, and is promising well."—Mr. WHYTOK, Head Gardener to His Grace The Duke of Buccleuch, Dalkeith.

"It is a great pleasure to me to tell you I have exhibited your *Scarlet Emperor* Runner Bean this year five times, and gained five First Prizes. It is a wonderful cropper."—Mr. G. W. GRAY, Head Gardener to W. N. Clayton, Esq., The Grove.

"Carters' *Scarlet Emperor* Runner Beans are the most refined Bean for exhibition with which I am acquainted."—Mr. B. ASUTON, Head Gardener to The Right Hon. The Earl of Lathom, Lathom House.

"I grew your *Scarlet Emperor* Runner Bean, and exhibited at Stokenchurch

District Show. I carried off an easy First Prize, and the gardeners from the largest places in our district said that they had never seen such beans. The pods were uniformly about 11½ and 12 inches in length, and straight."—Rev. C. SERJEANT, Stokenchurch.

"The *Scarlet Emperor* Runner Bean has been all that could be desired. I have had some over 12 inches in length."—Mr. EDGAR GREEN, Brentwood.

"*Scarlet Emperor* is the finest selected Runner Bean I have grown. Free-fruiting and many of the pods reaching over one foot in length while young; it is straight and shapely, and in every way an excellent type."—Mr. J. C. TALLACK, Head Gardener to W. Munday, Esq., Shipley Hall.

"I am more than pleased with the result of Carters' *Scarlet Emperor* Runner Bean. I have got beans 14 inches in length without thinning or any special treatment."—Mr. T. W. H. BANFIELD, Bandon.

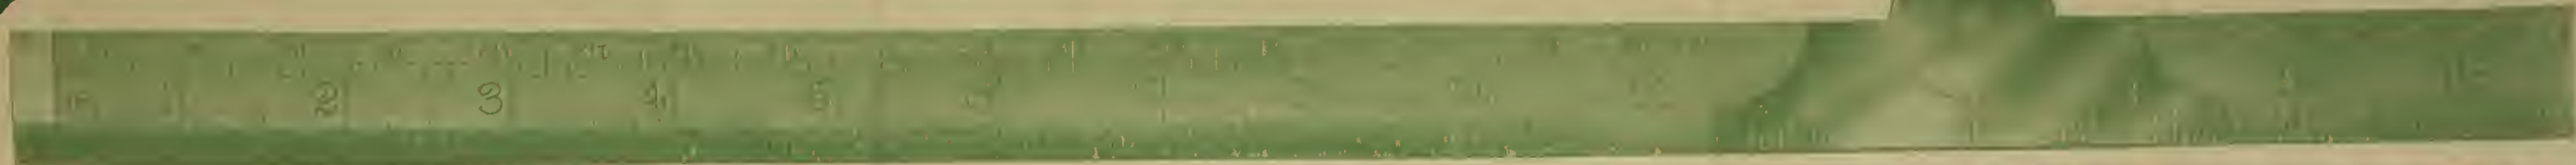

"I have a splendid row of *Scarlet Emperor* Runner Bean. Every bean grew, and the row is now covered with bunches of pods 6 to 8 in a bunch, and 12 inches long."—Mr. T. VARLEY, Gloucester.

"I am very well satisfied with Carters' *Scarlet Emperor* Runner Bean. They are good croppers, having as many as 27 pods on one branch, averaging 13 inches long."—Mr. T. WILKINS, Clewer.

"I am more than pleased with your *Scarlet Emperor* Bean. I never saw anything like it before, it is exactly as you describe it in your catalogue."—Mr. J. KING, Head Gardener to The Right Hon. Earl of Eldon, Shirley Park.

"The *Scarlet Emperor* Runner Bean has done remarkably well with me. I gathered some a week ago 12 inches long, the largest I have ever grown."—Mr. WATKIN ROGERS, Ruabon.

Price 4s. 6d. per quart; 2s. 6d. per pint; 1s. per packet.

CARTERS' ELEPHANT RUNNER.

Showing type of fruiting cluster. Reduced in size.

The Cultivation of Runner Beans.—Runner Beans should be planted out of doors during May, followed by successional sowings at intervals of a fortnight; by this means an abundant supply is provided until the plants are destroyed by the autumn frosts. Care should be taken when planting that sufficient space is allowed between the rows (say 3 feet), and 12 inches from plant to plant in the rows, and the plants should be well watered in dry weather or the flowers will drop off. If slugs are troublesome during the young stage of growth, dust over with soot and lime.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1903.

ROUND SUMMER BEET.

11

We were awarded the First Class Certificate, R.H.S., for this fine Beet.

Photographed and Copyrighted by J. C. & Co.

The Roots are ready for use in the Summer Salads.

Carters' Crimson Ball (*see Photograph*).—Round Beets are of the greatest value on account of earliness. The roots can be lifted during the height of the summer season when salads are in demand; and the fresh taste imparted by the highly-coloured slices are considered preferable to those from stored roots. The old-fashioned flat types were never in favour with cooks, because of their weak colour and stringy texture. In Carters' *Crimson Ball* these defects have been remedied. Seven First Prizes reported last season.

Price 1s. and 6d. per packet; 1s. 6d. per ounce.

Carters 257, 232, & 97, HIGH HOLBORN, LONDON.—1908.

BEET.—*Continued.*

Photographed and Copyrighted by J. C. & Co.

X **Carters' Perfection** (*see Photograph*).—As the Beet family is very sensitive to cross fertilization, we start afresh from time to time, with stocks with "new blood." We have again re-selected our *Perfection* Beet, which is now a perfect and refined root. The best long Beet in cultivation; medium size, rich crimson lake colour, and splendid flavour; foliage shining and dark. Pronounced by the Royal Horticultural Society to be "perfection," and awarded First Prize at the Great Autumn Vegetable Exhibition, 1905. Eleven First Prizes reported in 1906.

Price **1s.** and **6d.** per packet; **1s. 6d.** per ounce.

"You will be glad to know I won First Prize with your *Perfection* Beet here last October."—E. D. TRUNDLE, Esq., Lisimore.

BEET.—*Continued.*

Ornamental Foliaged Beet.—An interesting species for decoration in the flower garden. The thick fleshy ribs are beautifully coloured either yellow, crimson, cream, or white, and the contrast with the shining green leafage is very effective.

Price 6d. and 1s. per packet.

Croton-leaved Beet.—A decided acquisition to the group of decorative Beets, the long, narrow, crimson-bronze leaves having an elegant appearance. For the ribbon border, or as a pot plant for table decoration, it is effective. The roots are edible.

Price 6d. and 1s. per packet.

Seakale Beet.—An improved type of a delicious vegetable, in reality a Beet in which cultivation has developed the leaves instead of the root. It is sown at the same season as Beetroot in April, in rows about 18 inches apart, and the plants thinned out to 15 inches apart. At the end of summer they may be lifted as required, the green portion of the leaves cut off and the fleshy stems boiled and served with sauce, like Seakale.

Price 6d. and 1s. per packet.

	Per oz.—s. d.		Per oz.—s. d.
BRAZILIAN.—Grown for its handsome ornamental foliage per pkt., 6d. & 3d.	0 9	EGYPTIAN TURNIP-ROOTED. — Good stock; useful for shallow soils per pkt., 6d. & 3d.	0 9

DELL'S DARK-LEAVED.—Splendid deep rich coloured root, leaves of dark and glossy appearance per pkt., 6d. & 3d.	1 0	SPINACH (Edible-leaved).—Leaves thrown up in profusion, and largely used as a substitute for Spinach per pkt., 6d. & 3d.	0 10

"You may be interested to know that **I have been a customer of your house for over 60 years**, quite in a small way, but I have always received the same courteous attention as any of your largest customers. I have much pleasure in telling you this."—Mrs. ROGERS, Lansdowne Avenue, Tonbridge.

"Last year **your seeds did remarkably well**, especially the Outdoor Tomatoes, and all visitors were pleased with the prolific appearance of the kitchen garden."—C. S. CATHY, Esq., Southsea, *March 7th*, 1907.

"We have what we consider **a very fine crop of your Sunrise Tomato** (Indoors). They average about **10 bunches to a plant**, many of the clusters a foot long, with from 12 to 20 fruit, and **some of the clusters weighing 2 or 3 pounds**."—Mr. MARSHALL, The Gardens, The Cottage, Neasden.

The Cultivation of Beet.—The round varieties required for early use should be sown under cover in February. The main crop should be sown the last week in April, on ground that has been well trenched and manured. Let the rows be about 18 inches apart, thin them to allow about 9 inches between the plants, and keep the soil well-stirred with the hoe during summer.

KALE.

CARTERS' RUSSIAN KALE (*Chou de Russie*).

By kind permission of "Gardeners' Chronicle."

Award of Merit and First Class Certificate after trial at Wisley, March 19th, 1907.

The only novel variety of Kale in the trial considered worthy of the award. No other Kale in the whole trial of 54 stocks received the First Class Certificate.

This distinct and extremely hardy variety stood the exceptionally severe winter better than any other variety grown; the leaves are very curious, in form somewhat resembling a deer's antler, of singularly thick substance, and of a peculiarly green colour.

When cooked this is the most delicious variety of Kale which we have ever tried, the young shoots especially being particularly delicate in flavour. Our opinion is endorsed by a well-known writer in the *Gardeners' Chronicle*, who says: "I have had the pleasure of tasting its sprouts cooked, and can verify the opinion passed upon it. It is exceptionally good."

Extract from "Gardeners' Chronicle," March 23rd, 1907.—"A very curious and novel Kale is 'Russian Kale.' This forms almost hearting heads of deeply cut or lacinated leafage, and produces sprouts in great profusion on the stems."

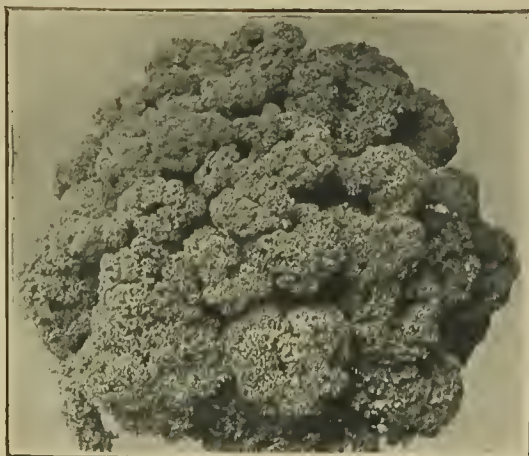

CARTERS' RUSSIAN KALE (*Chou de Russie*).

"A very fine new hardy Kale. It is a dwarf-growing kind, and has spreading heads composed of very stout side shoots well furnished with medium-sized deeply cut leafage. It comes into use early, and its dwarf habit prevents it from suffering from cold winds and sleet in the way a taller variety would. This Kale has been tested at Wisley. A.M., R.H.S., March 19th. Messrs. James Carter & Co., High Holborn."—*Gardeners' Magazine*, March 30th, 1907.

Price 1s. 6d. per packet.

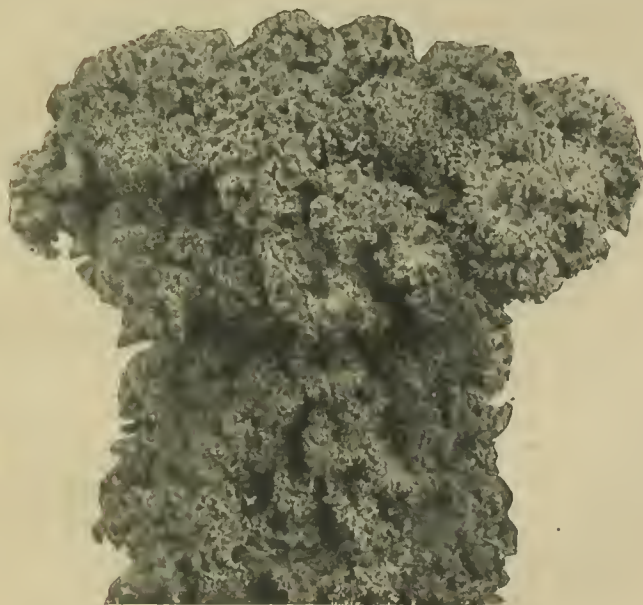

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

BORECOLE, or KALE.

Photographed and Copyrighted by J. C. & Co.

CARTERS' DWARF EXTRA CURLED KALE.

Photographed and Copyrighted by J. C. & Co.

CARTERS' HALF TALL SCOTCH KALE.

Carters' Dwarf Extra Curled (*see Photograph*).—

Award of Merit, R. H. S., 1907, after trial at Wisley. A re-selected and crested form of the Early Kale so popular in the North. It will resist the most intense frost, and make a delicious winter dish.

Price **1s.** and **6d.** per packet;
1s. 6d. per ounce.

Carters' Half Tall Scotch Kale (*see Photograph*).—

A fitting companion to our well-known *Dwarf Extra Curled* type. The leaves are very dense and moss curled. Stands the coldest weather, and the greater the frost the more delicate the leaves eat. If the leaves at the top are cut during the early part of the winter, it will greatly encourage the growth of the young shoots upon the stem.

Price **1s.** per ounce;
6d. per packet.

Carters' Mammoth Tall Scotch Kale.—

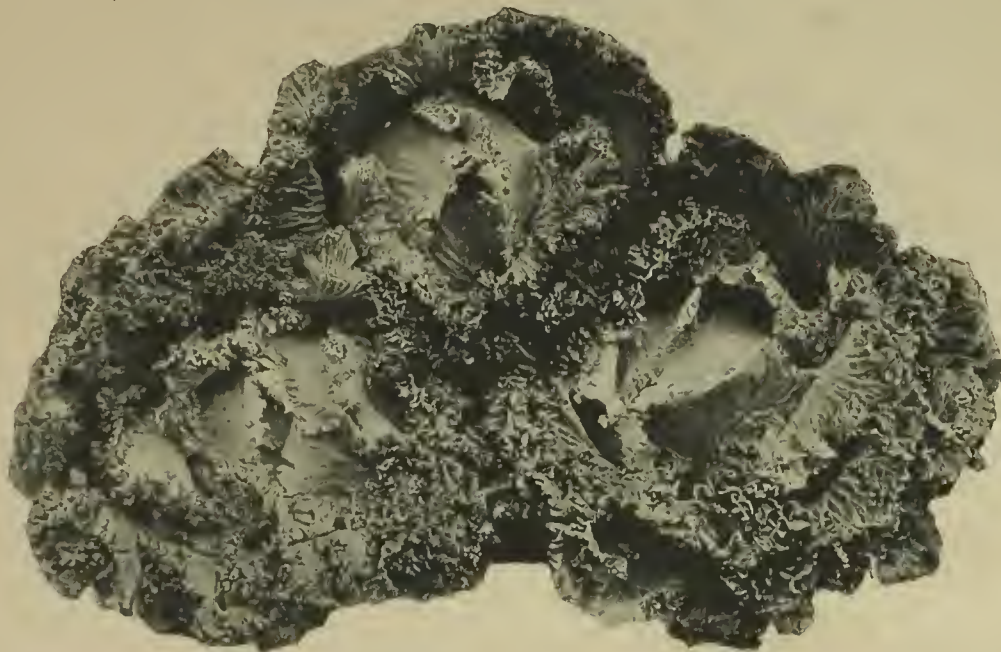

A very robust variety, suitable for large establishments where quantities of winter green-stuffs are needed.

Price **1s.** per ounce;
6d. per packet.

Carters' Improved Garnish-

ing.—This is not only a valuable winter vegetable, but also produces a variety of distinct and beautiful shades of colour in its variously tinted leaves that are useful for many decorative purposes.

Price **1s.** and **6d.** per packet;
1s. 6d. per ounce.

BORECOLE or KALE.—*Continued.***CARTERS' DRUMHEAD KALE.**

We received an Award of Merit from the Royal Horticultural Society for this Kale.

Carters' Drumhead Kale.—A valuable winter vegetable with a solid cabbage-like head. Quite delicious when cooked. (*See Photograph.*)

"Quite distinct from any other Kale here. The leaves are broad and it is now hearting like a *Drumhead* Cabbage."—Mr. J. WHYTOCK, Head Gardener to His Grace the Duke of Buccleuch, Dalkeith.

"This is a delicious looking Kale which makes a good head, and is as delicious when cooked as it looks while growing."—Mr. W. A. COOK, Head Gardener to Sir Edmund Loder, Bt., Leonardslee, Horsham.

Price 1s. and 6d. per packet, 1s. 6d. per ounce.

Carters' Purple Plume Kale.—Leaves of a rich purple, very tall and handsome; a useful vegetable as a winter dish or for garnishing.

Price 1s. and 6d. per packet; 1s. 6d. per ounce.

Asparagus Kale.—The long thin shoots produced on the plant in early spring make a delicious dish.

Price 6d. and 1s. per packet.

						Per oz — s	d.
Cottager's.	Very hardy, of tall robust growth, throws a great profusion of side shoots, of splendid quality. Award of Merit, R.H.S., March, 1907	per packet	6d. & 3d.	0 10
CARTERS' CURLED.	—Dwarf; superbly curled	6d. & 3d.	0 9

TALL PURPLE CURLED.	—Prettily curled and of rich colour	3d.	0 6
THOUSAND HEADED.	—Loose headed; great profusion of leaves	0 4

The Cultivation of Kale.—Sow the seed in March for early winter crop, and again in April for main winter crop. Transplant as soon as ready in summer, about 2 feet apart, into good soil, made firm and highly manured.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

BROCCOLI.

The Cultivation of Broccoli.—For the earliest crop a sowing is requisite the beginning of March, and a little protection may be necessary for the seed-beds. Successional sowings should follow up to June. Prick out into a prepared bed when strong enough, and when thoroughly established in summer transplant to permanent quarters, the earliest kinds first, to produce a constant supply of heads, according to the variety, until Cauliflowers are ready in July the following season. The soil should be deeply dug, well manured, and in good tilth and firm before transplanting.

Photographed and Copied by J. C. & Co.

CARTERS' AUTUMN.

FOR CUTTING FROM SEPTEMBER TO DECEMBER.

Carters' Autumn.—The earliest white close-headed variety. Comes in after early Cauliflower and before winter Broccoli.

Price 1s. 6d. and 2s. 6d. per packet.

Snow's Winter White.—A valuable midwinter variety, very constant excepting when the season runs out of its usual character, when the head may be later in reaching maturity. per packet, 1s. 6d. 2 6

Carters' Winter.—This will be found one of the most reliable varieties; good solid heads per packet, 1s. and 1s. 6d. —

GRANGE'S AUTUMN WHITE.—Good solid heads of fine appearance	per packet, 1s.	1 6

BROCCOLI.—Continued.

Photographed and Copyrighted by J. C. & Co.
CARTERS' SANDRINGHAM.

FOR CUTTING FROM JANUARY TO APRIL.

Carters' Sandringham Winter White (*see Photograph*).—A choice re-selected stock of Snow's Broccoli, which we strongly recommend to our customers. The heads, which attain a good size, are of a very compact growth and beautifully white.

Price 2s. 6d., 1s. 6d., and 1s. per packet.

Carters' Mammoth Spring White.—We have no hesitation in saying that this is one of the largest as well as the best varieties grown, and attains greater popularity each season. The heads are snow-white and of the finest texture.

Price 1s. 6d. and 1s. per packet; 2s. 6d. per ounce.

Carters' Improved Early Purple Sprouting.—This variety is fit considerably earlier than the Purple Sprouting generally grown, and throws up a great profusion of Sprouts.

Price 1s. per packet; 1s. 6d. per ounce.

Carters' Pyramid.—So named on account of the pyramidal habit it assumes; of very hardy and vigorous growth and pleasing appearance.

Price 1s. and 1s. 6d. per packet.

	Per oz.—s. d.
ADAMS' EARLY WHITE.—Produces fine heads, pure, compact and firm	per packet, 6d. 0 10
BRIMSTONE.—Pale sulphur coloured heads of large size	per packet, 6d. 0 9

CARTERS' SUMMER BROCCOLI.

FOR CUTTING FROM APRIL TO JUNE.

Carters' Summer (*see Photograph*).—This variety is strongly recommended to growers of late Broccoli. It is extremely hardy and will withstand the most intense frosts. The heads are of superb quality, white, close, and compact.

Price **1s. 6d.** per packet; **2s. 6d.** per ounce.

Carters' Champion.—We introduced this variety some years ago; it is of sterling merit and steadily grows in favour. Grows to a large size, and is of very hard, compact habit.

Price **1s.** and **6d.** per packet; **1s. 9d.** per ounce.

The Rev. M. F. HILTON, Welton Vicarage, writes :—"I send photo of your *Champion* Broccoli. After trimming for cooking one weighed $8\frac{1}{2}$ lbs. and measured 45 inches round. My gardener finds your seeds reliable and satisfactory "

Per oz.—s. d.

ECLIPSE.—Fine hardy late variety	per packet, 1s.	2 0

BRUSSELS SPROUTS.

CARTERS' HOLBORN EXHIBITION.

Carters'

**X Holborn Exhibition
Brussels Sprouts.**

(See Photograph.)

A very fine strain, the result of many years' careful selection. Its points for size, colour, and productiveness are good all round. Besides being largely grown in private gardens, it is a special favourite with many of our best known market growers, as it has a thin smooth skin and is of medium height.

Price 1s. and 6d. per packet;
1s. 9d. per ounce.

THE ROYAL HORTICULTURAL SOCIETY'S report of last season reads:—**"Carters' New Exhibition. Plants 2 feet high, sturdy, producing a mass of medium sized hard sprouts from base to crown."**

AIGBURTH.—Medium height; Sprouts of good size and colour.

1s. per oz.; 6d. and 3d. per packet.

FRESH IMPORTED.—Small, close, compact Sprouts.

8d. per oz.; 6d. and 3d. per packet.

ROSEBERRY.—Large Sprouts; tall growing, and of good quality.

10d. per oz.; 6d. and 3d. per packet.

SCRYMGER'S GIANT. — Tall-growing variety, producing Sprouts of good quality and large size.

10d. per oz.; 6d. and 3d. per packet.

The Cultivation of Brussels Sprouts.—Sow the seed early in March for first crop, and again late in April for succession, transplant in summer into good ground made thoroughly firm, when the plants are large enough to handle, and keep stirred with the hoe through the dry weather. The Sprouts are fit for gathering after they have been under the influence of a hard frost, which makes them tender eating. Some growers make a sowing in August to get early sprouts.

BRUSSELS SPROUTS—*Continued.*

Photographed and Copyrighted by J. C. & Co.
CARTERS' PERFECTION BRUSSELS SPROUTS.

Carters' Perfection Brussels Sprouts.

(See Photograph.)

A standard variety for general use, producing large and firm sprouts in great abundance. As a late Sprout it is much appreciated. It is a taller growing variety than our Exhibition strain.

Price 6d. and 1s. per packet;
1s. 6d. per ounce.

Carters' New Cabbage Sprout.

Introduced by us last Season, is a cross between Winningstadt Cabbage and Cambridge Champion Brussels Sprout. The plants are crowned with good-sized firm Cabbages, and the stem studded with Sprouts. When the Cabbage head has reached its perfection it should be cut, so that the Sprouts may then develop.

The best results will be attained by autumn sowing.

Price 6d. and 1s. per packet.

"The *Scarlet Emperor* Beans took First Prize, and were said to be the best in the Show."—Mr. H. PENNY, Goring-on-Thames, *January 12th, 1907.*

"I won First Prize last August with this Bean at Craven Arms Show."—Mr. T. J. YATES, Onibury, *January 16th, 1907.*

"I took four First Prizes with your Bean *Scarlet Emperor*."—Mr. S. W. FENN, Nassington, *January 15th, 1907.*

"The *Sunrise Tomato* is an unqualified success; I never saw any so good. I am growing the same variety again this year. The coloured plate in your Catalogue hardly does justice to them, to judge by our plants of last year."—Mr. T. CARTER, The Gardens, Butleigh Court, *February 25th, 1907.*

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' SELECTED EARLY CABBAGES. 23

FOR SPRING AND AUTUMN SOWING.

Photographed and Copyrighted by J. C. & Co.

CARTERS' EARLY HEARTWELL CABBAGE.

X **Carters' Early Heartwell** (*see Photograph*).—An early Marrow Cabbage of refined quality and delicate flavour; without doubt one of the best varieties in cultivation. Sown in spring will be fit to cut in summer. Sown in August will be fit to cut in April and May.

Price 1s. and 6d. per packet; 1s. 6d. per ounce.

Carters' Early Garden.—A highly-selected variety, with a sugarloaf head. Preferred by some growers to the round-headed type.

Price 6d. per packet; 1s. per ounce.

Carters' Model.—As a succession to Carters' *Heartwell* this is a useful variety. Its heads are firm and compact, and come close to the ground.

Price 6d. per packet; 1s. per ounce.

	Per packet—s. d.	Per oz.—s. d.

CABBAGE.

*A greatly reduced specimen, Photographed and
Copyrighted by J. C. & Co.*

Carters' Mammoth Beefheart.—The largest Garden Cabbage grown. Sown in spring it gives enormously heavy heads during summer and autumn, or when sown in August fine heads may be expected in the late spring. It is much more robust and hardy than many of the small varieties now recommended for early summer use.

Price 6d. & 1s. per packet; 1s. 6d. per ounce.

FORTY-SEVEN FIRST PRIZES REPORTED FROM 1903 TO 1906.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CABBAGE.—Continued.

Carters' Miniature Drumhead.—A small, globular-shaped Garden Cabbage of delicate flavour and good colour. Although called Drumhead from its shape, it is quite distinct from the Field Cabbage; valuable for small gardens, where only one sort is grown. The plants may be set very close together.

Price 6d. and 1s. per packet; 1s. 6d. per ounce.

Carters' Mammoth Beefheart (*see Photograph and Description, page 24*).

Carters' White Prizetaker.—A good variety with short leaves and white heart; strongly recommended for autumn use; flavour exceptionally mild and melting.

Price 6d. and 1s. per packet.

									Per packet. s. d.	Per oz. s. d.
Carters' Red Pickling. —This is the most perfect type of Red Cabbage; the heads being very hard and compact and of a rich deep crimson, the colour also of the outer leaves being much darker than any other variety we know of, we feel confident that it will speedily displace the older sorts	6d. &	1 0 1 6

8 ounces of Cabbage, in 8 finest sorts, for succession—our selection	5 6

The Cultivation of Cabbage.—By a little careful arrangement Cabbages can be had almost all the year round. An early variety sown in the spring will come into use in the summer; a main crop variety sown in the spring will come in during summer or autumn. Sowings made during July of a quick variety like the *Colewort* will come into use during autumn, whilst sowings made towards the end of August will be fit for cutting in the spring. July sowings of a Cabbage intended for spring cutting often bolt, whereas the same variety sown at end of August stands well. Cabbages require a rich, deeply dug, and well-drained soil; when planted out they should stand 15 to 20 inches apart, according to habit and growth of the variety.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON—1908.

CABBAGE.—Continued.**SAVOY, OHOU DE MILAN, COLEWORT, COUVE TRONCHUDA***Photographed and Copyrighted by J. C. & Co.***CARTERS' GIANT GREEN SAVOY.**

Carters' Giant Green Savoy (*see Photograph*).—An improved type with crimped foliage; the individual leaves are very large, but retain their tender properties longer than any other variety. Price 6d. and 1s. per packet; 1s. 6d. per ounce.

Carters' Early Dwarf Ulm.—A fine re-selected stock of this popular Savoy. Extremely early, good-flavoured, and very hardy. Price 6d. and 1s. per packet.

Carters' Re-selected Tom Thumb.—An exceptionally fine-grained type, with a compact heart. Very early and ornamental. Price 6d. and 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY'S report of last season's trials at Wisley reads:—"Carters' Re-selected Tom Thumb Savoy. A good stock of this dwarf, compact, early, well-known old variety."

CARTERS' GOLDEN BALL.

CARTERS' EARLY SCARLET HORN.

CARTERS' EARLY MARKET.

CARTERS' IMPROVED HORN.

CARTERS' LONG FORCING.

Carters' Golden Ball.—A most distinct and very early variety, specially adapted for forcing and frame work. The roots are almost as round as a turnip, flavour excellent and melting. Awarded First Prize as the best early Carrot, R.H.S. Great Autumn Exhibition, 1905.

Price 6d. per packet; 1s. per ounce.

Carters' Early Scarlet Horn.—A highly selected stock, of bright scarlet colour, one of the most useful in this section.

Price 6d. per packet; 1s. per ounce.

Carters' Early Market.—Fine early variety of good colour, quick in growth, valuable alike for Market Gardeners or private use.

Price 6d. per packet; 1s. per ounce.

Carters' Improved Early Horn.—A perfect type of stump-rooted Carrot, of excellent flavour.

Price 6d. per packet; 1s. per ounce.

Carters' Long Forcing.—A handsome long Carrot, with the same depth of colour and firmness of texture in its earliest stages as other Carrots possess in their later growths.

Price 6d. per packet; 1s. per ounce.

CARTERS' LONG FORCING CARROT.—"This forcing Carrot is one of the most distinct and valuable that we possess, and when better known it is sure to be extensively grown. It is the quickest variety that I know of, and makes but very little top, and the quality is excellent. As a Carrot coming into use early in the year, and for exhibition, it is an acquisition."—E. B. in *Gardeners' Chronicle*.

CARTERS' SUMMER FAVOURITE CARROT.

From a Gold Medal Exhibit, Royal Horticultural Society.

Carters' Summer Favourite (*see Photograph above*).—Awarded Royal Horticultural Society's Silver Medal. A splendid half-long, producing handsome, well-grown, bright cochineal-scarlet Carrots very early in the season. The quality is superb, and as an exhibition variety coming into use early it will be found invaluable for showing in the summer months. Forty Prizes reported to us in Seasons 1906 and 1907.

Price 6d. per packet; 1s. 3d. per ounce.

Carters' Blood Red.—This Carrot is quite distinct, and has many good and new qualities. It has a depth of colour not hitherto seen in Carrots, the texture of its flesh, while solid and crisp, is most tender, and entirely loses the pithy heart found in many large-growing varieties. It has handsome long roots.

Price 6d. and 1s. per packet.

"Quite a distinct colour in Carrots; the roots are very tender and of good flavour."—Mr. T. H. SLADE, Head Gardener to the Earl of Poltimore, Exeter.

"The deepest coloured carrot we grow. It should be much appreciated by the chef."—Mr. J. C. TALLACK, The Gardens, Shipley Hall, Derby.

"A variety of excellent quality. It is a beautiful shape, not too large, and when drawn young it makes a most tempting dish. A grand summer variety."—Mr. H. C. PRINSEP, The Gardens, Buxted Park.

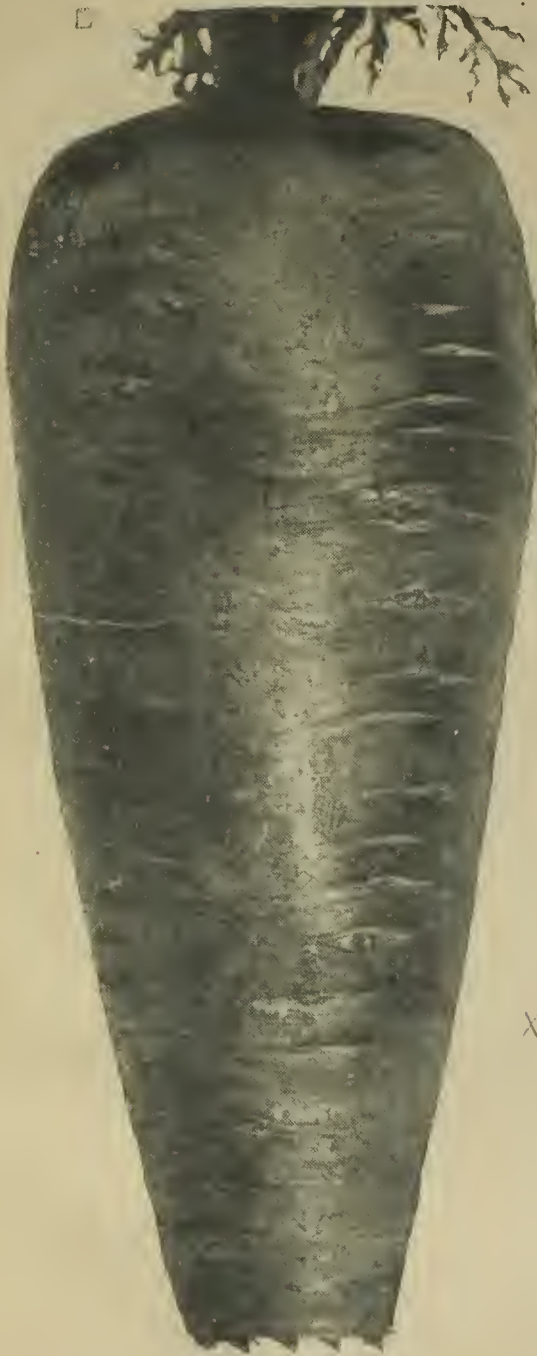

"A splendid variety, beautiful in shape and colour, with a very small core. It does well here."—Mr. J. WHYTACK, Head Gardener to His Grace the Duke of Buccleuch, Dalkeith.

"A Carrot with wonderful depth of colour. It is splendid for exhibition."—Mr. B. ASHTON, Head Gardener to the Earl of Lathom, Lathom House.

Three of our selected types of Carrot were exhibited at the Temple Show, May, 1906, in the Collection exhibited by the University of Reading, which gained a Silver-Gilt Medal.

The Cultivation of Carrot.—For early forcing sow in January in frames, in February on warm border. Make successional and main crop sowings during March and April in deep well-conditioned soil to which manure has not been recently applied. Cover the seed very lightly in $\frac{1}{2}$ -inch drills, and as soon as the plants are strong enough to handle, thin out from 4 to 9 inches, according to sort. Further sowings may be made up to the end of June.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

MUCH REDUCED IN SIZE.

CARTERS' SCARLET PERFECTION CARROT.

Carters' Scarlet Perfection

(see Photograph).—Awarded a Special Certificate of Merit at the Vegetable Conference of the Royal Horticultural Society, and awarded First Prize, R.H.S. Great Autumn Exhibition, 1905. A distinct and greatly improved form of Garden Carrot. It is midway in length between the *Long Surrey* and the well-known *Intermediate*, with the bright scarlet colour of the *Surrey*. The flesh is solid, crisp, and fine flavoured. Invaluable alike for table, exhibition, and market purposes. 188 First Prizes reported to us from 1902 to 1907.

Price 6d. per packet ; 1s. per ounce.

Carters' Red Elephant.—A veritable giant both in length and rotundity.

Specimens have been exhibited at our establishment measuring two feet and a half in length (30 inches). It has been brought to this high standard of perfection by one of the best professional gardeners, from whom we originally acquired the whole stock. A remarkable variety, and one which has already become prominent in first-class gardens and on the exhibition table.

Price 6d. per packet ; 1s. 3d. per ounce.

SIXTY-ONE FIRST PRIZES REPORTED BY CUSTOMERS.

CAULIFLOWER.—FIRST EARLY VARIETIES.

Photographed and Copyrighted by J. C. & Co. GREATLY REDUCED IN SIZE.

NOVELTY.

Carters' Forerunner Cauliflower.—The quickest Cauliflower ever grown. Ten days earlier than others. Large white head, solid, and good size. Sow in middle of February, transplant when first leaves drop, under glass, plant in open ground end of April or beginning of May, and the first heads will be ready by the middle of June. The leaves protect the head from the summer sun.

Price 1s. 6d. and 2s. 6d. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *Early Forerunner*. A very early variety of dwarf, compact habit; sturdy, with rather small, solid, handsome, pure white heads."

WHAT EXPERTS SAY ABOUT IT.

"Carters' *Forerunner* Cauliflower was sown on February 1st with *Snowball* and another well-known early variety. Planted in the open the third week in April, we commenced to cut compact heads on June 7th. None of the other varieties were nearly ready. I am much impressed with it, and can congratulate you on it as distinct and valuable."—EDWIN BECKETT, Head Gardener to the Right Hon. Lord Aldenham.

"I grew your new Cauliflower in frames along with *Snowball*, and grown thus it was 8 to 10 days earlier, a closer head, and in all respects a better form. A most valuable introduction. I had it also on early borders in the open."—G. WYTHES, late Head Gardener to His Grace the Duke of Northumberland.

"Carters' *Forerunner* Cauliflower is a marvel. I cut fine heads on June 6th, almost like *Autumn Giant*."—Mr. W. HUMPHREY, The Gardens, Loampits.

Carters' Early Emperor.—A giant summer Cauliflower for outdoor work.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

THE ROYAL HORTICULTURAL SOCIETY's last season's report reads:—"Carters' *Early Emperor*. Plants dwarf, sturdy, with semi-protecting foliage; heads medium to large in size, firm, and of excellent shape."

Carters' Defiance Forcing.—For frame or pot culture. In perfection during early summer.

Price 1s., 1s. 6d. and 2s. 6d. per packet.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

A GIANT AUTUMN CAULIFLOWER.

Photographed from Nature and Copyrighted by J. C. & Co.—MUCH REDUCED IN SIZE.

CARTERS' EXTRA EARLY AUTUMN GIANT CAULIFLOWER.

Carters' Extra Early Autumn Giant.—This magnificent Cauliflower is more dwarf, considerably earlier, and in every respect better than the old *Autumn Giant*. It produces enormous snow-white heads, and is admitted to be the largest and the earliest of the giant forms that are of such value during September and October.

We have records of 134 FIRST PRIZES having been won by Customers.

Price 1s. 6d. and 2s. 6d. per packet ; 3s. 6d. per ounce.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CAULIFLOWER.—*Continued.*

Photographed and Copyrighted by J. C. & Co.

GREATLY REDUCED IN SIZE.

CARTERS' MONT BLANC.

Carters' Mont Blanc (*see Photograph*).—Magnificent snow-white heads, well protected by the leaves; one of the best for soils of heavy or retentive nature.

Price 1s. and 1s. 6d. per packet.

	Per oz.	Per pkt.
	s. d.	s. d.
CARTERS' EARLY.—Fine large heads...	2 0	1 0
EARLY DEFIANCE.—Closer heads of good quality ...	2 6	1 0
EARLY WHITE LONDON.—Useful for general cultivation ...	1 9	1 0
ECLIPSE.—Distinct; splendid compact heads ...	2 0	1 0
FIRST CROP.—Very early, firm white heads ...	—	1 0

WALCHEREN.—A splendid mid-season variety, with solid large white heads ...	1 6	1 0

The Cultivation of Cauliflower.—Sow in pans on a gentle heat in February and March, to be pricked out in April on a warm border. Sow in the open in April and May for succession, and again in August for winter and spring use under glass.

"Mrs. TREVOR LLOYD wishes to express how very satisfied she is with the seeds obtained from Messrs. Carter & Co. In spite of a cold wet season, both Vegetable and Flower seeds are producing excellent results."—*June 24th, 1907.*

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CELERY.

33

Photographed and Copyrighted by J. C. & Co.

Carters' Solid Ivory Celery.—One of the most remarkable features of Carters' *Solid Ivory Celery* is its extreme dwarf compact habit, and beautiful white colour. If the heads are tied with a little rough matting, the same as with Cos Lettuces, it will assist not only in keeping the Celery perfect, but also to exclude superabundant moisture. We have records of no less than 176 First Prizes awarded this variety during the past few seasons in open competition.

Price 1s. and 1s. 6d. per packet.

"I never saw anything to match Carters' *Solid Ivory Celery*; it is well named."—R. H. G., Eastdown.

"*Solid Ivory Celery* has done remarkably well, and is deserving of the name solid."—P. S., Middlewick.

"I think *Solid Ivory Celery* is the best flavoured I ever had; I shall grow no other in future."—C. T., Wexford.

"Last year I took two First, one Second, and one Third Prize with the produce from the dozen Beans I had from you."—Mr. G. BARNES, Week Dartington, *March 6th*, 1907.

"The Runner Bean, *Scarlet Emperor*, I had from you last year won me four First Prizes."—Mr. JOHN LEE, Higher Belington, *March 4th*, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908

CELERY.—*Continued.*

Photographed and Copyrighted by J. C. & Co.

Carters' Incomparable Crimson Celery.—A dwarf-growing, rich-coloured Celery, of clean and refined appearance, very crisp eating, and of delicious flavour. Seventy-one First Prizes reported since 1902.

Price 1s. and 1s. 6d. per packet.

"I have taken five First Prizes with Carters' *Incomparable Crimson Celery*."—S. SETTERFIELD.

"I took First Prize with *Incomparable Crimson Celery* against a dozen competitors."—A. McL., Kent.

"Carters' *Incomparable Crimson Celery* surpasses all other kinds I have seen; they average 4½ lb. each."—F. H., Surrey.

Mrs. BRADSTOCK has had all her seeds from Carters' for years now, and they have always been most satisfactory."—Ottery St. Mary.

"The gardener has asked for your seeds, saying—'Nothing seems to beat Carters'.'"—Mrs. SHERRIFF, Sparsholt.

"The seeds have turned out splendid. I hope to give you a larger order next season."—HEDLEY V. HOGG, Esq., Llanmadoc, June 10th, 1907.

"I should like to tell you of the excellent cropping qualities of your Runner Bean, *Scarlet Emperor*, which I purchased from you last year. They hung on the vines like bunches of grapes. I gathered one bunch with thirteen pods. By measuring the same I found the longest Bean to be 14 inches long, and the shortest 8½ inches. I consider this to be the finest Bean in existence."—Mr. F. CATTELL, Moreton, June 15th, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1903.

CELERY.—*Continued.*

Standard Bearer.—The finest type of giant Red Celery that we know of. First Class Certificate, R.H.S. Some grand heads were included in the First Prize Collection of Vegetables at the Royal Horticultural Society, October, 1905, and this variety also gained the First Prize in the open class for Celery at Shrewsbury, 1906.

Price 6d., 1s., and 1s. 6d. per packet.

"I am very pleased to inform you that a friend of mine exhibited your *Standard Bearer* Red Celery three times and got two First Prizes."—Mr. STONEHOUSE, Durham.

LARGE-ROOTED CELERIAC OR TURNIP-ROOTED CELERY	1s. & 0 6

CELERY SEED FOR FLAVOURING SOUPS, per lb., 2s.

The Cultivation of Celery.—Sow in February on a mild hot-bed for earliest crop, to be pricked out on bottom heat when ready, and transferred to trenches in June. Sow in March in seed pans for main, and in April for late crop. The trenches should be bottomed with rich soil, and the plants liberally watered in August; earth up gradually during August and September, and commence lifting in November.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1903.

FORCED HEADS OF CHICORY.

Photographed and Copyrighted by J. C. & Co.

It is only on the Continent one can appreciate the delicate piquancy attached to salads, as they seem to understand them better than we do here. Chicory is a leading ingredient in French salads, and the plant is so easily cultivated that it should be more popular here. The seed is sown in late spring, in a sheltered position on a nice soil, very similar to Carrots, the plants thinned out to about 9 inches apart, and left to grow on until the end of the summer, when the growth will die down, leaving a root somewhat like a Parsnip. These are taken into a shed and kept in a heap of soil away from frost, and transferred to a hothouse when needed to produce their blanched heads during winter. They may also be grown in boxes

For Hints on Cultivation, see page 92.

Price of seed, 6d. and 1s. per packet.

Price of roots for forcing, 4s. per dozen (only available in winter).

Photographed and Copyrighted by J. C. & Co.

CRESS.

Carters' "Parsley Curled."—This selection of Curled Garden Cress is comparable with nothing less than a finely Curled Parsley—hence its name;

a distinct advance on the Triple Curled

TRIPLE CURLED.—Extra quick growth

PLAIN OR COMMON.—For early salads

For other Salad Plants, see page 92. For Herbs, see page 42.

CULTURAL DIRECTIONS.

Mustard and Cress.—Two of the most popular salad plants in cultivation, being in season all the year round. They are both cultivated in a similar manner.

CULTIVATION.—Use boxes of good fine soil, make the surface flat, and sow the seed rather thickly over the top, just pressing it in to the surface, but without using any covering material. After sowing, water it well. Place the box in moist heat, and cover with boards or thick paper until the seed germinates. Use shallow boxes half filled with soil. Frequent successional sowings should be made all the year round. Good results may be obtained out of doors in the summer by preparing beds of fine soil in the same way as recommended for boxes, and covering the seed when sown with boards or mats until it germinates.

USE.—Cut as soon as ready with a sharp knife. (*See Illustration above.*)

Watercress may be successfully grown if sown in rows in a shady border and well watered.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908

FRAME CUCUMBER.

Photographed and Copyrighted by J. C. & Co.

CARTERS' MODEL CUCUMBER, growing at our Nurseries for Seed.

This fine Cucumber was exhibited in the collection of vegetables staged by the Horticultural College, Swanley, at the Temple Show, 1906.

Awarded the Silver Banksian Medal.

Carters' Model is one of the handsomest Cucumbers grown, embodying the fine form and general characteristics of *Tender and True* with the prolific habit and strong constitution of the *Telegraph*. Perfect in outline, with scarcely any neck, and of fine flavour, this variety has become popular, both for exhibition and table purposes.

Price 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

SEVENTY-FIVE FIRST PRIZES REPORTED BY CUSTOMERS SINCE 1903.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON. — 1903.

FRAME CUCUMBER.—*Continued.*

Copyrighted by J. C. & Co.

CARTERS' IDEAL CUCUMBER.

Carters' Ideal.—Raised by that champion cultivator, Mr. E. Beckett, head gardener to the Rt. Hon. Lord Aldenham. It is quite an aristocratic variety, both in colour, shape, and flavour.

This grand Cucumber was included in the First Prize Collection of Vegetables exhibited at the Royal Horticultural Society, October, 1905, and also awarded the First Prize in the class for Cucumbers. It also gained a Cultural Commendation after growth at Wisley, 1905.

Price 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

Carters' Cardiff Castle.—Awarded a Cultural Commendation by the Royal Horticultural Society. The fruit is of a rich emerald colour, perfect in form, growing to a length of about 18 inches. It is remarkably free-bearing, producing three or four fruits at a single joint. A very valuable variety where only one is grown. Very early.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

✓ **Carters' Earliest of All.**—Has produced perfect fruit in a trial, nine days in advance of all others. It is of good colour, and handsome form.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Improved Telegraph.—Unquestionably one of the best winter Cucumbers; indispensable for forcing.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Royal Osborne.—This grand introduction of ours has now become thoroughly established and is likely to become as famous in the dark-fruited section as *Telegraph* is in the light-fruited class. It has been represented in many First Prize Collections during the past twelve years, and for the second time gained the First PRIZE at the Royal Caledonian Society's Exhibition, beating twelve others. As an all-the-year-round variety the professional gardener will find it one of the best. It has little or no neck, therefore no waste. Eleven First Prizes reported by customers.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

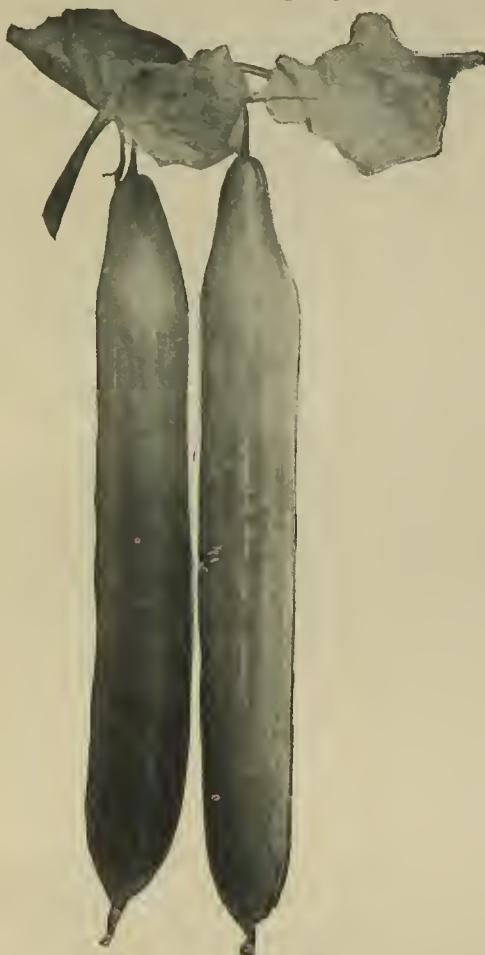

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

best for pickling or salad ... 0 6

CARTERS' PRICKLY RIDGE ... 0 6

CARTERS' STOCKWOOD .. 0 6

GHERKIN.—For pickling ... 0 6

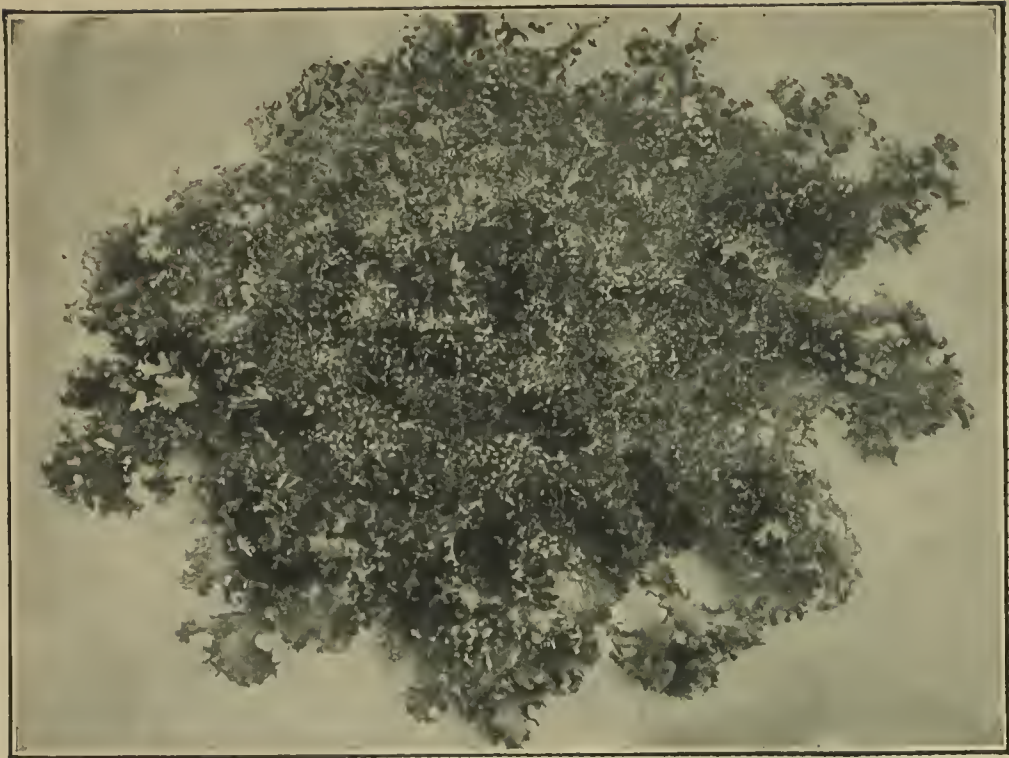

SHORT PRICKLY ... 0 6

The Cultivation of Frame Cucumber.—Sow in a pot or pan during February or March in heat for summer use, keeping the seed-pan shaded from strong light until the seedlings appear, then transplant to well-prepared hot-bed, or other position, when the plants are sufficiently established. If intended for cold-frame culture the plants must not be put out until all danger of frost is past. Sow again in September for winter use on a hot bed.

The Cultivation of Ridge Cucumber.—Sow on gentle heat in April, and plant out in June into a raised mound in a sunny spot, or sow where intended to grow in early June or sooner if weather is warm.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1902.

ENDIVE.

Photographed and Copyrighted by J. C. & Co.

CARTERS' MODEL.

+ **Carters' Model** (*see Photograph*).—The most beautiful and perfect form of Curled Endive yet introduced. It is exceedingly ornamental, of a distinct colour, and bleaches admirably.

Price 1s. per packet, and 1s. 6d. per ounce.

	Per pkt. s. d.	Per oz. s. d.
Carters' White Endive. —Superbly curled and lacinated, easily blanched, very tender	0 6	0 10
Carters' French Mossy Curled. —Leaves prettily and finely serrated ...	0 6	0 10
Carters' Covent Garden Green Curled. —Grown extensively for market ; finely eurl'd	0 6	0 10
Carters' Green Curled. —Dwarf, and beautifully curled 3d. &	0 6	1 0
Carters' White Curled. —Useful, and extensively grown variety ... 3d. &	0 6	1 0

The Cultivation of Endive.—Sow for early crops in middle of May, and for succession to beginning of August ; transplant from the seed-bed into warm situations, and give protection to the late crops required for spring use. A simple method of blanching is to put an inverted pot over each plant and cover it with leaves or straw.

"With the productions from an Exhibitor's Collection of Seeds I made twelve entries at our show, and secured eleven First Prizes and one Special."—Mr. T. RANDALL, Cotgrave.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

CARTERS' OVAL OR PLAIN-LEAVED ENDIVE.

Carters' Oval-leaved (*see Photograph*).—The plain-leaved Endives are by some preferred to the Curled varieties; this variety is the highest type and we strongly recommend it; it is very hardy, of compact habit, and blanches easily.

Per oz.—s. d.

6d. and 1s. per packet 1 6

CARTERS' ROUND-LEAVED BATAVIAN.—Very compact and hardy, forms good heart.

6d. per packet 0 10

GREEN BATAVIAN.—Tender broad leaves, crisp, of good flavour. 3d. and 6d. per packet 0 10

We have been awarded Two First Class Certificates by the Royal Horticultural Society for our stocks of Endive.

"Kindly send me one more of your Exhibitor's Collections of Vegetable Seeds, the same as advertised. Last year's box proved a great success, I think every seed came up, and I have had abundance of everything all through the winter."—Mr. W. J. WEEKS, Kemptown, March 4th, 1907.

"I show a lot of stuff and usually come up top. I have shown for the last ten years, and have taken between 500 and 600 prizes, mostly with produce grown from your seeds."—H. J. MORGAN, Esq., Kingsbridge, January 17th, 1907.

Our Endives were included in the First Prize Collection of Vegetables exhibited at the Vegetable Conference of the Royal Horticultural Society.

Carters 237, 238, & 57, HIGH HOLBORN, LONDON.—1908.

HERBS AND SUNDRY PLANTS.

The following, price **6d.** and **1s.** per packet. Our assortment of 12 varieties, **5s.** ; 6 varieties, **3s.**

ARTICHOKE, GLOBE.—Sow on a gentle hot-bed early in March, plant out during May, or may be sown outdoors in April.

BALM.—Used for making balm tea for medicinal purposes, and in some districts for making wine.

BASIL, SWEET } For seasoning, and flavouring soups.
 „ **BUSH** }

BORAGE.—Grown for salads, and also used for claret cup.

CARDOON.—Sow in April or May on a sunny border ; transplant into well-manured trenches in August or September, earth up and blanch in the same way as for Celery. The midrib of the leaf used in salads and soups.

CELERIAC OR TURNIP-ROOTED CELERY, see page 35.

CAPSICUM, LONG RED	} Sow in heat end of February or beginning of March, prick out into small pots for growing on in greenhouse or frame, or they may be transplanted to a warm border.
„ MIXED ...	
CHILL, SMALL RED ...	

CHIERVIL.—Sow in March or April for summer, and again in July for winter use ; thin out to about 6 inches apart. Excellent for garnishing and valuable for soups and salads.

CORN SALAD OR LAMB'S LETTUCE.—Sow in March and April for summer use, and during August for winter salads, in drills 8 inches apart and thin plants to 4 or 5 inches apart.

CHICORY, CARTERS' IMPROVED.—Sow in April and May in good soil ; thin out to about 6 inches apart. A splendid acquisition for salads.

DANDELION.—Very useful for winter salads. Sow in May, and thin to from 9 to 12 inches apart.

EGG PLANT, PURPLE	} Sow during March in heat, pot off when 3 or 4 inches high, and when established harden off and place in greenhouse for fruit to colour.
„ „ WHITE	

FENNEL.—Used for fish sauce and for garnishing.

LAVENDER.—Grown for its aromatic flowers.

MARJORAM, POT ... } Used for stuffings and
 „ **SWEET KNOTTED** } for flavouring soups.

POTATO SEED.—Will produce some seedlings of great merit.

PUMPKIN, KING OF THE MAMMOTHS.—A giant form, in great request for show purposes.

PURSLAIN, GOLDEN } The young shoots and leaves
 „ **GREEN** } are used in salads.

RAMPION.—Sow on very fine soil in April or May. The leaves are used for salads and by some cooked as Spinach, and the roots used as Radishes.

ROSEMARY.—Used for garnishing, and in some districts an infusion of the leaves is held to be very beneficial for relieving headache.

SAGE.—One of the best known of savoury herbs for sauces and stuffings.

SAVORY, SUMMER	} Used for flavouring soups, and a sprig will be found to impart a piquancy if boiled with Peas and Beans.
„ WINTER	

SEAKALE.—Sow in drills during March and April from 12 to 15 inches apart, and thin out to 8 inches apart. Transplant in the following spring to well-manured ground. Per oz., **9d.**

SORREL, BROAD LEAVED } Leaves used in soups,
 „ **COMMON** ... } salads, and sauces.

SQUASH, MIXED.—A fine mixture of some of the best American varieties.

THYME.—For sauces, stuffings, and soups.

WHITLIEF.—Throws off great profusion of tender leaves, very useful for salads.

WORMWOOD.—Used as a tonic when infused as tea ; very bitter.

CARTERS' EARLIEST WHITE OR PURPLE KOHL RABI.

Price 6d. and 1s. per packet.

CULTURAL DIRECTIONS.

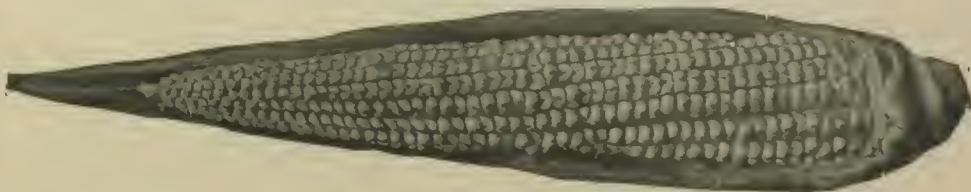

DESCRIPTION.—A useful vegetable, not nearly so much cultivated in this country in gardens as it would be were its merits known.

USE.—As a substitute for Turnips, especially in hot dry seasons. The bulb grows entirely out of the ground.

VARIETIES.—There are two varieties in general cultivation, the white and the purple.

CULTIVATION.—Prepare a breadth of good well-manured soil. Drill the seeds in rows about 15 inches apart in May, and thin out to about 9 inches apart. They are ready for use when they attain the size of a small Turnip.

CARTERS' IMPROVED SWEET CORN.

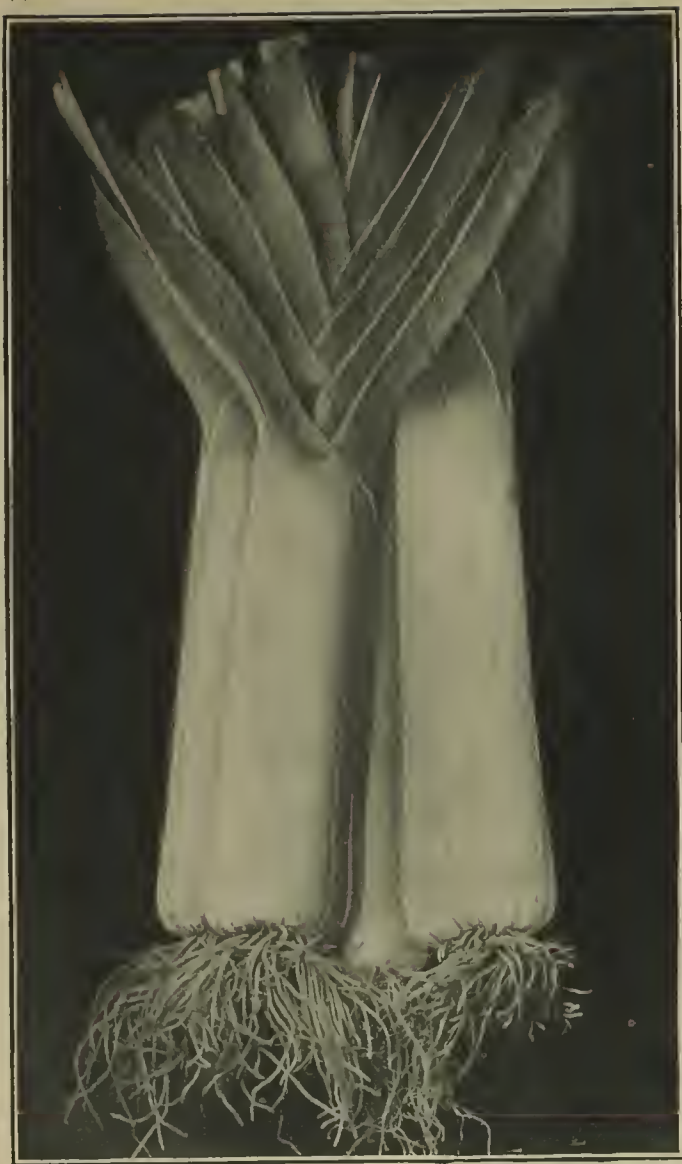

Photographed and Copyrighted by J. C. & Co.

This Maize is a favourite vegetable dish in Canada, and we are now able to offer an improved type, acclimatized and saved in this country. The demand is increasing as it is more widely known. The cobs are cooked and served whole, and the peculiar sweet nutty flavour is so appreciated that after a trial it will, no doubt, find a permanent place in the Kitchen Garden.

Price 1s. per packet.

"I have had a £3 3s. box of seeds from you, also seeds of Parsnips, Carrots, and Beans, &c., this year, and I am glad to say they are all doing well. I may say that for some years we have used no other seeds but Carters', with invariably good results."—Mr. A. G. SPIKE, Cannock, May 25th, 1907.

Carters 237, 233, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' HOLBORN MODEL LEEK.

Photographed and Copyrighted by J. C. & Co.—REDUCED IN SIZE.

"I send photo of your Leeks. They have taken
TWO FIRST PRIZES,
ONE SPECIAL PRIZE,
 at Leek and District Show and at the Old Original
 Show. I may say Five First Prizes have been
 taken from one trench."

J. R., Staffs.

 so long as Carters' *Selected*
Mussburgh, of the clearest
 white colour, whilst the
 flavour is exceedingly
 delicate.

Price 6d. and 1s. per packet
 and 2s. 6d. per ounce.

HOLBORN MODEL LEEKS IN IRELAND.

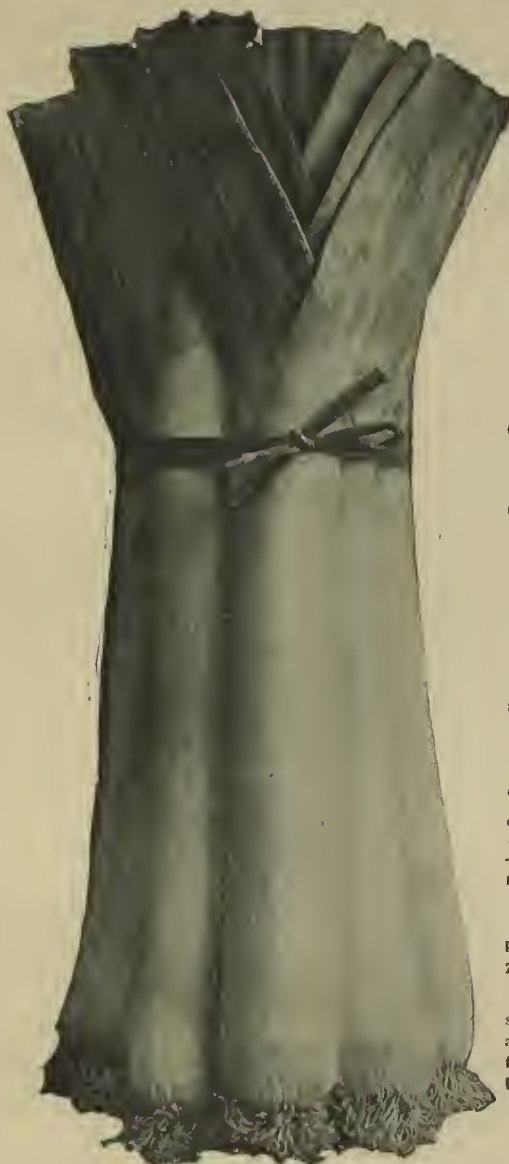

BELFAST GARDENER'S ACHIEVEMENT.—In a recent issue of the
Evening Telegraph we referred to
 a Leek measuring 3 ft. 6 in. in
 length which had been dug up at
 Bangor (Wales), and which was
 regarded as quite a monstrosity
 of its kind. We have just had
 delivered to us, however, two
 specimens of this indispensable
 domestic vegetable grown by
 Mr. A. M'Clure, gardener to
 J. J. Kirkpatrick, Esq., J.P.,
 Kinraig, Belfast, which give the
 Welsh giant an easy beating in
 point of all-round measurement.
 One of the Leeks is exactly 4 ft.,
 and the other 3 ft. 7 in. long, and
 the larger one measures 7 inches
 in circumference at the base.
 While we question if anyone could
 be found gifted with a digestive
 apparatus sufficiently strong to
 properly assimilate the specimens
 referred to, we cannot but con-
 gratulate Mr. M'Clure on having
 achieved such a notable record in
 the department of agriculture.

TWO GOLD MEDALS.

This fine Leek was exhibited in the Gold Medal
 Collection of Vegetables exhibited at the Vegetable
 Conference of the Royal Horticultural Society, and
 also in the Gold Medal Collection of Vegetables
 exhibited at the Royal Botanic Society, 1904.

LEEK.—Continued.

THE LYON LEEK.—A very popular large variety; widely grown in the North, where it takes many of the leading prizes each year.

CARTERS' SELECTED MUSSELBURGH LEEK.

for general cultivation ... 0 6 1 0

CARTERS' LONDON, or BROAD FLAG.
—Quick growing; for early use 3d. & 0 6 0 9

CARTERS' WELSH.—Fine large variety;
great advance upon Welsh ordinary 3d. & 0 6 0 9

HENRY'S PRIZE.—Late variety; of large
size; very hardy ... 0 6 1 0

The Cultivation of Leek.—Sow February to April, and transplant into trenches of well-manured soil, say 1 foot in depth, and 20 inches between the plants. In warm weather liberal dressings of liquid manure will be of service, and the plants should be afterwards carefully earthed up to blanch the stems. For exhibition, sow in January in boxes under glass, and transplant early into rich soil.

"We have had your seeds for many years and are much pleased with them."—THE REV. R. A. WATSON, Totnes, February 7th, 1907.

"I have always had good all-round crops from all seeds supplied by Messrs. James Carter & Co., and I am pleased to be able to say that the whole of the Potatoes and small seeds forwarded in 1905 turned out splendidly and especially the Peas."—MR. W. H. WILFORD, Leicester, January 11th, 1907.

"How to Grow Vegetables from Seeds," *see Carters' Practical Gardener Series, price 7d. post free.*

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

COS LETTUCE.

Photographed and Copyrighted by J. C. & Co.—MUCH REDUCED IN SIZE.

THIS FINE LETTUCE IS SELF-HEARTING, AND REQUIRES NO TYING.

Carters' Giant White Cos.—This has long been admitted to be the largest, most delicious, and best summer Cos Lettuce in cultivation; indispensable in every garden. No tying required; heads very solid and crisp eating; slow to seed.

FIFTY-ONE FIRST PRIZES REPORTED BY CUSTOMERS SINCE 1903.

Price 6d., 1s., and 1s. 6d. per packet; 2s. 6d. per ounce.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

THIRTY-FIVE FIRST
PRIZES REPORTED
SINCE 1905.

Photographed and Copyrighted by J. C. & Co.—MUCH REDUCED IN SIZE.

Carters' Jumbo Cos (see Photograph).—A distinct summer Lettuce of enormous size. During the hottest period of the year we have seen this Lettuce standing as firm as a rock, and many of the heads when fit to eat weighed from 5 to 6 lbs. each.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—"Foliage deep green; hearts immense, solid. Excellent flavour. Stood the drought well. Ready July 1st. The largest Lettuce in the collection (39 varieties)."

Our Lettuces were included in the First Prize Collection of Vegetables exhibited at the Vegetable Conference of the Royal Horticultural Society, and also in the Gold Medal Exhibit in 1904.

Price 6d., 1s., and 1s. 6d. per packet; 2s. 6d. per ounce.

Carters' Baldwin Cos.—A splendid broad-leaved, crisp-eating, pale green, self-hearting

Cos Lettuce per packet, 1s. & 6d. 2 0

Carters' Giant Bath Cos.—Most useful for early consumption 1s. & 6d. 2 0

Dunnett's Giant Winter Cos.—Very hardy and crisp; fine for end of summer sowing
... .. per packet, 1s. & 6d. 2 0

BLACK-SEEDED BATH COS.—Fine hardy winter variety 1s. & 6d. 1 6

HICKS' HARDY WINTER WHITE COS.—Splendid large variety for winter use 1s. & 6d. 2 6

KINGSHOLM COS.—Good useful sort per packet, 6d. 1 0

LONDON WHITE COS.—Tall growing and compact per packet, 6d. & 3d. 0 10

MIXED COS.—Embracing the best varieties 6d. & 3d. 0 10

PARIS GREEN COS.—Darker in growth than *Paris White* 6d. & 3d. 1 0

PARIS WHITE COS.—Fine useful summer variety, good solid white hearts 6d. & 3d. 1 0

SUGARLOAF COS.—Distinct, solid, and crisp eating 6d. & 3d. 1 0

SUPERB WHITE COS.—Fine large hearting variety, blanches well, very crisp 1s. & 6d. 2 0

WHITE COS.—Solid white hearts 6d. & 3d. 0 10

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

E

CABBAGE LETTUCE.

Photographed and Copyrighted by J. C. & Co.—REDUCED IN SIZE.

Carters' Holborn Standard (*see Photograph above*).—A Lettuce of extraordinary size and duration. It forms well-developed heads in its early stages and is one of the very last to start for seed. Its leaves are crumpled and crisp, while it is very tender and of excellent flavour, and will provide an abundance of salad during the hottest of English summers. Fourteen First Prizes reported last season.

Price 1s. and 1s. 6d. per packet.

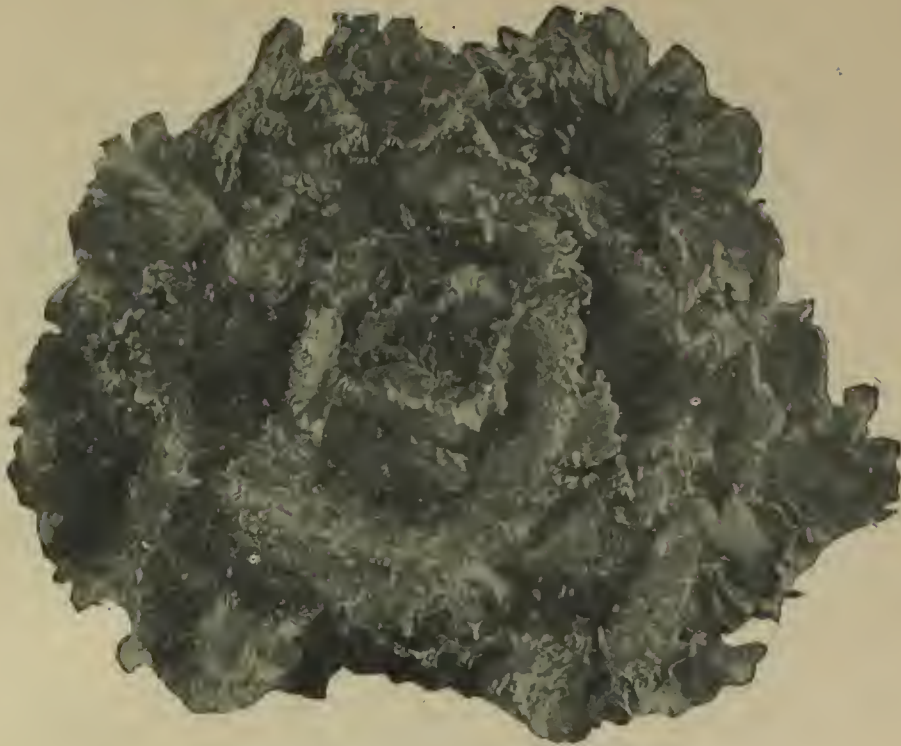

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *Holborn Standard*; hearts large, solid, crisp, good flavour, with crumpled outer leaves tinged with brown. This variety stood the drought well without running to seed."

Carters' Perpetual.—Award of Merit, Royal Horticultural Society, July 18th, 1902. This is a large handsome Cabbage Lettuce, equally suitable for forcing and for open ground. Its great attraction to us is its resistance to drought. It produces very fine heads of a lively green colour and retains its crisp and tender flavour to the last, its deeply crumpled leaves giving it great substance.

Price 6d., 1s., and 1s. 6d. per packet; 2s. 6d. per ounce.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—"Carters' *Perpetual*.—Foliage beautifully curled; a fine stock."

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.—REDUCED IN SIZE.

Carters' Harbinger Forcing.—Valuable on account of its extreme earliness. It is not a hearting variety, but being of quick growth produces a quantity of tender leaves which are so much in request for early salads.

Price 6d. and 1s. per packet; 2s. 6d. per ounce.

Carters' Longstander.—A distinct and valuable variety of great size. From its peculiar habit of growth it is less liable to decay and damage than any other cabbage variety. The colour of the leaf is pale green, and of the most delicious flavour and tenderness.

Price 6d. and 1s. per packet; 1s. 9d. per ounce.

Carters' Endive-Leaved.—This Lettuce is quite distinct. Its leaves are deeply serrated and lacinated, which gives it the appearance of Endive—indeed, a prominent gardener suggested that it might be used in early summer salads, and few could tell but that it was Endive.

Price 6d. and 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—"Leaves beautifully cut and divided; a very handsome variety."

The Cultivation of the Lettuce.—Sow in pans on a gentle heat in February, and prick out into a well-manured and warm border. Sow again during March in a protected situation out of doors for early use, and in succession to the end of August for late crops. Young and tender plants may be grown in boxes or frames, and pulled and eaten when small; in this form they make a delicate salad. Water liberally in dry and warm weather.

CABBAGE LETTUCE.—*Continued.*

Carters' Round-Leaved (*see Photograph*).—A hardy flat-shaped variety that can be sown at almost any season ; the heads are very compact and firm, solid and white ; slow to run to seed. At our trial grounds we have repeatedly seen this variety standing firm, when others have bolted.

Price 6d. and 1s. per packet ; 2s. 6d. per ounce.

Carters' Green-Fringed.—Of a very delicate and peculiar shade of green, inner parts of the leaves being white ; the edges are prettily fringed and serrated, the appearance being very striking and pleasing ; useful summer variety.

Price 6d. and 1s. per packet.

	Per oz.—s. d.		Per oz.—s. d.
Carters' All the Year Round. — This is a superb stock ; the heads being very solid, white and crisp, and slow to run to seed per pkt., 6d. and 1s.	1 6	HARDY HAMMERSMITH. —The hardiest cabbage variety ; for autumn sowing it is invaluable ; of compact habit per pkt., 3d. and 6d.	0 10
COMMODORE NUTT. —Compact and early ; hearts solid and of good flavour per pkt., 6d. and 1s.	2 0	IMPROVED DRUMHEAD. —Grows to large size ; colour light green per pkt., 3d. and 6d.	0 10
	Per packet—s. d.	MALTA, or DRUMHEAD. —Useful variety for summer salads per pkt., 3d. and 6d.	0 10
CONTINUITY. —Distinct brown-tinged variety ; useful for hot dry seasons 6d. &	1 0	MIXED CABBAGE. —Comprising all the best varieties	0 10
EARLY PARIS MARKET. —Quick growing ; for frame work is one of the best ; distinct tinted edge 6d. &	1 0	TOM THUMB. —Re-selected ; fine stock of an old favourite ; hearts compact, solid and crisp per pkt., 6d. and 1s.	1 6
GRAND ADMIRAL. —Hardy ; grows to good size ; recommended for either spring or autumn sowing per pkt., 3d. and 6d.	0 10	VICTORIA. —Large summer variety per pkt., 3d. and 6d.	0 10

THE BEST SCARLET-FLESH MELON.

Photographed and Copyrighted by J. C. & Co.—REDUCED IN SIZE.

CARTERS' BLENHEIM ORANGE MELON.

The finest flavoured and most popular scarlet-flesh Melon in cultivation.

FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY.

Carters' Blenheim Orange.—This Melon is remarkably prolific, has a grand constitution, is a very fine setter, and may be described as a perpetual bearer, ripening in a short space of time. The fruit is superbly netted, the flesh deep and solid, and a special and distinctive feature is the evenly-defined and thin rind. Twenty-five First Prizes reported by customers.

Price **1s. 6d.** and **2s. 6d.** per packet.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908

THE BEST GREEN-FLESH MELON IS CARTERS' EARL'S FAVOURITE.

AWARDED A FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY.
SIX FIRST PRIZES REPORTED LAST SEASON.

CARTERS' EARL'S FAVOURITE MELON.

The above Photograph came to us, accompanied by the following letter:—

"DEAR SIRS,

"I thought you would like to see a sample of your **Earl's Favourite Melon**. These were grown in a cool frame by myself, an amateur. I cut 42 Melons off six plants. There is little doubt this is the best green-flesh Melon grown. (Signed) "R. P. HUGHES, The Old House."

Price 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

THE BEST WHITE-FLESH MELON IS CARTERS' BRITISH QUEEN.

This grand cream-flesh Melon is a cross between *Hero of Lockinge* and *Royal Ascot*, and was awarded the First Class Certificate of the Royal Horticultural Society. Pronounced by the Committee to be the very best flavoured white-flesh Melon ever submitted. Also awarded a Gold Medal, Royal Caledonian Horticultural Society, in association with other fruit exhibited from the Royal Gardens, Windsor.

Price 1s., 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

"I have much pleasure in sending you the result of my exhibits last year. I exhibited in 11 Classes and had 10 First and Second Prizes."—MR. H. PENNY, Goring-on-Thames, January 12th, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

MELONS.—Continued.

HOLBORN FAVOURITE.

PHOTOGRAPH SHOWING HOW MELONS ARE GROWN.

Carters' Holborn Favourite.—Fruit of the largest size, roundish ovate; rind lemon colour, heavily netted; flesh, greenish-white; flavour, sweet, melting, and juicy; habit of plant, strong and vigorous; a free setter and a great bearer. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Green Gage.—A "perfect" green-flesh Melon; flavour delicious.
Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Amberwood Beauty.—A very handsome green-flesh Melon, the result of a cross between *Hero of Lockinge* and *Read's Scarlet Flesh*.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Emerald Gem.—Very prolific. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Hardy Frame.—See next page

The following sorts can also be supplied:—

	Per packet—s. d.		Per packet—s. d.
HERO OF LOCKINGE.—Pale flesh ...	6d. & 1 0	LITTLE HEATH.—Hardy, scarlet flesh	6d. & 1 0

GARDEN SEEDS.

"I have been very successful with your seeds, last year winning 32 prizes, and I also won the Champion Silver Shield at Coedybyn Llanguillo Show."—Mr. D. A. JONES, The Gardens, Waunilor, January 25th, 1907.

Carters 237, 238, 97, HIGH HOLBORN, LONDON.—1908.

MELONS.—*Continued.***CARTERS' HARDY FRAME MELON.**

It is many years since the Royal Horticultural Society awarded us their First Class Certificate for a Melon that could be easily grown without heat. In **Carters' Hardy Frame** we now offer a variety specially suitable for amateurs who do not possess the convenience necessary for cultivating the more tender Melons. The fruits are large, ribbed, and the flesh a rich scarlet colour.

"I should like to recommend your *Hardy Frame* Melon. This has been a great success; it bears profusely, sets well, and is very little trouble, and the fruits are of good size and satisfactory flavour. It should become a boon to all those growers who only have frame room at their disposal."—Mr. W. A. COOK, Head Gardener to Sir Edmund G. Loder, Bart.

The Cultivation of Melon.—Sow for first crop in January, and plant when ready into pits or on slabs filled with good maiden loam and well rotted manure, adding a dressing of fine soil to the surface and bringing the plants as near the light and glass as possible. It is essential that a regular temperature be secured rather than a high degree of heat. Keep a moist buoyant atmosphere during growth and give air freely when fruit is ripening, checking the supply of water to develop flavour. The frame varieties are sown later, and kept under glass until the season is sufficiently advanced for them to be put out on a warm heap of soil in the frame.

Everyone who has a frame is recommended to give it a trial.

Price 1s. and 1s. 6d. per packet.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

MUSHROOM SPAWN.

55

CARTERS' SPECIAL "MILLTRACK" BRAND.

Photographed and Copyrighted by J. C. & Co.

MUSHROOMS BY SIMPLE METHODS.

Preparation of Material.—This is the most essential point to be studied to ensure success. Procure fresh stable manure, which should consist of half droppings and half short litter; this must be thoroughly turned over every other day for about a fortnight. Care should be taken to obtain manure for the purpose from healthy cattle, and which has not been treated with chemical disinfectants.

For Making Outdoor Beds.—The material should be put into a heap, the measurements of which should be, when made up, 2 ft. 6 in. at bottom, 2 ft. 6 in. high, and 6 in. wide at the top, and to any length required, the whole to be firmly put together (*See Illustration*). After making the bed, put stakes down the centre by which to gauge the heat, and cover all with long litter; after three or four days pull out the stakes, and when the temperature is at about 80° the bed is ready for spawning; break the bricks of spawn into pieces about the size of a hen's egg, and put it into the bed about 8 inches apart; cover the whole with fresh fibrous loam, and beat it well, making the surface quite firm, lightly water and smooth the surface with the back of a spade, finally cover up with long litter and Russian mats to keep away light and excessive moisture.

Mushrooms may also be grown in any shed or cellar where the temperature does not fall below 45°; the best site for a bed is a hard dry floor. A moderate size bed would measure 5 ft. 6 in. × 4 ft. 6 in. × 1 ft. When made up and well pressed down, in about six weeks Mushrooms should show, and the bed should then have a light watering with tepid water about every ten days, as success depends upon maintaining an even temperature.

Another and very easy mode of providing a supply of Mushrooms in the autumn and early winter months is to insert lumps of spawn, in August, in the beds that are devoted to Cucumbers and Melons. By that time the heat of the fermenting materials has declined to the proper temperature for the spawn to "run" freely; and just when the Cucumbers, &c., are ready for removal, large quantities of Mushrooms are often seen breaking through the soil, and with protection in the form of hay coverings, the supply is continued for a long time. The spawn should be inserted rather deeply—4 or 5 inches.

+ Carters' Mammoth Salsafy (or Vegetable Oyster)	1 3
+ Carters' Improved Scorzonera	1 0

These vegetables are much liked by some who interest themselves in the culture of things not found in every garden.

Cultivation.—The ground should be well trenched and manured during Autumn. Sow during March and April in drills about 15 inches apart. Thin out the plants to from six to eight inches apart for Salsafy but allow rather more room for Scorzonera. The roots should be taken up in November and stored in the same manner as Carrots.

UNSOLICITED TESTIMONY FROM CUSTOMERS.

GARDEN SEEDS.

"I must tell you that the last two seasons I have taken over 100 Prizes, and the greater part of them with produce grown from your seeds."—J. CHERRINGTON, Esq., Cherrington Green, Salop, *Feb. 26th, 1907.*

"I took eighteen Prizes from the produce of your seeds at the North Warwickshire last year."—Mr. T. MASON, Curdworth, *February 6th, 1907.*

"I take this opportunity of informing you that all the seeds without exception I have had from you have done excellently well, in spite of a very trying season last year, and have given us satisfaction."—R. G. WINTER, Esq., Samton, *February 2nd, 1907.*

"I have had my seeds from you for years, and grown them both at home and in the Colonies, and always found them good."—Mrs. HATCH, Cowley Place, *February 5th, 1907.*

"Your seed turned out better than any other firms I have tried. I was also very successful in the Autumn Show, taking two First Prizes, two Seconds, and one Third."—Mr. H. MARDEN, Sunnyside, *January 31st, 1907.*

Carters 237, 238, & 97, HIGH HOLBORN, LONDON—1908

Photographed and Copyrighted by J. C. & Co.

NEW AND STANDARD VARIETIES FOR SPRING SOWING.

CARTERS' HOLBORN (*see Photograph*).—Equally valuable for exhibition and for table purposes. Perfect in shape, it grows to a large size, and is distinct in colour of skin from other Globe varieties. It is a capital keeper, and the delicate flavour nearly approaches that of the imported Spanish Onions sold by grocers and fruiterers. May also be sown in the autumn.

Price 1s. and 6d. per packet ; 2s. per ounce.

NEW

Carters' Early Wonder.—A small globe Onion, maturing with great rapidity, thus leaving the ground vacant very early for the next crop ; its keeping qualities are also remarkable.

Price 1s. per packet.

Carters' Tennis Ball.—This magnificent Onion is specially adapted for early sowing ; the flavour is mild and delicate, and as an exhibition variety in summer it is invaluable.

Price 1s. and 6d. per packet ; 2s. per ounce.

Carters' Pearl Pickler.—This is the genuine miniature Onion that is preserved in white vinegar, and found on the tables at the leading hotels.

Price 1s. and 6d. per packet ; 2s. per ounce.

Carters' Long Keeper.—Will remain sound the year round if properly kept.

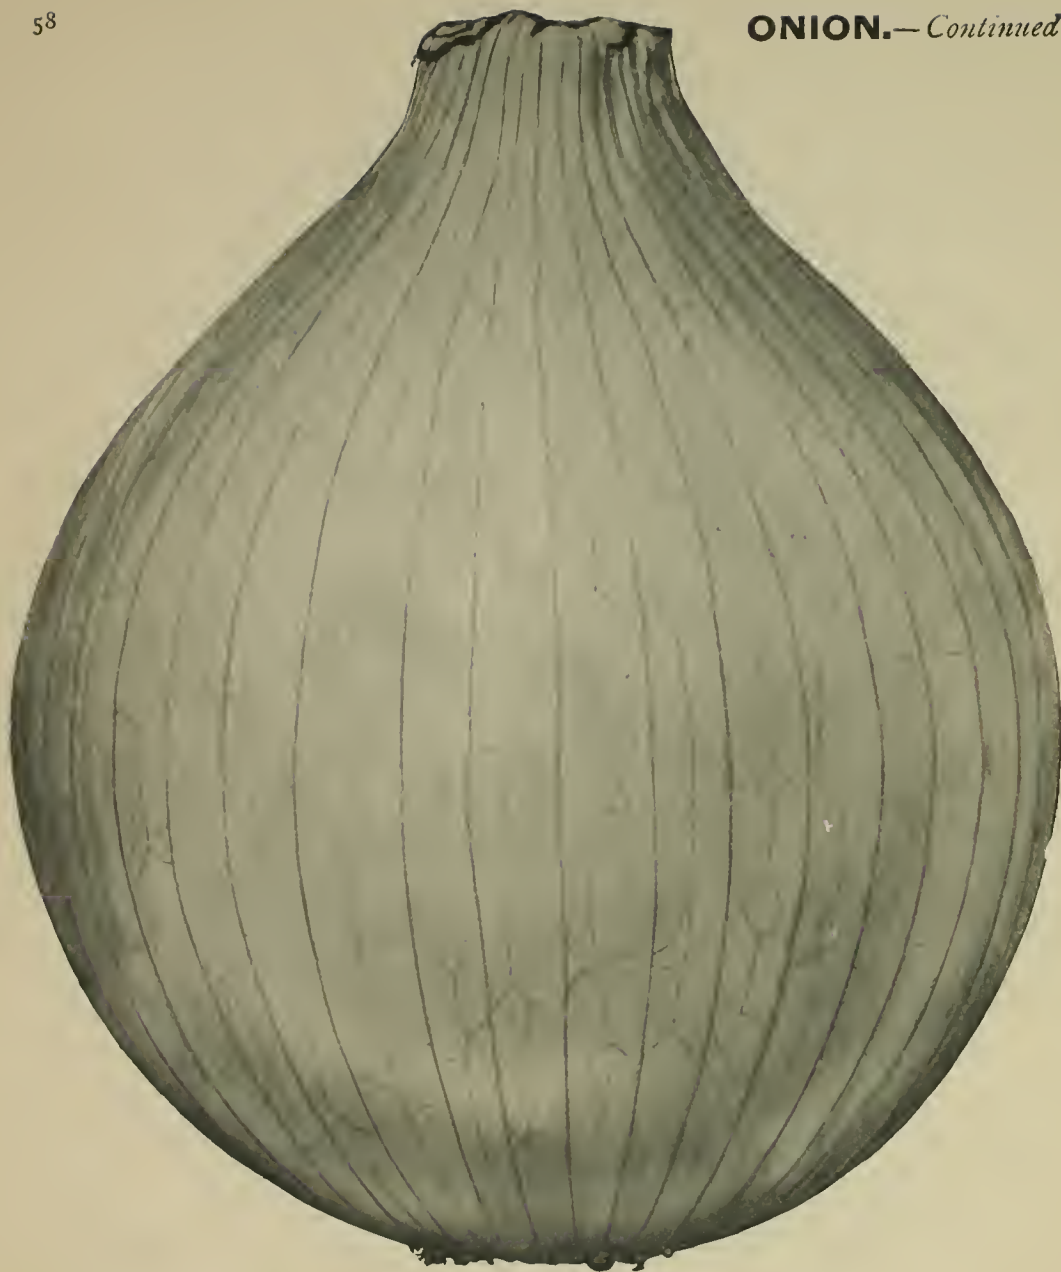

"I am sending some examples of your Long-keeping Onion, grown in 1900, and it is now October 5th, 1901. Gardeners about here hardly believe it."—J. L., Blackheath.

Price 1s. and 6d. per packet ; 2s. per ounce.

Carters' Silver Ball.—A pretty, medium-sized white globe Onion of fine texture and mild flavour. It makes a nice contrast on the exhibition table.

Price 1s. and 6d. per packet ; 2s. per ounce.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908

Photographed and Copyrighted by J. C. & Co.

CARTERS' SELECTED AILSA CRAIG (*see Photograph above*).—We offer a very fine strain of this popular Onion, which, on account of its enormous size, is in great demand amongst exhibitors of vegetables. It is a good keeper, and to those who like an Onion raw we recommend it on account of its acceptable pungent flavour. Suitable for autumn or spring sowing. Sixty-nine First Prizes reported since 1905.

In sealed packets, price **1s. 6d.** and **2s. 6d.** per large packet.

A Customer writes :—

"The dozen *Ailsa Craig* Onions I exhibited at the Vale of Glamorgan Show weighed 31½ pounds,"

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Our Photograph shows the dozen grand bulbs included in the First Prize Collection of Vegetables, Shrewsbury, 1905.

Carters' Record Onion increases in favour each season, and is already exceedingly popular. It can be sown either in the autumn or spring; but if large bulbs are desired, autumn sowing is recommended. It will be remembered that a specimen, illustrated in the *Gardening World*, turned the scale at 4½ lbs.; this was probably the heaviest Onion ever grown.

We regret we cannot find room in this Catalogue for the large number of letters which reach us every season regarding successes with this grand Onion. Here are two that have come to hand recently:—

"In 1905 I got one packet of *Record Onion*, of which every seed germinated, and I had two splendid beds of Onions which were the admiration of everybody."—DR. DE COURCY WILLIAMS, Green Hills, January 9th, 1907.

"I must say that I am very pleased with your seeds, especially *Record Onion*, which with me is simply grand."—F. W. KING, Esq., Malvern.

Price 6d., 1s., 1s. 6d., and 2s. 6d. per packet; 3s. 6d. per ounce.

We hold records of 238 First Prizes having been gained by Customers.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908

The Cultivation of Onion.—The ground cannot well be too rich for this crop, nor the soil in too fine a condition. February and March are the chief seasons for sowing. The soil must be made firm before the operation is undertaken in either beds or drills. The seed should be sown thinly and covered lightly, the drills 12 inches apart, and the young Onions thinned out to about 6 inches apart, according to the variety. In very dry weather a good watering is very beneficial. Growers of Onions for exhibition generally transplant, and this is also a sure means of checking the onion grub, so troublesome in some districts. Some of the larger growing varieties are generally sown in autumn and transplanted in spring, when under fair conditions enormous exhibition specimens are obtained.

"I had two splendid beds of *Record* and *Ailsa Craig* Onions sown last August."—E. W. SECRETAN, Esq., Stoke Hill, *January 7th*, 1907.

"From the two packets of Onion seed (*White Spanish* and *Bedfordshire Champion*) we got over a ton of Onions."—MR. R. MARSHALL, Spalding, *November 6th*, 1906.

"The produce from your seeds was excellent at the Annual Show at Knebworth. I swept the board, and won a Challenge Shield beside money prizes."—MR. FRANK WELLAND, 1, Harold Villas, Knebworth, *September 13th*, 1907.

Ailsa Craig Onion.—"Those I had last year turned out very fine and wonderfully true."—MR. A. McDONALD, Newbattle Gardens, *January 23rd*, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

ONIONS FOR SPRING OR AUTUMN SOWING.

THESE VARIETIES, IF SOWN IN SPRING, WILL PRODUCE A GOOD CROP, BUT THE ONIONS WILL NOT BE SO LARGE AS IF SOWN IN THE AUTUMN AND TRANSPLANTED.

Carters' Autumn Giant.—A very large white-skinned Onion, mild and agreeable flavour.

Price 6d. and 1s. per packet; 1s. 6d. per ounce.

Carters' Golden Globe Tripoli.—A large variety, similar in size to the *Giant Rocca*. The skin is of a transparent golden-straw colour, and it will be found invaluable in exhibition collections.

Price 6d. and 1s. per packet; 1s. 6d. per ounce.

Carters' Record.—The Champion Exhibition Onion. See *Photograph*, page 59.

Carters' Selected Ailsa Craig.—See *Photograph*, page 58.

Carters' Giant White Tripoli.—Especially suitable for culinary purposes and exhibition, a rather tender Onion on heavy soils; ripens very early,
Per oz.—s. d.
per packet 6d. & 1s. 1 6

Giant Rocca.—A fine large Onion. The original variety ... „ 3d. & 6d. 1 0

Carters' White Emperor.—Unquestionably the finest form of flat Onion in cultivation, with silvery-white skin and flesh of a most agreeable mild flavour.

Price 6d. and 1s. per packet; 1s. 6d. per ounce.

THE FOLLOWING AUTUMN-SOWING VARIETIES CAN ALSO BE SUPPLIED:—

	Per oz.—s. d.		Per oz.—s. d.

GIANT LEMON ROCCA, 6d. and 1s. per packet; 1s. 6d. per ounce.

“Having had such excellent results from your seeds, I feel bound to let you know how pleased I am. I have used only yours this year and am delighted with my crops. They have been the finest I have ever had. Your selected *Ailsa Craig* Onion in particular has been a great success. From the seed sown in spring quite a number of the Onion are 17 inches in circumference; several of my friends say they have not seen such before.”—Mr. S. PENNINGTON, Gardener to J. Rowland Esq., Homefield, Phipps Bridge, Merton, September 22nd, 1907.

“I may say that I had some very good produce from your seeds last year. The Onions were very fine, six of which turned the scale at 14½ lbs., the largest was 2¾ lbs. and I have some as I write over 2 lbs., and as sound as on the day they were lifted.”—Mr. W. TAPLISS, Newhall, January 10th, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1903.

Photographed and Copyrighted by J. C. & Co.

CARTERS' CRESTED BOUQUET PARSLEY.

A DISTINCT SUPERB PARSLEY.

Carters' Crested Bouquet (*see Photograph*).—A Parsley of very attractive appearance, both in the garden and on the table; of very dwarf compact growth, all its strength being thrown into the exquisite curls of its leaves, giving it a pretty crested appearance; without doubt the most perfect variety in cultivation.

Price 1s. and 1s. 6d. per packet.

THE ROYAL HORTICULTURAL SOCIETY'S report of last season's trial at Wisley reads:—"Carters' Crested Bouquet Parsley. A beautifully deep curled variety of sturdy, compact habit."

Carters' Fern-Leaved Parsley.—Exquisitely perfect in form and colour; quite fern-like, and highly ornamental; for garnishing purposes it is ideal.

Price 6d. and 1s. per packet; 1s. 6d. per ounce.

The Cultivation of Parsley.—Sow the seeds thinly in beds any time from February until the end of June. In dry seasons it is an advantage to water the beds, as the seeds will sometimes lie a long while dormant.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

+ **Carters' Perpetual.**—A distinct and valuable curled variety that does not annually run to seed. It has stood with us upon the same land *for four years before seeding*.

Price 6d. and 1s. per packet; 1s. 6d. per ounce.

		Per oz.—s. d.

DOUBLE CURLED.—Useful for cottage gardens per packet 3d.	0 6

"I consider your Pea, **Quite Content**, one of the largest and finest flavoured Peas in existence, and I believe it will take first place for many years to come. Some of the pods measured 6½ to 7 inches, and contained from 9 to 12 good peas."—T. A. MCNEARY, Esq., Garvagh, *March 1st, 1907*.

"You will be glad to hear that I took **First Prize** in open competition with your **Quite Content Peas** at the Wolvercote and Summertown Show held yesterday. They are simply grand, some pods have 11 and 12 peas in."—W. G. ARCHER, Esq., Oxford, *August 17th, 1907*.

"I took **First Prize for your Quite Content Pea** at the Abergavenny Show on August 5th. It is the best Pea that I have seen."—Mr. CHAS. JAMES, Llanvihangel, Gobion, *August 15th, 1907*.

For full particulars of our selection of Peas for successional crops from June to November, *see page 66*.

CARTERS' MALTESE PARSNIP.

A SUPERB GIANT PARSNIP.

Carters' Maltese (*see Photograph*). — The largest variety for exhibition or table. WE HOLD RECORDS OF 161 FIRST PRIZES HAVING BEEN TAKEN FROM 1902 TO 1907.

Price 3d. and 6d. per packet; 9d. per oz.

Per packet—s. d.

CARTERS' LONG PARSNIP.—Fine variety, of splendid flavour ... 3d. & 0 6

HOLLOW CROWN.—An old favourite 3d. & 0 6

IMPROVED JERSEY MARROW.—Selected stock, good medium size ... 3d. & 0 6

+ THE STUDENT.—Extremely delicate flavour. 3d. & 0 6

The 6d. packets of above are about 1 oz. each.

The Cultivation of Parsnip.—Sow the seed early in March as soon as the season will permit. The ground should be well manured and deeply trenched; the drills about 15 inches apart, and the plants thinned out the same distance apart.

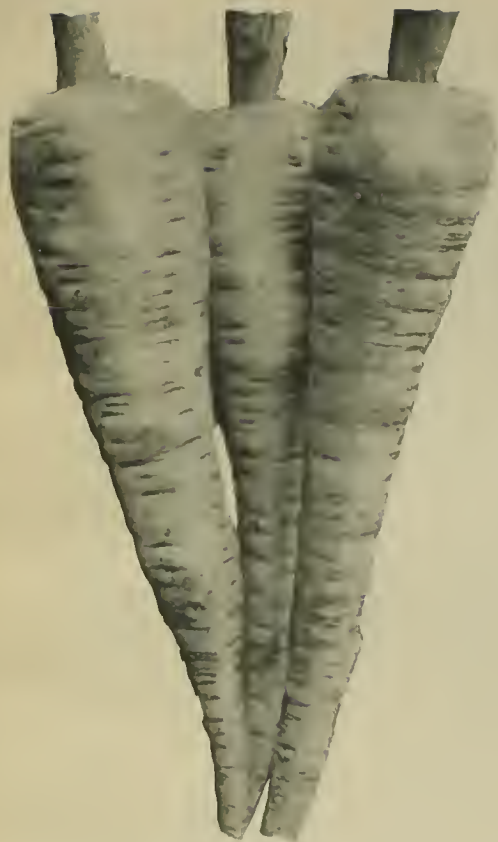

"Your *Maltese* Parsnips turned out splendid, good flavour and good straight roots."—A. S., Hendon.

"I am pleased to say all your seeds have given me complete satisfaction, especially your Runner Bean *Scarlet Emperor*. I have abundance of them a foot in length. Also, I was able in this bad season to pick ripe Tomatoes in July, as I did last year from Carters' *Sunrise*."—Mr. T. LINDSAY, Gardener to Mrs. Chapman, The Grange, Shillingstone, September 4th, 1907.

"I took First Prizes last year with your *Ailsa Craig* Onion, *Maltese* Parsnip, and *Perfection* Carrot."—Mr. W. J. TAYLOR, Burton St. David, January 22nd, 1907.

Photographed and Copyrighted by J. C. & Co.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

CARTERS' HOLBORN MARROW PARSNIP.

CARTERS' HOLBORN MARROW PARSNIP.

A SWEET DELICATE-FLESHED VARIETY.

Carters' Holborn Marrow (*see Photograph*).—A truly refined Parsnip. When lifted it leaves the ground clean, smooth, and well shaped. It is not so large in growth as our *Maltese*, but its flavour is unusually marrow-like and delicate. Our picture very inadequately depicts its merits.

Price 6d. & 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—
“Roots thick, handsome, and not too large, but just the size and shape a Parsnip should be.”

“The *Holborn Marrow* Parsnip is the most delicious I ever tasted, and it deserves all you say about it.”—J. FREEMAN, Esq., Chard, *February 26th*, 1907.

“Please send me your **Guinea Collection of Vegetable Seeds**, same as last year, which were very satisfactory.”—A. B. LEIGH, Esq., Bexley, *January 22nd*, 1907.

“Please send an Exhibitor's Box of Vegetable Seeds. I was very pleased with the result of last year's box.”—E. P. COLLETT, Esq., Hale, *January 11th*, 1907.

“Last year I took **First Prize** for a collection of Vegetables; **Second**, Carrots; **Third**, Turnips; **First** for Mammoth Beefheart Cabbage, and **Second** for Scarlet Runner Beans.”
—Mr. F. DAKIN, Sutton Bridge, *March 7th*, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

The above Photograph shows part of the largest collection of Culinary Peas ever staged (250 varieties). Exhibited at Royal Horticultural Society's Hall, Westminster, on July 24th, 1907, and awarded Silver Gilt Knightian Medal.

GREEN MARROWFAT PEAS.

FOR SUCCESSIONAL USE FROM JUNE TO NOVEMBER.

We have offered a general selection of choice Garden Peas with so much success that we again quote the group as improved and representing the best collection calculated to produce Peas for five months, under fair conditions, if sown at varying periods, during the spring and summer. It would be difficult to give precise dates for putting the seed into the ground, as so much depends upon soil and situation.

Successional sowings of these Peas may be made at any time between the dates named.

CARTERS' EIGHT WEEKS.

67

The earliest
Border Pea in
the World.

**FOR FORCING
or
Border Work.**

Photographed and Copyrighted by J. C. & Co.

Carters' Eight Weeks proved again to be the earliest Pea of all, in our Trial Grounds last year.

CARTERS' EIGHT WEEKS.—The Earliest Pea we have ever grown. A very hardy Marrowfat, growing 15 inches high, and possessing all the good points of the best type of *American Wonder*, which was one of its parents. As both a forcing and early border variety it must become a boon to gardeners whose demands are heavy early in the season. The seed is slightly dented, and of the same colour as its other parent, *William the First*. The pods are freely produced, and well filled with sweet-tasting peas. It is a splendid forcer, and we regret our stock is so limited.

Price 2s. per pint, 6d. and 1s. per packet.

Carters' Forcing Pea.—A valuable Marrowfat Pea for under-glass culture. Its stocky growth is rarely more than 1 foot in height. It commends itself not only to professional gardeners who are required to produce Peas nearly the year round, but also to amateurs having a greenhouse or vinery doing practically nothing through the winter months, and who can, with this sturdy Pea, raise supplies for their table very early in the year.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

NEW

CARTERS' "GIANT" LIGHTNING and CARTERS' "GIANT" BLUE EXPRESS PEAS.

It is now many years since our House first introduced Carters' *Lightning* (white round) and Carters' *Express* (blue round), two Peas which soon became popular as the earliest of the white and blue round section.

We now have much pleasure in introducing (after several years' patient labour) the above magnificent Peas, "*Giant Lightning*" and "*Giant Express*." There is no doubt that these types will speedily displace the smaller podded varieties, as in addition to the increased size of pod the haulm is stronger, the cropping properties are much heavier, and the flavour is superior to the older varieties.

In large establishments where Peas are required very early these grand "*Giant*" introductions will be much appreciated, as it is well known that the round Peas are hardier and generally can be sown earlier than the wrinkled marrowfat varieties.

Carters' "Giant" Lightning (*see Photograph*).—The new large-podded early white round Pea. Height, 2½ to 3 feet. Per packet, 1s. Stock very limited.

Carters' "Giant" Express (identical in size with "*Giant Lightning*." *See Photograph above*).—The new large-podded early blue round Pea. Height, 2½ to 3 feet. Per packet, 1s. Stock very limited,

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

NEW

The most wonderful First Early Pea of the Season.

CARTERS' ADVANCEMENT.

(Daisy × American Wonder.)

For many years past we have been crossing and selecting peas at our experimental grounds with the idea of producing a variety with pods as large as our well-known *Daisy* and as early as *American Wonder* or *William Hurst*, and we have now great pleasure in bringing to our customers' notice this really grand introduction, marking as it undoubtedly does the most notable advance of recent years in the early dwarf section.

The photograph was taken of comparative sizes as grown in our experimental grounds, 1907; the superiority in size is strikingly apparent, and when the robust habit and podding qualities of both parents are fully borne out it will be at once recognised that our claim as to advancement is fully justified.

Visitors to our Trial Grounds for the past three or four seasons have been much struck with this pea, which has been under Seedling No. 201. The Haulm is about 18 inches.

Price per packet, 1s. Stock very limited.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

CARTERS' EARLY MORN PEA.

A superb First Early Giant Marrowfat.

For full particulars, see opposite page.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Carters' Early Morn Pea (*see Photograph opposite*).—This grand introduction maintains its position as one of the best early Marrowfat Peas ever raised. Although so early the seed should not be sown until the soil is in a fit state to receive it in April, as it is a rapid grower. The pods are very large and well filled, and are often ready to pick during June. Height, about 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

UNSOLICITED TESTIMONIALS.

J. G. CROSSMAN, Esq., St. Cuthberts, writes:—"I have the best lot of *Early Morn* Peas I think that I ever saw, from your seeds this year."

Mr. ADDISON, The Gardens, Woodbine, writes:—"I must say your seeds came up remarkably well. I had a fine lot of *Early Morn* Peas, which were the admiration of everyone."

Dr. E. J. CRAWSHAW, Tregunter, writes:—"Your *Early Morn* Peas are beyond all praise; we have never tasted anything like them or seen such well-filled pods."

Mr. PREWETT, The Gardens, St. Michael's Mount, writes:—"I would like to say that your *Early Morn* Peas have produced a most wonderful crop of delicious flavoured Peas."

"In reference to one kind of Pea, namely Carters' *Early Morn*, it is the most profitable Pea and excellent flavour I have ever grown; in fact, your seeds on the whole are the best I have ever grown."—Mr. WILLIAM DOUBLE, St. Ives, Hunts.

Carters' Blue Express.—A re-selected stock of an early round-seeded and a very productive bearer, the pods well filled with fine flavoured Peas, of a distinct colour when boiled. Height, $2\frac{1}{2}$ feet.

Price 1s. 9d. per pint, 3s. per quart.

Carters' Daylight.—A fine Marrowfat, as early as *Lightning*, with exhibition pods. Height, $2\frac{1}{2}$ feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Lightning.—A re-selected stock of the earliest white round-seeded Pea. Height, about $2\frac{1}{2}$ feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet

Carters' Diamond.—An extra early *White Wrinkled Gem*, as early as *William Hurst*, with larger pods, and very prolific. A grand Pea for border work. Height, 1 foot.

Price 1s. 9d. per pint, 3s. per quart.

Carters' Dwarf Favourite.—For gardens where space is an object this is the Pea to grow. It has rich deep-green pods well filled with delicious Marrowfat Peas. Very prolific. Height, $1\frac{1}{2}$ foot.

Price 1s. 9d. per pint, 3s. per quart.

Carters' Superior.—A highly-selected early blue-seeded Pea, with large pods. Closely follows *Blue Express*. An excellent Pea for market work. Height, 4 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters' Springtide.—A first early Marrow, as early as *Lightning*, with dark green well-filled pods. Height, $2\frac{1}{2}$ to 3 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

NOTICE.—For our Special Collection of Peas for succession, *see page 66*.

*A Grand First Early
Dwarf,
exceedingly prolific.*

NEW MARROWFAT PEA.*

CARTERS' MAYFLOWER.

A superb Dwarf First Early Marrowfat Pea.

For full particulars, see opposite page.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' MAYFLOWER.—A new and prolific first early Marrowfat Pea.

A cross between *Daisy* and *William Hurst*. This is a grand thing, with long pointed pods twice the size of *William Hurst* and much more freely produced. The bine is robust, possessing the same healthy character as its most famous parent the *Daisy*. Seed wrinkled. Height, 18 inches. Everyone should try this fine introduction, which is but very inadequately shown in the photograph.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

CARTERS' LITTLE MARVEL PEA.

† A first early green wrinkled Marrow. Height, 18 inches. An improvement upon the *English Wonder* class. A grand cropper; strongly recommended.

Price 1s. 6d. per pint, 2s. 6d. per quart.

"This year our earliest Pea in the open ground was Carters' *Little Marvel*, which is quite a fortnight earlier than any of the first earlies. I should add that all sorts were grown at the start in $4\frac{1}{2}$ -inch pots in cold frames. The seed was sown in December, and the seedlings planted out the first week in March on warm borders. We gathered *Little Marvel* on June 8th, and had the weather been favourable there would have been good pods at the end of May, but the severe frost early in that month actually killed the first flowers. This variety is a great gain in every way when forced, as when fit for use, in spite of its maturing so quickly, it is a fair-sized pod and well packed with peas. There are five to seven on an average in each pod, and, unlike some of the older early Peas, it is of good flavour. The plant crops enormously, and this so early in the season is worth noting. The *Little Marvel* was raised from the older but well-known *William Hurst* and that fine table Pea *Daisy*, the latter being noted for quality and as a valuable second early Pea. *Marvel* differs from both in this respect; the pods are rounder than those of *Daisy*, and larger than *William Hurst*. It should also make a profitable market variety, as it is only 18 inches high, robust, and crops freely. The seed, which was sown late in February in the open, produced plants that bore only a few days later than that grown as described above, but this is readily accounted for by the first blossom escaping injury by frost, being a little later from seed sown February 24th. We gathered pods on June 16th and freely on June 18th, and the plant is covered to the base. For gardens limited in size the above variety should become a great favourite."—G. WYTHES, in *The Garden*, July 14th, 1906.

	Per quart—s.	d.

CARTERS' DAISY PEA.

The finest Second Early Marrowfat.

For full particulars, see opposite page.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

+ **CARTERS' DAISY PEA** (*see Photograph on opposite page*).—**First Class Certificate, Royal Horticultural Society.**—This grand dwarf Marrowfat Pea has been before the public for some years, and still stands at the head, as confirmed by the great independent trial of Peas conducted by the Royal Horticultural Society of England in 1902. Their experiment comprised over 80 varieties, and CARTERS' DAISY gained the First Class Certificate given by the Society. CARTERS' DAISY PEA is an early main crop, growing about 15 inches high. The haulm is very robust, and the crop of giant, well-filled pods of good colour is enormous.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Mr. J. MAYNE, of Bicton Gardens, Devonshire, in the *Gardeners' Chronicle* writes:—"CARTERS' DAISY PEA.—So many satisfactory accounts have been given in these pages of this variety of Pea that it may seem superfluous again to write its praise, but having grown it for several seasons I can confidently recommend it as one of the best second early dwarf varieties at the present time. It is of robust growth, reaching nearly 3 feet in height last year, but in ordinary summers the plants do not get much above 2 feet, and are literally crowded with fine pods nearly 6 inches long, each containing from 8 to 10 fine Peas of excellent flavour. I have been much impressed by the length of time the pods will hang without getting dry, having saved the crop for seed. The pods are usually borne in pairs, and the raisers are certainly to be congratulated upon giving us such a good Pea. I advise those who have not yet grown this Pea to procure a quart of seeds from the raisers and sow as soon as the state of the soil will allow, and I will vouch for it they will not be disappointed."

Carters' Edward VII.—In the trials of the Royal Horticultural Society we were granted an Award of Merit for this superb early Marrow Pea. It is a first-class representative of the forward section of Marrowfats, but has *Ne Plus Ultra* shaped pods of a beautiful lustrous green, filled with fine, large, sweet-eating Peas. Height, 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

TRADE MARK
REGISTERED.

Carters' King of the Earlies.—This early Pea is a cross between our well-known *Daisy* and another first early sweet Marrowfat, and was raised at the Royal Gardens, Windsor. It produces a robust haulm from 15 to 18 inches in length, covered with giant pods.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Pride of the Market.—A fine main crop blue Marrowfat Pea, belonging to the same family from which our *Stratagem* was selected. Being a strong grower it requires to be thinly sown. Height, 1½ to 2 feet.

Price 1s. 3d. per pint, 2s. per quart.

Carters' Seedling.—A superior main crop Marrow Pea, the result of two distinct crossings, its parents being the well-known and valuable Peas, *Stratagem*, *Queen*, and *Autocrat*. Height, 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Majestic.—A splendid mid-season Marrowfat Pea, valuable alike for the table and exhibition. Height, 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Torpedo.—This grand Marrow Pea supplies the long-felt want of a first-class table Pea that will come into bearing between Carters' *Early Morn* and the original *Duke of Albany*, which it imitates in all its best characteristics, but is 12 inches shorter in the haulm and seven days earlier in maturing. The pods, which are dark green, are borne upon strong branching foliage, and contain from 8 to 10 enormous Peas, very sweet when cooked. Height, 3½ to 4 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

"Some time ago I obtained from you the *Quite Content* Pea, which I may say is all that you claim it to be, and I think you do not even praise the same enough."—CYRIL LEE, Esq., Selby, August 15th, 1907.

NOTICE.—For our Special Collection of Peas for succession, see page 66.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908

Very hardy and
prolific,
of Daisy type.

CARTERS'
BUTTERCUP.

A fine robust Main Crop
Marrowfat Pea.

Photographed and
Copyrighted by J. C. & Co.

For full particulars, see page 77.

CARTERS' BUTTERCUP PEA (*see Photograph opposite*).—Best described as a hardy type of *Daisy Pea*. A very fine and robust main crop Pea, with long, handsome, well-filled pods. Height, about 2 feet. Pods rich green, produced in pairs, averaging 10 peas in each. We have counted as many as 22 pods on a single plant ready to gather at one time. May be described as a nearly main crop, with particularly robust habit. The large, deep green seed, which is almost round, retains the sweet Marrowfat flavour when cooked. Peas having seed of this character are well adapted for cold, wet, and exposed situations.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

From the *Gardeners' Magazine*.

"Carters' *Buttercup*, a type of *Daisy* Pea, but a week or more earlier, is a very fine, robust form of Pea, bears freely pods of great length and size in pairs; the pods are of a beautiful green, and the Peas are very rich. It has grown well this season, and very strong. Another variety which need not have sticks; the better if short sticks were used, as the foliage and pods are so heavy they ought to be kept off the ground."

From the *Gardeners' Chronicle*.

"Carter's *Buttercup* is a grand cropper of dwarf habit. I think I never saw so fruitful a dwarf Pea, the rows being quite a picture. The quality is good, and the pods large and well filled. For a garden where dwarf Peas are most appreciated no variety could be more profitably grown as a second early."

f

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *Danby Stratagem*, F.C.C., July 7th, 1882. *Stratagem* is too well known to need any description. It produced its usual heavy crop."

For general hints on the cultivation of Peas, see page 79.

FRENCH PEAS.

Carters' Delicatesse (*Petit Pois*).—This Pea has gained a great renown among the continental connoisseurs, who regard it as a delicacy. It is a second early wrinkled, with haulm about 3 feet; very prolific; long curved pods hanging in pairs.

Price 1s. 3d. per pint, 2s. per quart.

Carters' Giant Edible Podded.—Our friends on the Continent have assiduously developed the Edible Podded Pea section, and have thus obtained a delicious vegetable not sufficiently well known in this country. The variety we now offer grows about 5 feet high, with very broad fleshy pods.

Price 1s. 9d. per pint, 3s. per quart.

NOTICE.—For our Special Collection of Peas for succession, see page 66.

Photographed and Copyrighted by J. C. & Co.

CARTERS' DANBY STRATAGEM.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

POPULAR MAIN CROP MARROWFAT PEAS.

Carters' Model Telephone.

A re-selection for robustness and delicacy of flavour from *Telephone*, a main crop wrinkled marrow, which bears to-day a world-wide reputation. No other Pea can claim equal honours with the best strains of Carters' *Telephone* on the exhibition table. Peas wrinkled, 9 to 11 in a pod, delicious when cooked. Height, 5 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Daffodil Pea.

A dwarf and very prolific Marrowfat Pea with the highest possible commendations, being of the rich deep colour of the *Stratagem* type, and a decided improvement upon *British Wonder* and the new types of *English Wonder*. It is a first early of bushy habit, and about 18 inches, obviating the necessity for sticks, and rendering it serviceable for borders. Its pods are larger than any of the well-known Peas of the early dwarf class referred to above, while the quality and flavour of the pea is delicious.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Dwarf Telephone.

The result of several years' work in the effort to get a Pea with all the excellent qualities of Carters' *Telephone*, without its tall growth. Its height is 1½ to 2 feet; habit stocky, healthy, and vigorous, and remarkably uniform.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Battleship.

The blunt-ended pod of this robust Marrowfat Pea is one of its peculiarities. The fine dark green pods, which hang in pairs, clearly imitate in size that grand Pea *Telephone*, introduced by our House many years ago. The haulm is exceedingly strong, and stands both drought and mildew better than others. The peas are rich flavoured and a bright green when served at table. Height, 5 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *Battleship*. Height, 5 feet. Haulm and pods pale green; pods in pairs; heavy crop."

WE WERE AWARDED THE SILVER CUP

By the Royal Horticultural Society for a marvellous collection of Peas, comprising 206 varieties, July, 1906.

Hints on Cultivation.—Early round Peas may be sown out of doors any time from November onwards, but the spring is generally the season when the largest quantities of both Early and Main Crop Marrow Peas are put in, extending to June for the latest crops. They thrive best in ground that has been deeply trenched and manured for a previous crop; the seeds should be planted from 1½ to 3 inches deep, in either single or double rows, and the taller varieties must be staked when they are from 4 to 6 inches high; the tallest kinds should not be less than 6 feet apart in rows, and the dwarf varieties half this distance. Peas will stand a good deal of drought if the roots find their way into some nice rich material. (For full particulars see CARTERS' PRACTICAL GARDENER, Vegetable Section, price 6d. enclosed with goods, or 7d. post free.)

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co
CARTERS' COMMONWEALTH PEA

A main crop Marrowfat (see opposite page).

POPULAR MAIN CROP MARROWFAT PEAS.

Carters' Commonwealth.

See Photograph on opposite page.

A grand selection from one of the latest types of Carters' *Stratagem*, differing in several ways, notably the shape of pod, from Carters' *Danby Stratagem*. It is a strong grower, and a prolific bearer of large exhibition pods, besides being a first-class table pea. It is also a good dry-weather pea. Strongly recommended. Height, 2 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *Commonwealth*. Height, 2½ feet. Haulm and pods pale green; pods in pairs averaging seven large sweet peas in a pod."

Carters' Model Telegraph.

A selection from our original *Telegraph*, which is well known. Very valuable as an exhibition Pea, on account of the size and fine dark colour of the pods. The seed is round and of a deep green colour, which is retained when cooked. The flavour is also of the sweetest. Height, 5 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Anticipation.

Anticipation grows to a height of about 2½ feet, and sown at the usual season it comes into bearing early in July. The foliage is of a medium shade of colour, the habit robust, with immense straight pods containing Peas of an exquisite flavour when cooked. A grand dry-weather Pea and resister of mildew.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

"I am sending you three pods of *Quite Content* Pea. The longest measures fully 7½ inches in length, the other two being 7 inches, and as they were grown on light sandy soil I consider them marvellous. Undoubtedly *Quite Content* is the largest podded Pea in existence, and it has far exceeded my expectations."—Mr. T. J. MOORE, The Gardens, Hatfield House, August 1st, 1907.

We were awarded the First Prize at the Royal Horticultural Society's Show, for Peas in 1905 and 1906.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' "QUITE CONTENT" MARROWFAT PEA.

A GIANT-PODDED MAIN CROP. (See Coloured Plate.)

Awarded the FIRST CLASS CERTIFICATE of the ROYAL HORTICULTURAL SOCIETY, 1906.

Pods longer than any other Pea in cultivation.

This grand Pea, which has caused such a stir in the Horticultural world during the past season, is the outcome of a cross between *Alderman* and *Edwin Beckett*. In general character it resembles the former, but the pods are considerably larger than either parent. In our own trials it has amply demonstrated its wonderful superiority, and when exhibited in the open class at Shrewsbury, 1906, it EASILY SECURED THE FIRST PRIZE, and was pronounced by leading experts to be without doubt the finest Pea ever seen. It is exceedingly prolific, and the pods hang mostly in pairs. Height, 5 to 6 feet.

SOME HONOURS, FIRST PRIZES, AND REPORTS, IN SEASONS 1906 AND 1907.

FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY, 1906.

FIRST PRIZE, GREAT SHREWSBURY EXHIBITION, 1906.

FIRST PRIZES—

His Grace The Duke of Portland's Head Gardener says:—"I have tried Carters' *Quite Content* Pea, which is without doubt the largest podded Pea I know of. I consider it a grand Pea for a moderately rich soil, as the large pods are more readily filled than when too strongly grown. Those in want of the largest pods for exhibition purposes cannot do better than grow it."—Mr. JAMES GIBSON, The Gardens, Welbeck.

The Right Hon. The Earl of Lathom's Head Gardener says:—"Carters' *Quite Content* Pea is truly a magnificent Pea for exhibition and of excellent table quality. I gained First Prize with it at Shrewsbury Show in a very strong competition."—Mr. B. ASHTON, The Gardens, Lathom House.

His Grace The Duke of Buccleuch's Head Gardener says:—"Carters' *Quite Content* is a splendid Pea of first-rate quality. The pods are large, mostly in pairs, and well filled with peas."—Mr. WHYLOCK, The Gardens, Dalkeith Palace.

The Right Hon. Lord Poltimore's Head Gardener says:—"Without doubt a variety which has come to stay, and it will form one of the standard main-crop varieties."—Mr. T. H. SLADE, The Gardens, Poltimore Park.

Sir Edmund Loder's Head Gardener says:—"Carters' *Quite Content* Pea is a marvel, a large cropper, and the admiration of all who see it. We have had pods 7 inches long; it is also of fine flavour. The finest Pea ever seen, and everyone ought to be '*Quite Content*' when they have it flourishing in the garden."—Mr. W. A. COOK, The Gardens, Leonardslee.

Viscount Portman's Head Gardener says:—"Carters' *Quite Content* Peas are a tall-growing variety. The haulm is fairly dark, pods large and straight, medium green, and from 5 to 6 inches in length, containing from 10 to 12 seeds in each, which are of good flavour. An excellent show variety for second early use."—Mr. H. C. PRINSEP, The Gardens, Buxted Park.

"I should say that this is the largest Pea in existence, and of excellent quality. The pods are well filled, and it is indispensable to the exhibitor and excellent for general use."—Mr. J. C. TALLACK, The Gardens, Shipley Hall.

"Have been a showman for the last 18 years, but never before have I had such a dish of Peas on the show table. I had pods 7½ inches long containing 11 peas in each pod."—Mr. J. W. SURRIDGE, Chingford.

Price 3s. 6d. per ½-pint, 1s. per packet.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' QUITE CONTENT PEA.

The Longest Podded Marrowfat in Cultivation.

Awarded First Class Certificate Royal Horticultural Society, 1906.

FOR FULL PARTICULARS SEE OPPOSITE PAGE.

CARTERS DREADNOUGHT PEA.

THE NEW MAINCROP MARROWFAT PEA.

NEW LATE MARROWFAT PEA.

CARTERS' DREADNOUGHT.

This remarkable Pea has been selected by us as a grand addition to the late Main Crop Section. It is the practice of our house to make comparative tests of all the new Peas introduced by growers both at home and abroad. After careful comparison we have failed to find a pea that pleases us more as a variety to come in between the Main Crops and the very late peas than *Dreadnought*. It has large bold pods well filled with Peas of delicious flavour.

We have been instrumental in introducing many Peas which have become standard varieties, such as *Telephone*, *Telegraph*, *Stratagem*, *Pride of the Market*, and *Daisy*, known all over the world, and we undertake to prophesy that this novelty is destined to take an equally permanent place, not only among amateurs, exhibitors, and connoisseurs at the table, but also as a profitable market Pea. Its large deep green well-filled pods, and its resistance to mildew and drought are its distinguishing characteristics.

We have given it the name of *Dreadnought* at the suggestion of an esteemed horticulturist. Height, 3 feet.

Price 4s. 6d. per quart, 2s. 6d. per pint, and 1s. per packet.

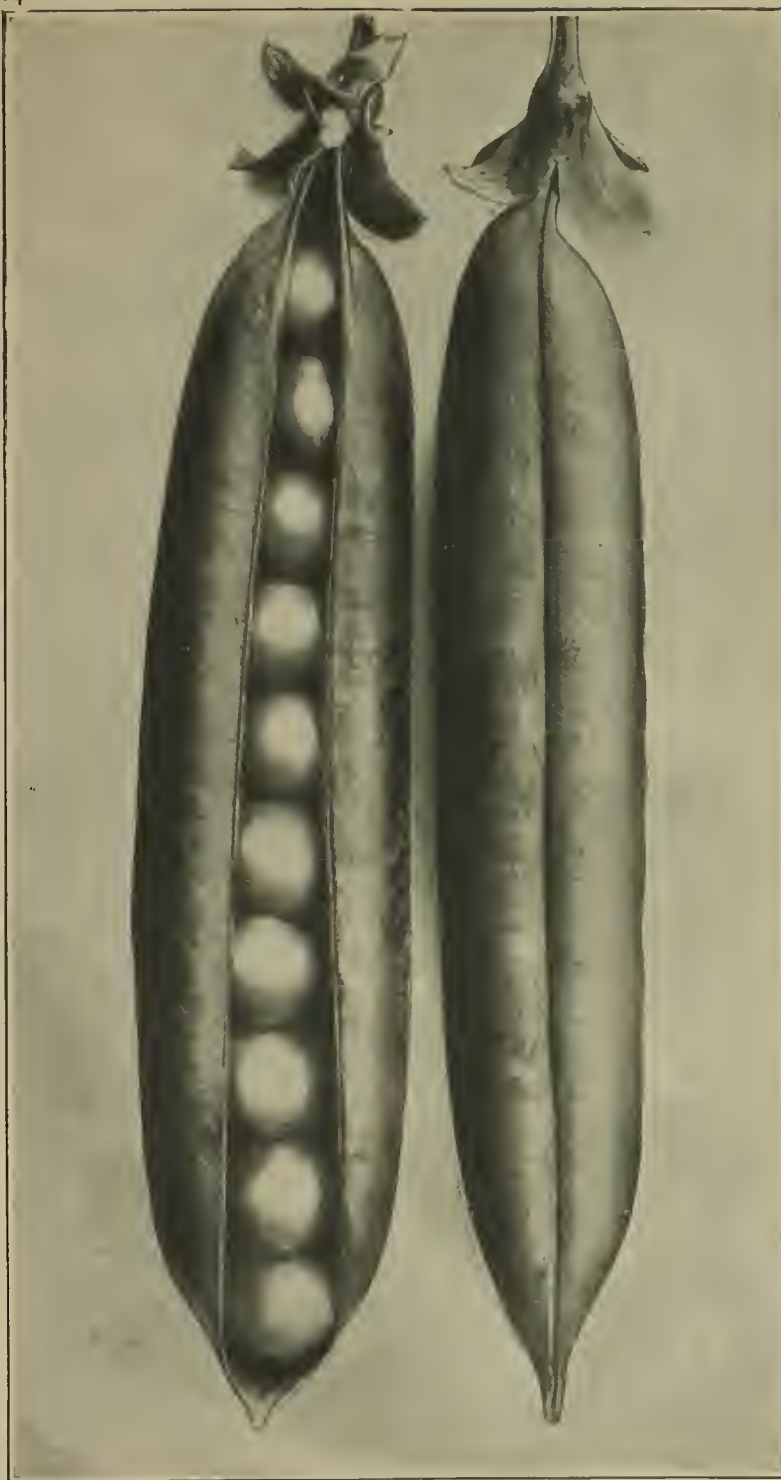

WE WERE AWARDED THE SILVER GILT KNIGHTIAN MEDAL

FOR

The largest collection (250 varieties) of Culinary Peas ever exhibited, staged by us at Royal Horticultural Society's Hall, Vincent Square, Westminster, on July 24th, 1907.

Extract from the *Gardeners' Chronicle* of July 27th, 1907.—“Messrs. James Carter & Co., High Holborn, W.C., showed an exhibit of Peas, in all some 250 varieties. This very large collection was from their trial ground at Mortlake, and as all were sown on the same date (March 27th) it was of much educational value as demonstrating the season of each kind; some were yellow in the pod and others were just forming their seeds. Attached to each dish was a label affording information as to the season, habit, &c., of the variety displayed. The manner of staging was effective, for interspersed in the group were vases of Sweet Peas, and arches filled with the same flowers were arranged down the centre of the table. The large pods of *Quite Content* were conspicuous, and quite the largest in this extensive display. Other varieties that were especially noticeable in this display were *Duke of Albany* (re-selected), *Stratagem*, *Carters' Exhibition*, *Alderman*, *Gladstone*, *Dreadnought*, *Daisy*, and *Torpedo*. Several seedlings of merit were also shown, and selected stocks of standard kinds.”

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' EXHIBITION MARROW PEA.

A magnificent large-podded variety bearing rich deep green pods, perfect in shape, and well filled with large green peas of excellent flavour. Unequalled for exhibition purposes.

Main crop.

Height, 5 feet.

**Nine First Prizes
reported
last Season.**

*For full particulars, see
opposite page.*

A NEW LARGE-PODDED MARROWFAT PEA.

See Photograph on opposite page.

Carters' Exhibition.—Main crop. Height, 5 feet. Seed large, green, and wrinkled. A magnificent Pea, the result of a selection from Carters' *Model Telephone*, the selection having been made for the purpose of obtaining an Exhibition Pea possessing all the good points of that celebrated variety, but bearing even a larger and richer coloured pod.

We claim that in every respect we have been successful, this superb variety bearing immense rich deep-green pods, perfect in shape, and well filled with large green Peas of excellent flavour, being unequalled for Exhibition purposes, as also for general garden work.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

The Gladstone.—Carters' re-selected stock—a fine late variety, bearing long sickle-shaped pods, dark in colour, very prolific. Fine for exhibition. Height, 3½ feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Dwarf Monarch.—A deep green wrinkled Marrow, with a square ended pod of the *Autocrat* type, but earlier; producing pods in pairs which contain eight and nine peas of a splendid deep green colour, and of finest flavour; wonderfully prolific. Height, 2 feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' G. F. Wilson.—An old and popular late Marrow, with a robust and healthy growth. Standing all sorts of weather changes better than some others. Height, 3 ft.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters' Improved Omega.—A highly selected long-podded type of this popular Pea. Height, 2 to 2½ feet.

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

Carters' Re-selected Duke of Albany.—A great advance on the original stock, the pods being straighter and longer, and should be grown by all who know the original variety. Height, 5 feet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says:—"Carters' *Duke of Albany* Re-selected. *Duke of Albany* received an A.M., July 5th, 1901. This is a fine true stock of this now well known excellent variety."

Price 1s. 9d. per pint, 3s. per quart.

Glory of Devon.—Award of Merit, Royal Horticultural Society. A Marrowfat Pea of remarkable growth and enormous pods. Height, about 3 feet.

Price 1s. 9d. per pint, 3s. per quart.

Ne Plus Ultra.—Carters' re-selected stock. A splendid Pea for late crops. Height, 6 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

For Carters' Special Selection of Peas for Succession, see page 66.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

A celebrated
late Marrow,
the latest in
cultivation.

Photographed and Copyrighted by J. C. & Co.

CARTERS' MICHAELMAS PEA.

The latest Garden Pea in cultivation.
For full particulars, see opposite page.

CARTERS' MICHAELMAS PEA (*see Photograph on opposite page*).—This grand Pea quite oversteps the boundary hitherto set by the times and seasons, and is absolutely distinct. Late varieties of Peas of past fame have been late mainly by reason of their strawy character. The constitution of Carters' *Michaelmas* Pea is not run through in straw, but we have fixed a dwarf bushy growth of $2\frac{1}{2}$ feet, which holds back its natural force and throws it into the pods; consequently, while being very prolific, its colour in pod is of the deepest green, and its pods are large and well filled. We have proved this Pea to possess a reserve of strength which will enable it to resist the drought and the mildew to a degree hitherto unknown in a Pea.

THE ROYAL HORTICULTURAL SOCIETY, in their report of trials at Wisley, say:—"Carters' *Michaelmas*. Height, $3\frac{1}{2}$ feet; haulm and pods very dark green; very sturdy; pods in pairs; heavy crop."

Price 2s. per pint, 3s. 6d. per quart, 6d. and 1s. per packet.

88 **SIX DISTINCT AND VALUABLE RADISHES.**

1

2

3

4

5

6

For full description, see opposite page.

Wenters 237, 238, & 97, HIGH HOLBORN, LONDON.—1938.

SIX NEW AND DISTINCT RADISHES.

All invaluable for early frame work.

(See Photographs on opposite page.)

No. 1.—Carters' Extra Early Scarlet.

Splendid deep rich colour, very quick growing, having small top; flavour sweet and delicate.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 2.—Carters' Early Round White.

A decided acquisition, the flavour of the small tender roots being as fine as one could possibly wish.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 3.—Carters' Early Round White Tipped.

An exceedingly quick-growing globe-shaped Radish, with a showy appearance in the dish, and a peculiar nutty flavour.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 4.—Carters' Delicatesse.

An attractive breakfast dish. Its peculiar shape, crisp flesh, and nutty flavour give this fine selection a distinct advantage. Suitable for forcing.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 5.—Carters' Rose Olive Extra Early.

A great improvement on the old crimson olive-shaped variety. The contrast is as attractive to the eye as the sweet delicate flavour is to the palate.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting the result of last season's trials at Wisley, says:—"Carters' *Rose Olive Early* Radish. A very pretty olive-shape variety, with a deep rose colour and good flavour."

"A gem for frame culture and for very early work. It comes in quickly, and is of nice crisp flavour. I strongly recommend this variety."—Mr. W. A. COOK, The Gardens, Leonardslee, Horsham.

"A very pretty Radish, its neat shape and fine colour being most attractive. It is one of the earliest varieties I have ever seen."—Mr. G. H. PRINSEP, The Gardens, Buxted Park, Uckfield.

NEW

No. 6.—Carters' Early Favourite.

This Radish matures with marvellous rapidity, and as a first early forcing variety is unequalled; attractive alike to the eye and the palate.

Price 6d. and 1s. per packet.

A NEW SOLID-FLESHED TURNIP RADISH.

Photographed and Copyrighted by J. C. & Co.

THE OLD TYPE.

THE NEW TYPE.

SECTION OF ROOTS, cut from matured examples grown from seed sown the same day.

Carters' Crimson Giant.—A SOLID-FLESHED FORCING TURNIP RADISH. This is an entirely novel type, its roots attaining more than double the size of other forcing varieties without becoming pithy or hollow, and on this account cannot be too highly recommended. The accompanying photograph of two horizontal sections shows how strikingly in this particular the *Crimson Giant Forcing* differs from the ordinary Turnip Radish.

Price 6d. and 1s. per packet.

Carters' French Breakfast.—There are so many inferior strains of this very popular Radish (introduced by our house from Paris years ago) that we recommend all connoisseurs of a fine appetising breakfast dish to grow only the real original type.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

Carters' Triumph.—A new turnip-shaped Radish, mottled and striped. This is an altogether novel feature in Radishes; they are prettily mottled and splashed with carmine on delicate white flesh, which makes them, when on table, as attractive to the eye as they are to the palate.

Exhibited in the Collection of Vegetables awarded the Silver Cup, Royal Horticultural Society, May, 1904.

Price 1s. per ounce, 3d. and 6d. per packet.

The Icicle.—So named because of its unique transparent whiteness, attractive appearance, and freshness early in the season. The earliest long white Radish, of extraordinary crispness and tenderness.

Price 3s. 6d. per pint, 8d. per ounce, 3d. and 6d. per packet.

RADISH.

91

SUMMER AND WINTER VARIETIES.

For particulars of new early Radishes, with Photographs, see pages 88 and 89.

Carters' Long Forcing Scarlet (*see Photograph*).

A great advance on the old varieties. The very best long scarlet Radish for early work. Fresh, crisp, and tender.

Price 3s. 6d. per pint, 8d. per oz., 3d. and 6d. per packet.

Carters' Crimson Marble.—A choice selection, symmetrical in form; flesh white, crisp, and solid; colour rich vermillion-crimson; fine mouse-tail root.

Price 2s. 6d. per pint, 6d. per oz., 3d. per packet.

Carters' "Knickerbocker."—A veritable giant, frequently growing to a length of 8 inches, and several inches in thickness. For exhibition purposes it is invaluable.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

Carters' London Long Red.—The particular fancy of the London Markets.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

WINTER VARIETIES.

Turnip-Shaped China.—A scarlet variety of the *China Rose* Winter Radish. It may be sown at intervals from spring until autumn, and the roots obtained from late sowings can be kept in store for winter consumption. The root is round, of a fine scarlet colour, $2\frac{1}{2}$ to 3 inches in diameter; flesh pure white, of an agreeable and mild flavour.

Price 6d. per ounce, 3d. per packet.

Long Black Spanish.—For autumn sowing; large and distinct.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

China Rose, Oval Shaped.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

The Cultivation of Radish.—Sow on a moderate hot-bed in January, February, and March; also every month during summer in well-prepared places in the open. The Radish thrives best when quickly grown in a rich deep moist soil. A sowing in frame, or on a warm border in October, is desirable for winter use. Water thoroughly during hot weather.

SALAD PLANTS.

Everyone should enjoy the pleasure of a salad several days a week, at all events during the summer season, with but trifling expense. It is a wholesome addition to more substantial diet, rendering it grateful to the palate, and it is a pity that it is so rarely brought to table in an average household. We will enumerate a few of the almost unknown salad plants, with some notes on their cultivation.

American Land Cress may be sown at any time out of doors. It is a useful variety tasting something like water cress.

Price 6d. per packet.

Beet.—See pages 11 to 13.

Celeriac, Carters' Improved (or turnip-rooted Celery).—Pure white root, refined flavour. It is becoming popular in this country, owing to the more frequent contact nowadays of the English people with continental dishes. Seeds should be sown in pans in March, and the plants set out in shallow trenches to mature.

Price 6d. per packet.

Chervil is used for seasoning soups and mixing in salads. It is grown from seed sown in spring and in summer for successional crops. The soil should be rich and light, and the bed $4\frac{1}{2}$ feet wide, with an alley on each side. Sow seed in shallow drills across the bed, 9 inches apart, and rake over the surface. When the leaves have grown an inch or two, cut off for use as required.

Price 6d. per packet.

Chicory.—The majority of people know Chicory as an adulterant of Coffee, but few are aware of the part it plays in the salad bowl, to which it adds a pleasing flavour. Chicory is so easily grown and so useful, that it should receive more attention from amateurs who desire to grow salads. This plant is also sown in late spring in the open ground, and thinned out to about a foot apart to grow through the summer, well watered in dry weather. With the change to a colder season, the leaves decay and nearly all drop off. The roots are then lifted, and a few at a time placed in boxes of rich sandy soil, leaving crown well above the surface. After a good watering these boxes are stood in a perfectly dark place, and in a few weeks, according to the heat, some nicely blanched leaves will be fit to gather. More roots, kept in a cool place until wanted for bringing along in heat, may be similarly treated.

Price 6d. per packet.

Whitloaf is a distinct variety of Chicory, largely grown in the suburbs of Brussels, and chiefly noted for the quality of its leaves.

Price 6d. per packet.

Chives is a hardy perennial found in rocky pastures. It is grown in gardens for its leaves, as a substitute for early onions. Propagate by dividing the roots into clumps in spring and autumn and plant from 8 to 12 inches apart. In order that the leaves be tender and succulent they should be often cut.

Plants price 6d. each.

Clary, used for flavouring soups.

Price 6d. per packet.

Corn Salad or Lambs' Lettuce.—This is a hardy annual, and in great demand as a salad plant on the Continent. In France it is preferred, admired, and relished in winter and spring instead of

Lettuce, but it is not nearly so highly appreciated in Britain as it deserves. But when Endive is scarce, Corn Salad is of great service, and for early use should be sown in frames or in boxes and placed in slight heat. For summer use it may go on the border or in lines in a sunny spot, amongst the ordinary low-growing vegetables.

Price 6d. per packet.

Cress.—See page 36.

Cucumber.—See pages 37 to 39.

Dandelion.—The common Dandelion is a useful salad plant, especially when Endive and Lettuce are scarce in winter. The roots are grown in a similar manner to Chicory, and large quantities of the blanched leaves are sold in the markets for this esculent.

Price 6d. per packet.

Endive.—See pages 40 and 41.

Lettuce.—See pages 46 to 50.

Mustard.—See page 56.

Nasturtium, of which the green seeds make a delightful salad. This plant is both a dwarf and a climber, and very ornamental as well as useful. The flowers are often used in salads, occasionally for decorating, and the leaves and young green plants are frequently pickled.

Price 3d. and 6d. per packet.

Purslain is a succulent plant and raised from seed, which may be sown in light garden soil in March on a warm sheltered border in a bed, and attended to in the same way as for Chervil.

Price 6d. per packet.

Radish.—See pages 88 to 91.

Rampion.—A plant producing a spindle-shaped root of light colour and of agreeable flavour. It may be raised from seed if sown in a bed in an open warm aspect, and in soil of a rich compost, of a light open texture. Water well in dry weather. Should the season prove mild, the plants will be ready for use in November.

Price 6d. per packet.

Shallots.—The Shallot is much in favour as a relish for soups and for pickling. Offsets are often planted in the autumn, but the main crop is usually got in early in the year. The bulbs may be planted at any suitable time during this period, 12 inches between each row, and 6 inches from set to set. The bulbs should be firmly pressed in just beneath the surface of the soil, and here they remain. As the growth matures in spring, gently draw away the soil round the bulbs when they have become established, and if they look sickly, apply soot to the surface soil for maggots, and use the hoe for weeds. Lift, dry, and store crop as soon as ready, probably the end of June. For exhibition, twenty-five cloves or bulbs should be placed on a large plate, and see that they are firm, of medium size, ripe, of good colour, and nice small necks. There are two types, the Mammoth and the ordinary Shallot.

For price of bulbs, see page 246.

Tomato.—See pages 94 to 97.

Watercress.—Watercress may be successfully grown from seed if sown in a shaded border and kept well watered when started.

Price 6d. per packet.

Photographed and Copyrighted by J. C. & Co.

THE CARTER SPINACH.

A SUPERB LONG-STANDER, WITH RICH DEEP GREEN LEAVES.

The Carter Spinach (*see Photograph*).—This fine Spinach was sent for trial to the Royal Horticultural Society, and was given an *Award of Merit*. Our photograph illustrates in a remarkable manner the solid substance of the leaves; and the whole plant, which is very fine in colour, is of far greater duration than ordinary Spinach.

Price 2s. 6d. per pint; 6d. per ounce; 3d. per packet.

The Cultivation of Spinach.—Sow Round Spinach in succession from January to June, and Prickly or Winter Spinach the first week in August to stand the winter. Sow New Zealand Spinach in March in heat and transplant about the end of May, setting the plants about 3 feet apart.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

REPORTS UPON CARTERS' "SUNRISE" TOMATO.

The Duke of Northumberland's late Head Gardener says:—"The fruits of *Sunrise* Tomato I exhibited at the Royal Horticultural Society's meeting on March 6th were sown in September and commenced fruiting in December—grown in 6-inch pots. It is a splendid winter fruiting variety."

The Duke of Buccleuch's Head Gardener says:—"We grew fifty plants of *Sunrise* Tomato in pots here. It is a good cropper, sets very freely, and bears fine medium-sized fruits of splendid quality and flavour."—Mr. J. WHYLOCK, The Gardens, Dalkieth.

The Earl of Carlisle's Head Gardener says:—"I may say I gave *Sunrise* Tomato a trial last season and was highly pleased with it. It sets very freely and produces enormous trusses of highly-coloured medium-sized fruits of good quality."—Mr. A. E. SUTTON, Castle Howard, *January 9th, 1907.*

The Right Hon. the Earl of Jersey's Head Gardener says:—"Sunrise Tomato has cropped grandly outside this season. It has been quite the best one here."—Mr. J. HAWKES, The Gardens, Osterley Park, *October 5th, 1906.*

The Earl of Lathom's Head Gardener says:—"A marvellous cropping variety, and destined to become the Tomato for market growers especially. I never saw its equal for cropping, and the fruits are just the size the market growers require—medium, with good appearance and no waste."—Mr. B. ASHTON, The Gardens, Lathom House.

The Right Hon. Lord Aldenham's Head Gardener says:—"We have just finished *Sunrise*. It is a capital Tomato, a wonderful setter, fine quality and flavour. They are the finest lot I have ever seen."—Mr. E. BECKETT, The Gardens, Aldenham House.

Viscount Portman's Head Gardener says:—"There is no doubt but that this is an excellent variety. The fruits are produced in abundance when the plants are quite small. When ripe they are of even size, good colour, and with smooth skins. Either for market or private gardens this will prove to be one of the best."—Mr. H. PRINSEP, The Gardens, Buxted Park.

Lord Poltimore's Head Gardener says:—"This is about the most distinct Tomato in cultivation; an enormous cropper, we have clusters carrying nineteen fruits. With our American cousins we may now say there are two kinds of Tomatoes—Carters' *Sunrise* and all the others."—Mr. T. H. SLADE, The Gardens, Poltimore Park.

Sir Edmund Loder's Head Gardener says:—"This is a very fine acquisition in early Tomatoes, it sets well and ripens quickly, and is not too large. It is a very heavy cropper in pots and also planted out, both in and out of doors."—Mr. W. A. COOK, The Gardens, Leonardslee.

The Right Hon. Walter Long's Head Gardener says:—"Carters' *Sunrise* has proved a splendid acquisition, so easy to set and free in cropping. I predict a large inquiry for it among all classes of growers. Gardeners visiting here have been much impressed with it."—Mr. W. STRUGNALL, The Gardens, Rood, Ashton.

"I had a packet of your *Sunrise* Tomato last year, and the crop we had outside was enormous."—Mr. W. STARK, The Gardens, Frittenden House, *February 21st, 1907.*

"It is the finest all-round variety that I have ever grown. It has in a marked degree every good quality, either as an early indoor or later variety for outdoor borders, and what is more remarkable, its quality remains the same. I had plants growing on a south border with 10 bunches of fruit, average 10 to 12 fruits on each bunch; the bunches overlapped each other from a few inches of the ground-level to the top. Everyone said that they were the finest they had ever seen. All the other seeds gave great satisfaction."—Mr. D. BURRIDGE, Head Gardener to Newton T. Whitworth, Esq., *December 22nd, 1906.*

First Class Certificate, R. H. S., awarded July 4th, 1905, after Indoor cultivation at Wisley.

Confirmed as Outdoor variety, October 10th, 1907.

Price 2s. 6d. and 3s. 6d. per packet.

 **Carters** 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' "SUNRISE" TOMATO.

95

FIRST CLASS CERTIFICATE, R. H. S.

Confirmed as Outdoor Variety, after growth at Wisley, Oct. 10th, 1907.

During 1905 an extensive trial of Tomatoes was made by the Royal Horticultural Society, 71 varieties being sent in from all the leading houses.

The only First Class Certificate was given to CARTERS' "SUNRISE," and the following note is attached to the report:—

"Tomatoes have reached such perfection that it is now very difficult to raise a variety superior to those already in commerce. In this trial only one stood out as being of exceptional value, viz., 'Sunrise.'"

"F.C.C. confirmed as Outdoor variety, after growth at Wisley, Oct. 10th, 1907."

The chief points in *Sunrise* are—
 Its Earliness.—It ripens several days earlier than most varieties.
 Its Prolific Character.—See Photograph.
 Its Cropping Properties.—See Photograph and Testimonials.
 Its Healthy and Robust Constitution.—No trace of disease.
 Its Solid but Delicate Flesh.—Contains very few seeds and practically no eye.
 Its Evenness of Size as a Dessert Fruit.
 Its bright Scarlet Colour and rich Acid Flavour.
 Its equal value for Indoor or Outdoor Cultivation.

It is some time since such a high honour has been granted to a Tomato.

Carters' *Sunrise*.—The finest Tomato for Indoor and Outdoor culture.

Price 2s. 6d. and 3s. 6d. per packet.

A BUNCH OF RIFE FRUIT, MUCH REDUCED IN SIZE, SHOWING LONG HABIT OF FRUIT CLUSTER.

TOMATO. CARTERS' DUKE OF YORK.

Awarded the First Class Certificate of the Royal Horticultural Society and Four Silver Medals, and included in the Gold Medal Collection, Royal Horticultural Society's Exhibition, September, 1904.

181 FIRST PRIZES REPORTED
to us by Customers.

CARTERS' DUKE OF YORK.—This grand variety still holds a very high position in public favour. Colour rich scarlet, splendid cropper, almost globular in shape; flesh very firm, fine flavour. A leading feature of this superb variety is that it ripens its fruit with the most pronounced uniformity, whilst the profusion of clusters, averaging six and ten evenly formed fruit each, makes it conspicuously handsome. These clusters contain variously sized fruits, large and medium, both for the table and exhibition. It can be grown in the open, but does not ripen so quickly as our Outdoor variety. Invaluable as an exhibition variety as for private growers and market purposes.

*Photographed and Copyrighted by
J. C. & Co.*

TOMATO, DUKE OF YORK.

"I have been most successful with your *Duke of York* Tomato, having taken First Prize for the past four years at Straumur Show."—Mrs. COWAN, Glenluce, January 10th, 1907.

Price 2s. 6d. and 3s. 6d. per packet.

Photographed and Copyrighted by J. C. & Co.

CARTERS' OUTDOOR TOMATO IN HER ROYAL HIGHNESS THE DUCHESS OF ALBANY'S GARDEN.

Carters' Outdoor.

This variety readily fruits under the warmth of a south wall, or along the front of a greenhouse, in any situation where the full influence of the sun is felt and away from cold winds. In shape the fruit is not so round as our *Duke of York* or *Sunrise*.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Perfection.—Quite distinct from any other variety named Perfection. It is very handsome in form, distinct in colour, exceedingly prolific, and of exquisite flavour. Forty-nine First Prizes reported.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters' Blenheim Orange.—We raised and introduced this extraordinary Tomato, a curious cross between the red and yellow. Gathered when quite ripe they are luscious and juicy, and the nearest approach to the flavour of a plum. It contains but very few seeds.

Price 6d., 1s., 1s. 6d., and 2s. 6d. per packet.

CARTERS' DEDHAM FAVOURITE.—Well-known and deservedly popular.

Price 6d., 1s., and 1s. 6d. per packet.

CARTERS' GREENGAGE.—Introduced by us, and the first of the golden section of any value. Awarded a First Class Certificate by the Royal Horticultural Society.

Price 6d., 1s., and 1s. 6d. per packet.

CARTERS' MARKET FAVOURITE.—Price 6d., 1s., and 1s. 6d. per packet.

CARTERS' SANDWICH ISLAND.—Price 6d. and 1s. per packet.

The following can also be supplied, price 6d. and 1s. per packet :—

CHALLENGE.

CHEMIN ROUGE.

COMET.

HACKWOOD PARK.

HAM GREEN FAVOURITE.

HAREFIELD GOLDEN GEM.

HATHAWAY'S EXCELSIOR.

LARGE RED.

LARGE YELLOW.

PRACH.

RED CURRANT.

STIRLING CASTLE.

TROPHY.

Cultivation.—Sow seed in February and March, and transplant into pots to harden off; afterwards plant out against a south wall in good soil; or they may be planted in a warm border, and carefully staked to keep the plant and fruit from straggling on the earth. If cultivated in pots the treatment should be the same, with the addition that liberal waterings of manure and rain-water will be found necessary, especially during the hottest part of the summer.

CARTERS' EARLY LONG FORCING TURNIP.

Photographed and Copyrighted by J. C. & Co.

Carters' Early Long Forcing Turnip.—Price 3s. 6d. per pint, 8d. per oz., 6d. and 3d. per packet. *For full particulars, see page 99.*

TURNIPS FOR FRAMEWORK AND EARLY USE.

Photographed from Nature and Copyrighted by J. C. & Co.

A NEW EARLY WHITE TURNIP.

Carters' Little Marvel.—A cross between *Early White Milan* and *Jersey Lily*, which is the best type of White Round. It is very distinct in both habit and foliage, and is a splendid Table Turnip.

This remarkable cross-bred Turnip closely follows the *Milan* and is considerably forwarder than *Jersey Lily*. It must become popular with gardeners for early work as it is as good as it looks.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting last season's trials at Wisley, says:—"Carters' Little Marvel Turnip. White, round, handsome; foliage short and sturdy. A very early variety that should be valuable for forcing."

"A NEW TURNIP—LITTLE MARVEL.—This new introduction from Messrs. Carter & Co., High Holborn, is a great gain in earliness and quality, and will be a most valuable root for first crop in the open. So far I have only had roots grown in frames, and when forced they were superior to the *Early Milan* variety. I grew the *Milan* by the side of the new *Little Marvel* to test its earliness, and in this respect it is equal to the older variety. It should be a useful root for first crop in the open, or for a quick crop required in a short time, and it can be grown for a summer crop."—G. WYTHES, in *The Garden*, May 26th, 1906.

Carters' Early Long Forcing (*see Photograph on page 98*).—A new and distinct Turnip for frame or outdoor work. It matures very rapidly and is fit for table as soon as any other variety we know of. In shape it is distinct, whilst the flesh is close, firm, and crisp.

Award of Merit, R. H. S., for Roots sown in cold frame March 6th and exhibited May 8th.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

Carters' White Swan's Egg.—A very distinct and symmetrical Garden Turnip. It comes to the size of a lemon, is of rapid growth, the top remarkably small, short, and very compact.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

TURNIPS FOR THE GARDEN.

Photographed and Copyrighted by J. C. & Co.

From the Gold Medal Collection, Royal Horticultural Society.

38 FIRST PRIZES REPORTED BY CUSTOMERS IN SEASONS 1906 AND 1907.

+ **Carters' Jersey Lily** (*see Photograph*).—The most perfect in outline, and the best White Garden Turnip grown. In shape as round as an orange, of exquisite flavour, with single tap root, and very distinct small top.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

+ **Carters' White Milan**.—This is an exceptionally fine selected stock, strongly recommended for early garden work. It is as quick as a Radish, clean in growth, and of very fine flavour.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

The Cultivation of Turnip.—Sow Carters' *Jersey Lily* for early use the first week in March on a gentle hot-bed under glass, and later in a warm situation in the open border. For main succession crops, sow every three weeks in the open ground until the beginning of July. For winter use, sow early in August and again in September.

TURNIPS.—*Continued.*

Carters' Purple-Top Strapleaf.—A variety with plain strap-like leaves and flesh of fine texture ; colour of top of root a rich reddish purple. A perfect model in form, and highly valuable for exhibition.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

Carters' Golden Rose.—One of the hardiest and best Winter Turnips ; flesh of a rich golden-yellow colour, with single tap root ; flavour most delicate and melting. Awarded a Special First Class Certificate at the Vegetable Conference of the Royal Horticultural Society.

Price 6d. and 1s. per packet.

Carters' Crimson-Top Table Swede.—A choice stock of Swede Turnip with orange flesh, and specially adapted for growing as a winter table vegetable.

Price 1s. 6d. per pint, 3d. per ounce.

VEGETABLE MARROW.

Photographed and Copyrighted by J. C. & Co.

CARTERS' TRAILING WHITE. MOORE'S CREAM. PEN-Y-BYD. MUIR'S PROLIFIC. CARTERS' LONG GREEN STRIPED.

Carters' Trailing White.—One of the quickest growing varieties we know of; the fruit will extend to a great length whilst retaining all the tenderness of small young Marrows. Price 6d., 1s., and 1s. 6d. per packet.

Carters' Long Green Striped.—A giant prolific variety, the very best for gardens that lie in a bleak and exposed position. Price 6d. and 1s. per packet.

Muir's Prolific.—A distinct variety, with small globular fruit, creamy-white in colour, and solid flesh. Price 6d. and 1s. per packet.

Pen-y-byd (The best in the world).—A round fruiting Marrow, creamy-white in colour; very superior. Price 6d. and 1s. per packet.

Moore's Vegetable Cream.—Very fine variety, of creamy colour and of delicious flavour. Price 6d. and 1s. per packet.

The Cultivation of Vegetable Marrow.—Sow in heat during April, and transplant into highly-manured bed when ready and all chances of frost are past; or sow under a hand-glass in May upon a richly-manured border.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

SEED POTATOES.

THE ADVANTAGES OF PLANTING A RELIABLE CHANGE.

It is generally admitted that one of the most fruitful elements of the potato disease is supplied by a repeated growth year after year of the same stock of potatoes on the same land.

Another danger frequently recurring is the gradual undermining of the constitution of the potato by injudicious selection, alternately resulting in a weakly impoverished stock that too readily succumbs to the earliest attacks of the potato murrain.

Too much importance cannot be attached to this subject, and a change of seed is positively essential if a thoroughly reliable and superior crop is expected.

Our stocks have been grown and selected with the utmost vigilance, and under normal conditions of soil and situation will produce first-class crops.

Our crops are especially grown for seed purposes, that is to say, they are not over-fed for the sake of producing enormous tubers. They are kept true to name and description, and are not lifted until thoroughly ripe.

We go to this trouble and expense with a view to make our potatoes as disease-resisting as the season will permit.

We grow potatoes in England and Scotland, on the chalk in Kent, on the sand in Bedfordshire, on the rich warp-lands in Lincolnshire, and we are appointed agents for Mr. Archibald Findlay's celebrated new Scotch seedlings raised in the best potato districts of Fifeshire (see next page), so that we possess the advantages of supplying a distinct change of seed to every customer.

We do not list several of the rank-growing new varieties which need too much space in ordinary gardens, neither do we catalogue others in which we can find no merits. We grow trial plots each year of every variety we can find, and our list is based upon the experience gained therefrom.

IMPORTANT NOTICE.

It is necessary that Seed Potatoes procured during Winter and not required for planting for several months should be taken out of the bag or package in which they are received and laid out in an airy shed protected from frost, or the eyes will begin to sprout and a weakly growth follows. It is the custom with professional gardeners who require early crops in frames or on sheltered borders to lay out the tubers in boxes to induce sturdy sprouts, and each Potato is carefully planted with the strongest of these growths on it.

During March and April our season's supplies become much reduced, and we are often quite sold out of particular varieties. It is always our endeavour to send something likely to give satisfaction in place of any we may not have available.

For varieties and prices, see following pages.

Carters 237, 238, & 97, HIGH HOLBORN LONDON.—1908.

MR. FINDLAY'S CELEBRATED POTATOES.

We again offer these Scotch-grown Potatoes in Mr. Findlay's sealed bags. As is well known, Mr. Findlay's methods are of national importance, his operations having been carried out on the most approved principles, and in a manner never before seriously attempted in any other direction. Nothing has yet been produced to equal his new breed of Potatoes for *disease resisting*, *heavy cropping*, and high *table* qualities, and we strongly recommend all interested in this most important garden crop to grow one or more of the varieties he offers through us.

In view of the fact that all sorts of samples are being offered throughout the country as "Findlay's," it is important to observe that all we offer have been grown upon Mr. Findlay's own Potato Grounds, and packed in Mr. Findlay's own sealed bags and packages, and sold at Mr. Findlay's own prices.

MR. FINDLAY'S NEW POTATOES.

Entente Cordiale.—New early ; pale lemon colour flesh.

Price, 10s. per pound.

Duchess of Fife.—Second early flat oval.

Price, 10s. per pound.

Carnegie.—New maincrop kidney.

Price, 10s. per pound.

Those of our customers who would like to secure any of the following popular varieties in Mr. Findlay's own sealed bags can be supplied at the prices offered so long as stock lasts.

When these Potatoes are ordered with other goods we pay carriage, but when ordered alone we reserve to ourselves the right to send "unpaid." See *terms of business*.

Mr. Findlay wishes it to be understood that all *his* Potatoes are grown from selected tubers cultivated in a natural way in the open ground. He is no believer in plants produced from eyes and cuttings in a heated house, as in his opinion these artificial methods tend to deprive the crop of some of the best features that he has instilled therein after years of close study of the subject.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' HAND-PICKED SEED POTATOES.

105

SELECTED EARLY VARIETIES FOR FRAME AND EARLY BORDER USE.

For general list of standard varieties see following pages.

Carters' First Crop (*see Photograph*).—A perfect type of forcing or frame Kidney Potato for a gentleman's garden. The haulm is compact, and the tubers come in remarkably quick when grown in frames or pots. They are beautifully shaped, and the flesh is of a pale canary colour.

Price, per peck of 14 lbs., **5s.** Trial Box, 1s. 6d.

Carters' Advancer.—Pebble shaped, smooth skin, white flesh, medium haulm. In the trials of the Royal Horticultural Society a few years since this variety was one of the very few that were selected for fine appearance and good cropping qualities. A heavy producer on all good garden soils, and particularly valuable on light soils.

Price, per peck of 14 lbs., **5s.** Trial Box, 1s. 6d.

Carters' Early Favourite (*see Photograph*).—An oval shaped, pale fleshed, smooth skinned Potato, with a medium haulm. A first-class cooker from light and medium soils. A very useful Potato where space is limited, as it can be dug in an ordinary season during July.

Price, per peck of 14 lbs., **4s. 6d.** Trial Box, 1s. 6d.

Sir John Llewelyn.—An early White Kidney Potato, raised in Wales, many days earlier than some stocks of *Early Ashleaf Kidney*. Haulm fairly tall, eyes shallow. Award of Merit, R.H.S. It has proved a good cropper on various soils.

Price, per peck of 14 lbs., **4s. 6d.** Trial Box, 1s. 6d.

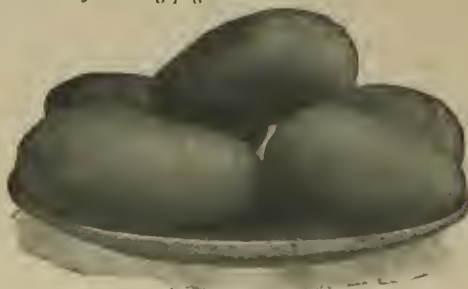

Carters' Royalty (*see Photograph*).—A grand second early Potato. It produces a medium haulm, of clean lustrous growth, and is very productive on all soils, the tubers seeming to retain their whiteness, dryness, and fine flavour when cooked under all methods. Although a forward Potato it will keep good until the end of the year.

Price, per peck of 14 lbs., **4s. 6d.** Trial Box, 1s. 6d.

Carters' Excelsior.—One of the best earliest round varieties with which we are acquainted. Compact in growth, and a good table Potato on all kinds of soils.

Price, per peck of 14 lbs., **4s. 6d.** Trial Box, 1s. 6d.

STANDARD EARLY AND MID-SEASON VARIETIES.

Carters' Improved Early

Ashleaf.—A fine yellow-fleshed Kidney with a small top, ready for lifting in summer; very popular

Early Ashleaf

Myatt's Early Kidney

Ringleader.—White Kidney

Express.—Very early

May Queen

Early Rose.—Pink skinned

Early Puritan.—Fine early Kidney

Victor.—Popular

Duke of York.—Very prolific

Snowdrop.—White Kidney. Of sterling merit. Awarded a First Class Certificate by the Royal Horticultural Society. Seems to do well on all soils

Early Regent.—White Round. A fine Potato, possessing the sterling qualities of the *Old Regent*, with the advantage of being considerably earlier. Useful where space is limited

The Canon.—A remarkably fine Kidney. The result of a cross between *Chancellor Kidney* and the *White Beauty of Hebron*. Succeeds on all soils

British Queen.—A fine second early pebble-shaped variety, very popular

Carters' Cosmopolitan.—An excellent white oval, producing heavy crops of tubers of very fine quality

Carters' Surprise.—The result of a cross between *Magnum Bonum* and *Myatt's Ashleaf Kidney*. Succeeds on all soils

Beauty of Hebron.—Pink oval. A very useful Potato with white flesh of great productiveness. One of the best on light and medium soils in a dry summer

White Beauty of Hebron.—A white-skinned variety of the last named

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' GRASS SEEDS.

As used on the estates of His Majesty the King at Windsor and Sandringham, and also supplied to Lord's, The Oval, Newmarket, Wimbledon, All-England Tennis Grounds, and all the leading Golf Clubs in Great Britain.

Grass Seeds prescribed for all Soils and Purposes.

For Lawns.	For Bowling Greens.	For Tennis Courts.
For Recreation Grounds.	For Polo Grounds.	For Archery Grounds.
For Cricket Grounds.	For Golf Courses.	For Football Fields.
For Croquet Grounds.	For Putting Greens.	For Racecourses.
For Shaded Lawns.	For Town Lawns.	For Cricket Pitches.

Please state for what purpose the grass seed is required, whether for an ordinary Lawn, Croquet, Tennis, Putting Greens, Through the Course, &c., and whether to form **new turf** or **renovating existing turf**.

2 1/2 lb white Dutch clover
Carters' Finest Grass Seeds.—As supplied to His Majesty's Golf Grounds and other parts of the Royal Estates. A mixture of the very fine bladed species, which, if sown according to our recommendations, should produce a close thick turf on all good soils, and is especially suitable for all games in which the ball is required to run true.

Price **30s.** per bushel of 25 lbs. ; **16s.** per half-bushel ; **1s. 6d.** per Parcel Post lb.

Carters' Fine Grass Seeds.—A prescription adapted for cold and ungenerous soils, or in any confined situation. A very useful mixture, but not quite so fine as the above.

Price **25s.** per bushel of 25 lbs. ; **14s.** per half-bushel ; **1s. 4d.** per Parcel Post lb.

For particulars of quantities to sow over certain areas, see page 110.

Carters' Grass Seeds for Golf Links.—Our experience in sowing down golf links, through the green, and putting greens is probably unique. **During the last four years twenty-seven new or enlarged Golf Courses have been sown entirely with our Celebrated Tested Grass Seeds.** Our price for Grass Seeds for "through the green" ranges from **17s. 6d.** per bushel to **30s.** per bushel, according to the texture of grass desired and the time the links are required for play.

Carters' Grass Seeds for Recreation Grounds, Race Courses, and other open spaces.—We prepare mixtures of hard-wearing grass suitable for this purpose at prices varying from **17s. 6d.**, **21s. 6d.**, to **25s.** per bushel.

Carters' Grass Manure.—Sow at the rate of 2 ozs. per square yard, or 5 cwt. per acre.

Price **4s. 6d.** per 14 lbs. ; **7s. 6d.** per 28 lbs. ; **12s. 6d.** per half-cwt. ; **21s.** per cwt.

Carters' Worm Killer.—Spread $\frac{1}{2}$ lb. over 1 square yard during mild weather, and water in.

Price **3s.** per 14 lbs. ; **5s.** per 28 lbs. ; **7s. 6d.** per half-cwt. ; **12s. 6d.** per cwt. ; 5 cwt., **£3** ; 10 cwt., **£5 10s.** ; **£10 10s.** per ton.

Our 72-page Illustrated Book dealing with the making and upkeep of Golf Links, Putting Greens, Lawns, &c., and giving full particulars of Carters' Tested Grass Seeds, Carters' Worm Killer, and Carters' Complete Grass Manure, free on application.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CONTRACTS.

We keep an efficient staff of experts for examining sites and preparing estimates for making by contract

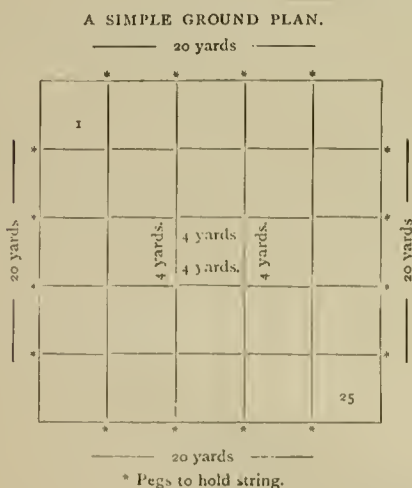

GOLF LINKS, POLO FIELDS, PUTTING GREENS,
RACE COURSES, TENNIS LAWNS, BOWLING GREENS,
CRICKET GROUNDS, CROQUET LAWNS, and all other
FOOTBALL FIELDS, PLEASURE LAWNS, ATHLETIC GROUNDS.

Also to plant, make, and generally lay out Estates, Gardens, Parks, Woods, Orchards, Rock Gardens, Terraces, &c., &c.

And to plan and submit drawings of Greenhouses, Palmhouses, Conservatories, and Winter Gardens, and to supply and furnish the same.

Write for terms and further particulars.

CARTERS' GRASS SEEDS ARE USED ON THE ESTATE OF HIS MAJESTY THE KING AT WINDSOR AND SANDRINGHAM.

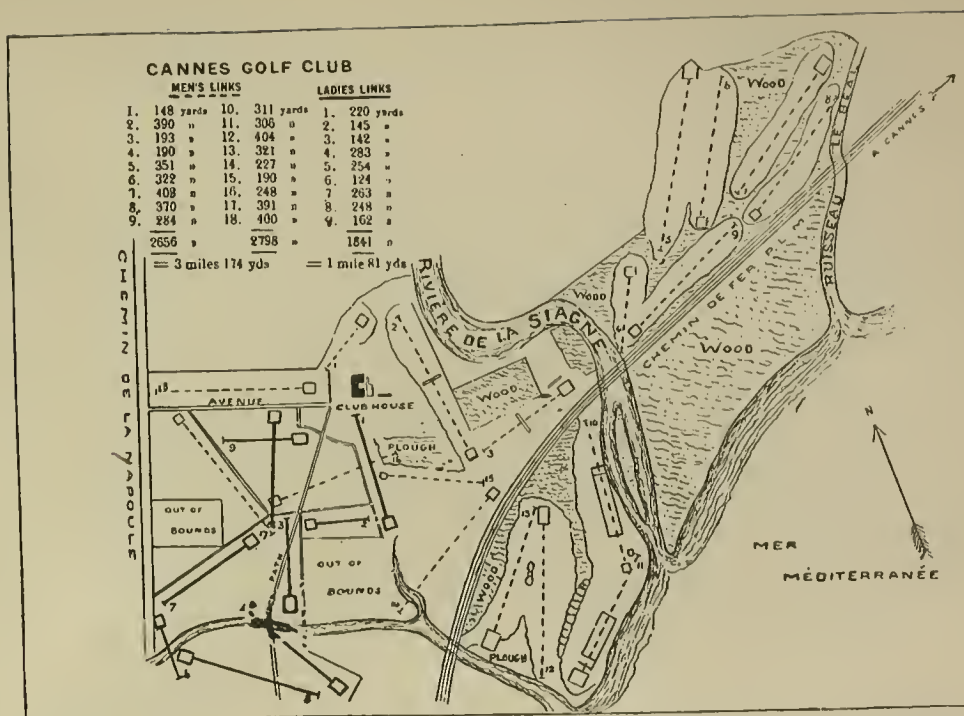

SOWING GRASS SEEDS.

A PLOT 20 YARDS EACH WAY, OR 400 SQUARE YARDS, READY FOR SOWING, MARKED OUT WITH STRING INTO 25 SQUARES OF 4 YARDS EACH WAY, OR 16 SQUARE YARDS.

QUANTITY OF SEED REQUIRED.

One bushel of seeds weighs 25 pounds. The ground should be divided into squares of 4 yards each way, or 16 square yards (*see Diagram*), and the seed required for that area should not be less than 1 pound, which is at the rate of 1 bushel of 25 pounds to an area of 20 yards each way, or 400 square yards.

(For prices of Carters' Special Prescriptions, see page 109.)

2,500 MILES TO INSPECT A GOLF COURSE. :

On April 18th, 1906, we were honoured by the receipt of a cable from H.I.H. THE GRAND DUKE MICHAEL OF RUSSIA, commanding the immediate attendance at Cannes, in the Department of the Alpes-Maritimes, France, of the Manager of our Golf Department, to inspect the Cannes Golf Links, and advise for the improvement of the same.

The Links are situated in La Napoule, at the foot of the Alpes-Maritimes, so that the surroundings, with the snow-capped mountains in the background and the bright blue sea in the front, are superb, and now that the Links are to be renovated under the "Carter System" they should compare very favourably with good British seaside links.

We were surprised to find such a complete golfing organisation at Cannes. There are two courses—one of 18 holes (5,454 yards long) for the gentlemen and ladies with a handicap not exceeding 10 strokes, and a 9-hole course (1,841 yards) reserved for ladies with a handicap of over 10 strokes.

The Club House is large, and replete with every modern convenience, and there are several Croquet Lawns for the use of non-golfers.

The honorary officials, the professionals, and the head servants all speak English, and every facility for temporary membership is extended to visitors.

Golfers who prefer bright sunshine to the somewhat trying climate of the British winter are recommended to go to Cannes, where they will find good golf, magnificent scenery, and the best of European and American society.

The plan above shows the length and direction of the courses, the gentlemen's links being marked by a dotted line and the ladies' by a black line.

During the following August we shipped by command of H.I.H. THE GRAND DUKE MICHAEL OF RUSSIA sufficient of our "Tested Seed and Manures" to renovate both courses.

**ONE OF THE PUTTING GREENS MADE AND SOWN DOWN BY OUR FIRM
ON THE WALTON HEATH GOLF CLUB.**

We had the honour to receive the following unsolicited Testimonial from W. HERBERT FOWLER, Esq., President of the Club:—

"21st December, 1903.—Now that the time has come when the work entrusted to you by the Walton Heath Golf Club is finished, I write to convey my thanks to you for the admirable way in which you have carried out a most difficult and almost new task. **You have converted a waste of heath and furze into a first-class 18-hole golf links**, and produced a splendid turf 'through the green' and putting greens which promise to rank with the best in the country. All this has been carried out in the short space of 16 months, and I am convinced that it has been done at a minimum of expenditure. I trust this will not be your last undertaking of this nature, as I am certain no other firm could have produced so good a result. I wish also to convey my personal thanks to all the members of your firm for their uniform courtesy and consideration. I regret that our joint task is over, and shall always remember our connection with much pleasure."—(Signed) W. HERBERT FOWLER, Walton Heath Golf Club, Walton-on-the-Hill, Surrey.

Since making the Walton Heath Golf Course, we have sown down 27 new or enlarged courses with our celebrated Tested Grass Seeds.

Note.—We cleared, ploughed, and sowed the whole of the 18-hole course and putting greens with the finest Grass Seeds, laid water on to all the greens, and made roads, &c. Not a square foot of turf was employed. We believe this to be the first golf course sown entirely with grass seeds, and in perfect condition for play within 16 months.—J. C. & Co.

Nearly 200 have been supplied, including
TWO to H.M. THE KING.

ALL MACHINES SENT CARRIAGE PAID.

Illustrated Catalogues from High Holborn by return of post, or from

Ransomes, Sims & Jefferies, Ltd., Ipswich.

CARTERS' WORM KILLER.

DIRECTIONS FOR USE.

- (1) Select a mild day when the earth is moist and the worms are active.
 - (2) Cover the Lawn or Green with Carters' Worm Killer at the rate of half a pound per square yard.
 - (3) Water the Worm Killer in immediately with a hose, water cart, or can, and use as much water as possible.
- The effect is instantaneous. The worms, large and small, struggle to the surface in thousands and die.

Carters' Worm Killer is absolutely infallible, provided that it comes into contact with the worms.

If it does not touch the worms it cannot kill them ; therefore use plenty of water. Try one pound first before applying bulk. This will tell you if the worms are about.

Carters' Worm Killer is a powder and is not poisonous to animal and bird life.

The advantages derived by using Carters' Worm Killer :—

- (1) The greens play true winter and summer alike.
- (2) The turf becomes clean and healthy.
- (3) The turf improves, as one of the constituents of the Worm Killer is a valuable plant food.
- (4) The surface becomes true and firm.
- (5) It is no longer necessary to roll or brush the greens every morning.
- (6) It is not necessary to rest the greens during the winter.
- (7) It reduces the cost of the upkeep of the green from £25 to £75 per annum according to the size and number of the greens.

Worms spoil putting greens because :—

- (1) The worm casts make accurate putting impossible.
- (2) The continual movement of the worms makes the surface soft and spongy, which no amount of rolling will remedy.
- (3) Brushing off worm casts damages the turf, as the action of the broom bruises and exposes the surface roots of the grass.
- (4) Rolling down worm casts smothers the grass and is responsible for many bare patches.

NOTE.—It took 5 men four hours a day to remove the worm casts from the greens of the Bushey Hall Club, at an estimated cost of £75 per annum. Since the greens were treated with Carters' Worm Killer this expense has practically ceased.

14 lbs.	28 lbs.	56 lbs.	1 cwt.	5 cwt.	10 cwt.	1 ton.
3/-	5/-	7/6	12/6	£3	£5 10s.	£10 10s.

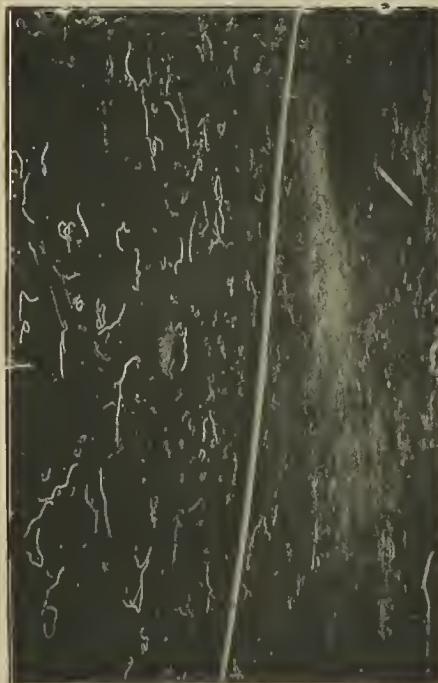

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

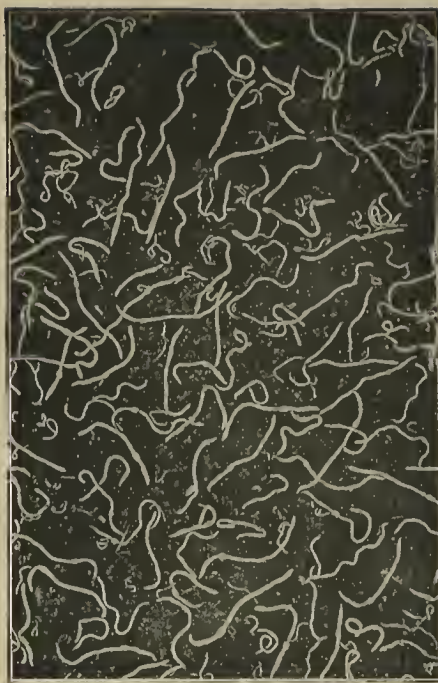

Spreading the "WORM KILLER" at the rate of half a pound per square yard.

Watering in the "WORM KILLER." A few worms can be seen in the foreground.

The worms coming to the surface in increasing numbers two or three minutes after the "WORM KILLER" was watered in.

The same piece of ground, taken from above, five or ten minutes later.

CARTERS' POPULAR BOXES OF SEEDS.

The Seeds offered in our Collections are of the best re-selected stocks only, taken from the same sacks as general orders given from this Catalogue. We can supply more Seeds for the money when purchased in this form, because we put up these Collections by the hundred, which effects a great saving in labour. They are ready for immediate dispatch, packed in wooden boxes, and sent carriage free to any Railway Station in the United Kingdom, on receipt of remittance. It is inconvenient to make alterations in these Collections.

AGERATUM IMPERIAL DWARF BLUE (*see below*).

Per packet—s. d.

- Ageratum**.—Hardy annual, neat habit, with effective flowers, mostly lavender blue; very useful in heds or along borders. Sow early in spring in pans, in heat, and prick off as other half-hardy annuals.
- No. 143. **Imperial Dwarf Blue**. The finest bedding variety in cultivation, AS SHOWN IN THE PHOTOGRAPH ABOVE. 9 inches ... 1 0
- „ 140. **Blue Star**. The most compact Ageratum yet introduced. Light blue. 6 inches 6d. & 1 0
- „ 141. **Little Dorrit**. Lavender. 6 inches ... 6d. & 1 0
- „ 142. **Victoria Louise**. Dwarf; light blue with white centre; very showy ... 6d. & 1 0
- „ 144. **Imperial Dwarf White**. 9 inches ... 6d. & 1 0
- „ 145. **Cœlestinum**. 9 inches ... 0 3
- „ 146. **Mexicanum**. 18 inches ... 0 3
- Abronia** (SAND VERBENA).—Half-hardy annual of elegant trailing habit for rockeries and dry places. Sow in early spring in pots and plant out.
- No. 133. **Umbellata**. Purple ... 0 3
- Abutilon** (INDIAN MALLOW).—Elegant form. Useful for conservatory decoration and for sub-tropical bedding. Sow in heat early in spring, and pot off as soon as large enough to handle. For bedding out they should be hardened off well before planting out. Height, 6 feet.
- No. 134. **Thompsonianum**. Variegated foliage ... 1s. & 2 6
- „ 135. **Carters' choicest mixed** ... 6d., 1s., & 2 6
- Acacia** (MIMOSA, WATTLES).—Shrubs in high repute for decorative purposes under glass.
- No. 136. **Armata** (Kangaroo Thorn). Good pot plant ... 0 6
- „ 137. **Lophantha**. Elegant foliage ... 0 6
- „ 138. **Carters' choice mixed**. All the best kinds ... 6d., 1s., & 2 6
- Achimenes**.—Tuberous rooted. Sow in heat in February and treat as Gloxinias.
- No. 139. **Carters' choice mixed** ... 2 6
- Acroclinium**.—(*See Everlasting Flowers, page 171.*)

CARTERS' ÆSTHETIC OR DECORATIVE FLOWERS. FOR CUT BLOOMS.

Photographed from Nature and Copyrighted by J. C. & Co.
GOLDEN SUNSET.

- No. 98. **Pennant Pink** (Perennial, flowering the first season).—An importation from Japan, long petals deeply lacinated; colour rich and varied; continuous bloomer. 1 foot ... 6d. & 1 0
- „ 99. **Silver Thistle** (Perennial).—Unique ornament to the mixed border; bright metallic lustre. 2½ feet ... 6d. & 1 0

No. 100. COMPLETE COLLECTION OF ABOVE (Nos. 88 to 99), price 5s. 6d.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Culture.—Sow in spring and plant out as soon as the seedlings are strong enough, or sow in the place where they are intended to flower, and thin out as may be necessary. Flowers that are not cut should be taken off when they wither, and fresh ones will quickly take their place. Sow also in September for spring flowers.

No. Per packet—s. d.

88. **Blue Marguerite** (Perennial).—Hardy, admirable for cutting. 1½ feet ... 6d. & 1 0

89. **White Marguerite** (Perennial).—Dwarf habit. 1½ feet 6d. & 1 0

90. **Yellow Marguerite** (Perennial).—Compact growing. 1½ feet ... 6d. & 1 0

91. **Blood Marguerite** (Annual).—Character of the favourite single Dahlia. 1½ feet 6d. & 1 0

92. **Orange Marguerite** (Annual).—Excellent pot plant. 1 foot ... 6d. & 1 0

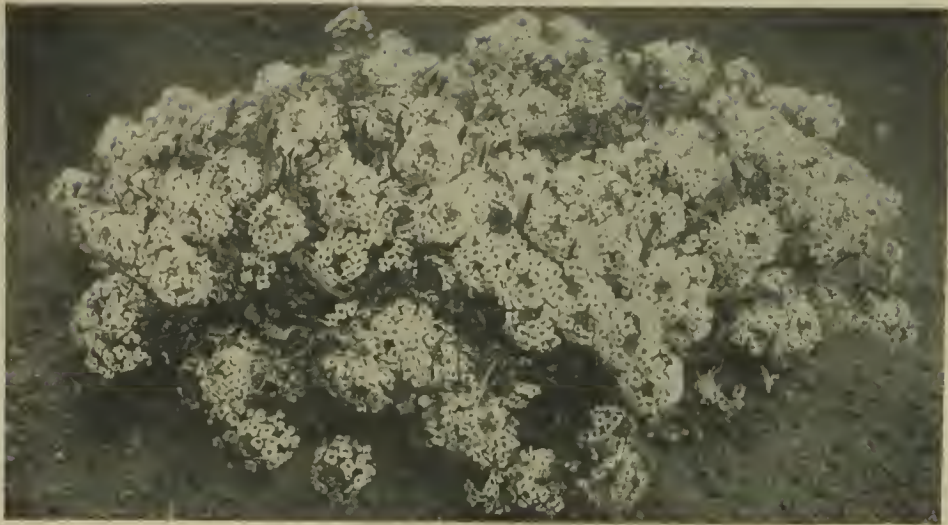

93. **Blue Cornflower** (Annual).—Cut flower; profuse bloomer. 1½ feet. (See also page 161) ... 6d. & 1 0

94. **Golden Sunset** (Perennial, flowering the first season).—Best of the Coreopsis tribe. 2 feet 6d. & 1 0

95. **Crimson Spray** (Perennial).—Tribe of Saxifrages; crimson scarlet. 1 foot 1s. & 2 6

96. **Alpine Poppy** (Perennial).—Neat dwarf habit, for pots or bouquets; mixed colours. 1 foot 6d. & 1 0

97. **Caucasian Beauty** (Perennial).—For the rockery or mixed border; colour lavender blue; a cut flower. 1½ feet 6d. & 1 0

Photographed and Copyrighted by J. C. & Co.
CARTERS' DWARF ALYSSUM SNOW CARPET (see below).

- Alyssum.**—For spring or summer. For pots or rockery. Easily grown. Per packet—s. d.
- No. 149. **Carters' Snow Carpet.** Annual. One of the most valuable dwarf bedding plants of modern introduction. Perfectly hardy. If transplanted a foot apart the plants spread out their side branches along the ground till they meet, becoming covered with pure white flowers, giving the effect of a snow carpet. Flowers through the summer and autumn until cut off by frosts. 4 inches ... 3d., 6d. & 1 0
- „ 150. **Maritimum Sweet Alyssum.** White. Annual. 9 inches ... 3d. & 0 6
- „ 151. **Saxatile.** Yellow. Perennial. 9 inches ... 0 3
- „ 152. **Saxatile compactum.** Hardy perennial for rockwork. 6 inches ... 3d., 6d. & 1 0
- Alonsoa.**—Treat as half-hardy annual; pretty plants for flower borders.
- No. 147. **Warszewiczii.** Bright scarlet. 2 feet ... 0 6
- Alstræmeria** (PERUVIAN LILY).—Perennial. Sow in gentle heat early in spring, and prick off. Makes fine clumps for herbaceous borders.
- No. 148. **Carters' choice mixed.** 1½ feet ... 6d. & 1 0
- Amaranthus.**—Half-hardy annuals with very ornamental foliage. Used for decorative purposes in conservatory, and for sub-tropical bedding outdoors in summer. Sow in March in gentle heat.
- No. 153. **Melancholicus ruber.** Maroon. 1 foot. Hardy ... 3d. & 0 6
- „ 154. **Princess of Wales.** Brilliant colour; sub-tropical. 3 feet ... 0 6
- „ 155. **Salicifolius.** Long, graceful, willow-like foliage, tinted crimson and gold. 3 feet ... 0 6
- „ 156. **Tricolor.** Sub-tropical; colours scarlet, crimson, and gold. 2 feet ... 0 6
- Ambrosia Mexicana.**
- No. 157. Delicate perfumed foliage; hardy annual. 1 foot ... 0 3
- Ammobium Alatum.**—Half-hardy annual of easy culture. Dried flower useful for winter decoration. Sow in spring in borders.
- No. 629. **White Everlasting.** 2 feet. (See page 171) ... 0 3
- Ampelopsis** (THE VIRGINIAN CREEPER).—For covering walls and fences. (See page 248.)
- Anagallis** (PIMPERNEL).—An old-fashioned half-hardy annual. Will flower all the season in warm soils, or may be grown in pots for greenhouse decoration.
- No. 158. **Large Blue.** Ultramarine. 6 inches ... 0 6
- Anchusa** (BUGLOSS).—Hardy perennials, of easy culture. Sow in spring, and transplant.
- No. 159. **Capensis** (Cape Forget-me-not.) Blue. 1½ feet ... 0 6
- „ 160. **Italica** Brilliant blue. 3 feet ... 0 3
- Anemone** (WIND FLOWER).—These beautiful spring and autumn flowers are perfectly hardy. Nos. 161 and 162 are bulbous, and 163 and 164 are herbaceous perennials. Seed of the tuberous varieties, should be sown thinly in light soil in spring and remain in seed bed until after flowering. We can also supply Nos. 161 and 162 in dry hulks and Nos. 163 and 164 in rooted plants. Anemone Roots see page 243.
- No. 161. **St. Brigid.** Double and Semi-double, easily grown from seed ... 6d., 1s. & 1 6
- „ 162. **Coronaria** (POPPY ANEMONE). Beautiful single larged flowered varieties ... 0 6
- „ 163. **Japonica.** Hardy perennial, flowering in September; grand in borders. 2 feet ... 0 6
- „ 164. **Japonica Honorine Joubert.** The best white for cutting. 2 feet ... 1 0

Photographed and Copyrighted by J. C. & Co.—MUCH REDUCED.

CARTERS' LONG-SPURRED AQUILEGIA.

Hardy perennials of great beauty and utility in borders, where they will bloom freely when established, early in the summer. The long-spurred type, of which we make a speciality, gives an elegant cut flower. We have now included some new and effective colours. Sow seeds under cover in February for transplanting in spring to a border, when, if the summer is favourable, they may bloom in autumn. If sown in summer sturdy plants will be ready by autumn for transplanting to the border, to flower next May and June. 1½ foot.

No. 189. **Carters' Choicest All Colours mixed.** Packets, price 6d., 1s., and 2s. 6d. each.

		Per packet—s. d.			Per packet—s. d.

ANTIRRHINUM or SNAPDRAGON.

(See Coloured Photograph opposite.)

Carters' Tall Large-flowered Antirrhinum.—This fine hardy perennial has been greatly improved in size and colourings. Height, 2 to 3 feet.

Sow the seed in pans or boxes from March to August, and transplant to bed or border when large enough, and if the withering flowers and seed pods are kept picked off, will last in bloom for a long time, and continue again the following year.

We now offer the following shades in self, striped, and blotched flowers with yellow and white lips:—

			Per packet—s.	d.
No. 177.	Crimson, rich colour (see Coloured Photo opposite, No. 7)	...	6d. &	1 0
„ 178.	Rose, delicate shade (see Coloured Photo opposite, No. 2)	...	6d. &	1 0
„ 179.	White, long spikes of pure white flowers (see Coloured Photo opposite, No. 3)	...	6d. &	1 0
„ 180.	Striped, endless shades of all striped and blotched varieties (see Coloured Photo opposite, No. 4)	...	6d. &	1 0

„ 182.	Fiery red, yellow lip	...	6d. &	1 0
„ 183.	Crimson, white throat, yellow lip (see Coloured Photo opposite, No. 9)	...	6d. &	1 0
„ 184.	Deep rose, white throat, yellow lip (see Coloured Photo opposite, No. 6)	...	6d. &	1 0

No. 44. One packet each of above 8 varieties, price 3s.

No. 186. **Coral Red.**—A lovely coral. 2 to 3 feet ... 6d. & 1 0

No. 185. **Carters' Tall Large-flowered, mixed.** 2 to 3 feet.

Per oz., 2s.; per packet, 6d., 1s., and 1s. 6d.

Carters' Large-flowered Intermediate Varieties.—This is undoubtedly the best form and of neat growth. Plants densely covered with flower spikes. These are well adapted for beds or borders. Height, 1 to 1½ feet.

No. 1457.	Carters' Fiery Belt. —A most striking colour, fiery brilliant orange-scarlet. A small group of this flower enlivens the whole garden. If used as a border plant it looks in the sunshine like a belt of fire, hence the name we give to it. (See Coloured Photo opposite, No. 1)	6d. &	1 0
„ 176.	Carters' Pink. —Quite a singular variety, and much to be recommended. Delicate pink with white throat (see Coloured Photo opposite, No. 8)	6d. &	1 0
„ 187.	Black Prince. —The darkest of all	6d. &	1 0
„ 188.	Picturatum. —Varied colours	6d. &	1 0

NEW

No. 47. **Carters' Butterfly.**—Large flowers of crimson purple, with pure white throat, giving a beautiful play of colour 1 0

No. 48.	Crimson, very rich colour (see Coloured Photo opposite, No. 7)	6d. &	1 0
„ 49.	White, pure white flowers (see Coloured Photo opposite, No. 3)	6d. &	1 0
„ 50.	Yellow, pale colour (see Coloured Photo opposite, No. 5)	6d. &	1 0

For dwarf Varieties, see page 127.

ANTIRRHINUM or SNAPDRAGON—Continued.

(See Coloured Photograph, page 126.)

Photographed and Copyrighted by J. C. & Co.

ARCTOTIS GRANDIS.

Arctotis.—Half hardy. An annual from S. W. Africa. Most useful for cutting, having long stalks.

No. 201.	Grandis.	Daisy-like flowers, pure white, lilac on the outside, with a lavender disc; of very easy culture, flowering all the summer.	2 feet	1	6
----------	-----------------	---	-----------	-----	-----	-----	-----	-----	-----	---	---

Argemone (PRICKLY POPPY).—Sow in March and plant out in sunny borders. Very easily grown.

No. 202.	Grandiflora.	Hardy annual; white	0	6
----------	---------------------	---------------------	-----	-----	-----	-----	-----	-----	-----	---	---

Aristolochia (THE DUTCHMAN'S PIPE).—Climbing plants, with curious pipe-shaped flowers. Sow in heat in March, and pot off.

No. 203.	Elegans.	Perennial; handsomely spotted. Pretty for conservatory...	1	0
„ 204.	Sipho.	Hardy climber; splendid foliage, and easily grown	1	0

Asparagus plumosus.—Easily raised from seed sown in early spring in heat. Valuable for cut sprays for personal and table decoration. Also makes a nice plant for covering a pillar in the conservatory, or for training over a balloon-shaped frame. *A. Sprengeri* is a grand basket plant.

No. 205.	Asparagus plumosus nanus	1s., 1s. 6d. &	2	6
„ 206.	Asparagus Sprengeri	1s. 6d. &	2	6

Asperula.—No. 207. **Odorata** (Woodruff), New Mown Hay. Perennial, white, sweet scented. 4 inches 0 6

CARTERS' RAY ASTER.

Awarded XXX for merit
and Highly Commended,
Royal Horticultural
Society's Trials, 1905.

Quite a new type of Aster. The flowers, which are very large, often 5 inches across, are produced on long stalks, and have prettily arranged quilled petals. Fine for cutting, as they last a week in water if cut before fully expanded.

The most noble flowered Aster in cultivation. With flowing feathery petals; grand for cutting.
Height, about 18 inches.

We have measured blooms this year 8 inches across.

For other varieties, see following pages.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

ASTER.

Since the introduction of this beautiful garden Flower into England by the late Mr. James Carter, about the year 1830, continuous skilful cultivation has produced the present developments in form and colour.

The whole group may be described as half-hardy annuals, the seeds being best sown under glass in early spring, and the seedlings pricked out into boxes or in frames for planting out or potting as the occasion requires, when they are ready about June.

The Aster in its various tall and dwarf forms makes a grand Bedding Plant, as its fullest beauty appears when the ordinary summer flowers are beginning to look rusty. The blooms are freely produced and last long, and are effective until spoilt by the frosts of autumn. The magnificent *Ray* varieties, see page 129; *White Plume*, see page 132; *Victoria*, see page 130, and the fashionable Single types on page 134, together with the *Comet* and Chrysanthemum-flowered types described below, should be largely grown in every garden.

NEW

No. 256. **Carters' Extra Early Ostrich Feather.**—A noble flower of the purest white, long curved flowing petals, grand for exhibition or table; blossoms seven to eight inches across Per packet, 1s. & 1s. 6d.

Comet.—A very attractive class, with flowing petals. For pot work or planting out. Fine for cutting. Height about 1½ feet.

No. 1482 2 6

BEDDING BEGONIAS—PERPETUAL FLOWERING, SMALL BLOOMS IN CLUSTERS.

"VERNON" TOM THUMB.—A charming free flowering and effective variety, with blood scarlet flowers and bronze coloured foliage. 2 6
No. 294

"FAIRY QUEEN" TOM THUMB.—A fitting companion to the foregoing. Colour delicate glistening rose, marked with white centre. 2 6
No. 295

The seed should be sown in heat at end of winter to produce strong flowering plants in the summer, in pans of very fine soil. Prick off the seedlings into pans and pot off later. Care should be used when sowing, as the seed is very fine. We can also supply tubers ready to start into growth in early spring. *See next page.*

These Begonias are invaluable for growing in beds and groups; also for pot culture. They come into bloom very early, and last all the season.

For Double varieties, see opposite page.

For dry roots, see next page and page 239.

Carter 237, 238, & 239, HIGH HOLBORN, LONDON.—1908.

"Your seeds surpassed my expectations. The Begonias surpassed everything I ever saw. I had several plants with blooms $8\frac{1}{2}$ inches across. Your Double and Fringed Begonias were the admiration of everyone that saw them."—GEO. SHEATH, Esq., Vale Mead.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1008.

Photographed and Copyrighted by J. C. & Co.

Balsam, Carters' Challenger (see Coloured Photograph opposite).—Matchless in form, substance, size, and colours.

Hints on Culture.—Balsams may be sown from the beginning to the middle of April in pans or on a slight hot bed in a light rich loam compost, covering the seed about half an inch, keeping the soil moist, but not wet. When the plants have formed the second pair of leaves they may be transplanted, four round the edge of a 6-inch pot, and gradually hardened off for transplanting out of doors; or they may be planted in a cold pit, 4 inches apart, as near the glass as possible, giving more air as the season advances until June, when they may be turned into the open borders, the warmest situations being the most suitable. If for pot culture, they must be divided and transplanted into single pots, once or twice into larger pots, picking off the flowers in the earlier stages of growth to give greater vigour.

No. 288. **Carters' Challenger. Superb mixture**, 1s. and 1s. 6d. per packet.

		Per packet—s. d.	
No. 289.	Carters' Rose Queen. —This beautiful variety produces enormous spikes of large double flowers of a delicate rose colour; excellent habit; very striking 1s. & 1 6	No. 45.	12 superb selected colours. Separate 3 6

CALCEOLARIAS AT MESSRS. CARTERS' EXPERIMENTAL NURSERIES.

A photograph of one of the Houses where we grow our own Calceolaria Seeds from cross-fertilized plants.

CARTERS' MINIATURE CALCEOLARIA.

A curious small-flowered type, quite unique in growth and character; makes a fine dwarf plant for stage fronts in Conservatory among other gem growths of similar habit.

No. 318. Calceolaria, *The Pigmy*. A dainty plant, with beautifully variegated blossoms. Height, 5 inches.
Per packet, 1s., 1s. 6d., and 2s. 6d.

No. 319. Calceolaria, *Tom Thumb*. Brilliant as the *Victoria Prize* varieties, but of dwarf habit.
Per packet, 1s., 1s. 6d., and 2s. 6d.

No. 320. Calceolaria, *The Gem*. Similar to *The Pigmy*, but the flowers are more of one colour.
Per packet, 1s., 1s. 6d., and 2s. 6d.

UNSOLICITED TESTIMONIALS.

"I am pleased to inform you that the Calceolarias and Cinerarias have been magnificent, and very much admired."—Mr. H. LILLINGTON, The Gardens, High View.

"I have great pleasure in once more recording another great success with your fine strains of Cinerarias and Calceolarias, which have this year been exceptionally fine and greatly admired by all who have seen them."—Mr. F. BUSH, The Gardens, Rookwood.

VICTORIA PRIZE CALCEOLARIAS.

"Those grown from your last year's seeds have been an unqualified success, several of the blooms measuring three inches across, and the colours and markings are magnificent. They are generally admitted by all the local gardeners who have seen them to be the finest they have ever known, and several of them have expressed their intentions of having their seed from you in future."—E. BARKER, Esq., Ilamsey.

Carters 237, 238, & 27, HIGH HOLBORN, LONDON.—1908.

CALLIOPSIS

(Coreopsis).

Hardy annuals and perennials. All are universal favourites and useful for cut flowers. The annual varieties should be sown outdoors in April in the place they are intended to flower, or, for earliest work, may be sown under glass, and then pricked out. The perennial varieties are best sown at end of summer under protection, and set out in spring in the border. The combination of colours—gold and maroon in most of the varieties—is very effective.

ANNUAL VARIETIES.

Carters' Tall.— $2\frac{1}{2}$ to 3 feet. Large flowered, branching habit; very useful for back of borders and cut flowers.

No. 321. Crimson,
3d. & o 6
,, 322. Crimson and
gold 3d. & o 6

Carters' Dwarf
(see Photograph

Canterbury Bell.—Hardy biennials. Sow in summer, transplant to a bed in autumn for flowering following year. They also make effective pot plants for spring flowering, sown in summer and potted in autumn, and kept in a cool frame through winter. No matter how careful the double flowering types are saved, some are certain to come single. The seed-bearing spikes should be cut out when the beauty is over, and more may come. Averaging 3 feet in height.

"How to Grow Flowers from Seeds or Cuttings," price 7d., post free.

CARNATION AND PICOTEE.

A popular and lovely flower, always in fashion. In colour and form unique, with a pleasing fragrance in many types. Whether grown in pots for conservatory decoration or in the garden beds for summer display, its charms are equally attractive. Our seed is saved with the greatest care, and should produce a large percentage of the very best flowers, but unfortunately, as with other florists' flowers, it cannot be guaranteed that every one will come double.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Choice Double Carnation.

+ No. 368. A splendid mixture of Selfs, Flakes, Bizarres, Fancies, and Yellow Grounds.
All varieties mixed. 1s. and 2s. 6d. per packet.

Sow in spring in cool frame, prick out, and plant out in good soil when strong enough.

For special cultivation in pots, see our Book "How to Grow Flowers from Seed," price 7d., post free.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Bloom in six months
from seed.

Carnations are favourites with all lovers of flowers. This new strain will bring them within the reach and the cultivation of everybody, as it is one of the most valuable introductions of modern times.

Sow under glass in January and February, and transplant as soon as ready. They commence to flower in July, producing a wealth of large blooms of great variety in colour until cut off by the frost, thus producing a supply after the perennial varieties are over. Being equally valuable for indoor cultivation, some can be potted and placed in a cool greenhouse, when they will provide a succession of bloom during the winter months. They produce a very large percentage of double flowers, and include a most varied assortment of Fancy, Yellow Ground, Bizarre, as well as Selfs, rich with delightful fragrance and diversity of colour.

No. 389.

Carters' Annual Carnation.

Per packet, 1s. 6d. & 2s. 6d.

CENTAUREA MARGARITA, OR GIANT WHITE SWEET SULTAN.

Centaurea Margarita, or Giant White Sweet Sultan.—The flowers of this greatly improved annual are much larger than those of any other, and the very essence of white purity. It is most deliciously scented, with long flower stalks to facilitate cutting, and when cut will last in water for a fortnight. In this respect alone it exceeds any other annual we can call to mind. We give this flower the highest possible recommendation. *For ordinary Sweet Sultans, see page 229.*

May be sown in pots and pricked out for early flowering, or in open borders in spring for general work.

				Per packet—s. d.

CARTERS' BRILLIANT PRIZE CINERARIA.

Awarded
SILVER FLORA
MEDAL,
Royal Horticultural
Society,
May, 1907.

Photographed and Copyrighted by J. C. & Co.

Carters' Brilliant Prize Cineraria.—The only strain awarded four Gold Medals of the Royal Botanic Society.

Our house has long been famed for its Cinerarias, and extra care has been taken in the selection of the plants this season. The colours are simply lovely; vivid self and brilliant bordered varieties, &c., unequalled.

Sow seed in pans filled with a good light sandy compost in spring up to the beginning of June, and place in a cool frame. Transfer to small pots as soon as the seedlings have developed their nice leaves, and pot on as the plants require it. They should be grown in a cold frame until frost necessitates their removal to a greenhouse. Even in winter they should not receive much artificial heat. Will come into bloom from Christmas to May.

- No. 441. **Choicest Colours saved from finest Flowers,** all colours mixed, Per packet—s. d.
 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
 „ 442. **Carters' Snowflake.**—Pure white 2s. 6d., 3s. 6d., & 5 0
 „ 443. **Choice Double.**—Of all the finest forms and colours ... 2s. 6d., 3s. 6d., & 5 0
 „ 444. **Single "Ixion."**—A novel and eccentric variety, with semi-quilled petals ... 1s. 6d. & 2 6

"Our show of Cinerarias from your seed of last season is simply grand, the finest I think I ever grew. They are greatly admired by all who have seen them."—Mr. D. FRVER, The Gardens, Ashfield, Notts.

"The Cinerarias from the seed I got from you last June are magnificent, both in size and colour, and it is the opinion of all who have seen them that they have never seen finer."—E. BARKER, Esq., Heamoor.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' DECORATIVE CINERARIAS.

155

CINERARIA
STELLATA.

CINERARIA
CACTUS.

Photographed from Nature and Copyrighted by J. C. & Co.

STELLATA.—This free-panicked variety has now obtained general approval, especially for decorative arrangements, for which purpose it has proved marvellously effective, and has proved to be a valuable adjunct to the much-admired Carters' *Brilliant Prize*. It should be raised and treated the same as the other greenhouse varieties.

No. 446. Carters' Choicest Mixed, per packet, 1s. 6d., 2s. 6d., 3s. 6d., and 5s.

NEW

CARTERS' CACTUS.—An entirely new break in Cinerarias; the edges of the florets recurve like a single Cactus Dahlia. The colours include white, blue, blush, violet, mauve, and some have white round the dark disc tipped with violet, blue, &c. The flowers when cut last a long time, and by their lightness and elegance make charming table decorations.

No. 429. Carters' Choicest Mixed, per packet, 2s. 6d., 3s. 6d., and 5s.

CRUENTA HYBRIDS.—Similar in form and habit to the *Stella* varieties, but more compact.

No. 447. Per packet, 1s. 6d. and 2s. 6d. each.

MARITIMA.—A well-known hardy silver-foliaged perennial, for bedding or mixed borders; 1½ feet. Seeds should be sown in pans in early spring under glass, and the seedlings pricked off into boxes, hardening before planting out.

No. 448. Per packet, 6d. and 1s.

Extract from The "Gardener's Chronicle," May 4th, 1907.—"Messrs. J. CARTER & Co., High Holborn, London, exhibited a semi-circular group of Cinerarias, arranged on the ground floor. Plants of the stellate type were placed at the back, and others formed two small groups near the front, the rest of the exhibit being composed of approved varieties of the florists' or large-flowering strain. (Silver Banksian Medal.)"

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CLARKIA.—Well-known HARDY ANNUAL, of great decorative value and easy culture. Seed should be sown in spring in the open border. The Elegans variety are excellent for vases, the long spikes continue to bloom for many days.

NEW

No. 1486.	Elegans, New Blotched.	Pale pink, flaked with crimson ...	6d. &	1	0

CARTERS' BUTTERFLY.

Carters' Butterfly Cyclamen.—In this

charming variety, the somewhat formal bearing of the older varieties is replaced by a more graceful habit, and the colours are surprisingly varied and beautiful. It may be observed that the petals of the flowers are broad across the top, and the edges finely curled or waved. The beauty of the variegations in colour is captivating. The blossoms being carried on a long and slender stalk, they will become a feature in the making up of high-class bouquets, and the entire plant makes a welcome addition to table decoration. Choicest mixed.

No. 521 — Per packet, price 1s. 6d., 2s. 6d., and 5s. each.

Carters' Choice Single Dahlia.

Dahlia.—CARTERS' CROSS-FERTILISED STRAINS. Our strain has been specially hybridised and fertilised with various species, and should produce some novel kinds. Sow the seed in early spring, in heat, and pot off. Plant out as soon as large enough in June. Plants raised very early will bloom the same season. We can supply plants in May, see page 247. Per packet—s. d.

DELPHINIUMS.

Carters' Annual Delphinium Blue Butterfly

(*see Illustration*).—The greatest acquisition in blue annual flowers for many years. The Royal Horticultural Society, when granting it the Award of Merit, stated in their report that it is "a dainty annual of bushy branching habit, and very floriferous." The seed should be sown early, in heat, and grown on in pots until ready for bedding out. Late sowings do not make effective plants until too late in the season.

No. 539. Per packet, price 1s. and 1s. 6d.

The **Perennial Delphiniums** are best sown in summer, as they then make strong plants to flower following season. They can also be sown early in spring, and are very effective in borders during the early summer the following year.

Per packet—s. d.

Extract from the *Gardeners' Magazine*, May 4th, 1907.—Report of Royal Horticultural Society's Meeting, on April 30th, 1907 :—

"Messrs. J. Carter & Co., High Holborn, arranged a beautiful group of Cinerarias, including both the stellate and florists' forms. In the latter plants there could be seen indications of a departure from the extremely compact habit that has prevailed during recent years, and there is no doubt that the freer growth improved their decorative effect. In both sections the flowers were bright, of good form, and the range of coloration was exceptionally wide."

CARTERS' LARGE-FLOWERED DWARF DIANTHUS.

Dianthus Chinensis (INDIAN PINK). Biennial. We consider the *Heddiwigi* section of the *Dianthus* introduced by our house from the East, and the parent of many of the best types, to be one of the finest additions to our annual flora for the last fifty years, and the varieties detailed on the next page are the improved results from the original importation. Sow in spring in boxes or pots, and transplant to where intended to bloom. Seeds of all the improved types may be also sown at the end of summer and grown on in pots through the winter under fairly cool treatment. They will make robust plants at end of spring, and become useful in the decoration of the conservatory. (*See opposite page.*)

No. 564. CARTERS' LARGE-FLOWERED DWARF DIANTHUS. 6 to 8 inches ... per packet, 6d., 1s., & 1s. 6d.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

DIANTHUS.—Continued.

Per packet—s. d.

CARTERS' CARMINE KING ESCHSCHOLTZIA.
 Certificate of Merit, Royal Horticultural Society, July, 1905,
For full particulars, see opposite page.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

ESCHSCHOLTZIA (CALIFORNIAN POPPY).—Hardy annual (or biennial) of immense utility for mixed borders. Hardy, bright, and free-blooming, and of the easiest culture. Sow in open in spring, and thin out.

No. 581. **Carters' Carmine King** (*see Illustration on opposite page*). Awarded a Certificate of Merit by the Floral Committee of the Royal Horticultural Society, July, 1905. A beautiful carmine-rose colour, in many instances as intense on the inside as on the outside of the petals, which gives it an altogether novel and beautiful effect in Eschscholtzias. (*See reports below.*)

"This is one of those floral gems that are only met with occasionally. The flowers when in the bud are charming objects for decorative purposes, and when fully expanded are alike useful for the dinner table."—Mr. H. C. Prinsep, Head Gardener to Viscount Portman, The Gardens, Buxted Park.

Price per packet, 6d. and 1s.

NEW

No. 1490. **Eschscholtzia Dainty Queen**. A beautiful new shade in Eschscholtzias. Colour a tender blush or pale coral pink, slightly deeper towards the edges, with a groundwork of delicate cream; same colour inside as outside the flower. The blossoms stand well above the bright green foliage, giving it a singularly attractive appearance.

Price per packet, 1s.

No. 1491. **Carters' New Double** (CROCEA FL. PL.). A great improvement on the old variety, producing a large percentage of double flowers.

Price per packet, 1s.

CARTERS' INVINCIBLE PRIZE GLOXINIA. HABIT OF PLANT.

CARTERS' INVINCIBLE PRIZE GLOXINIA.

AWARDED THREE SILVER CUPS, Royal Horticultural Society.
TWO SILVER-GILT MEDALS, 1904-1905.

Carters' Invincible Prize—It may be asserted without fear of contradiction that no flower for exhibition produces a greater effect than a first-class group of Gloxinias. The superb mixture we offer under the name *Invincible* is magnificent. It contains all the best self-colours, crimson, sapphire, purple, rose, blush, violet, white, &c., also the finest edged, tipped, ringed, and shaded varieties, together with the most beautiful spotted or marbled kinds, and is the finest we have seen.

“I had a 5s. packet of your Gloxinias this summer, and have got over 400 plants in “60” pots, and several showing for bloom. I should almost think this is as many as anyone could get from such a small quantity of seed.”—Mr. W. CANTILL, East Ham, August 14th, 1907.

Culture.—Sow in well-drained pans from January to March (or in the autumn), fill the pans with soil consisting of a mixture of half peat and half leaf mould, with a small quantity of pulverised charcoal and silver sand sifted very fine to within half an inch of the rim; water with fine rose, then sow the seed thinly, taking care not to cover it with soil; place in a temperature of 75 deg., and cover the pans with a piece of shaded glass, gradually removing the same as the seedlings progress. When large enough to handle, prick off into pans at about one inch apart, then pot off into single pots. Many will soon attain the requisite strength to go into 5-inch or 48 pots, and will bloom in August and September of the same year. The potting-off soil should consist of one-half good loam, one-half fibrous peat, with a good sprinkling of sand and broken charcoal.

For price of Gloxinia Bulbs, see page 247.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

ORNAMENTAL GRASSES FOR DECORATIONS.

Cultivation.—Sow the seeds in a cold frame in February or March, and prick off into 6 in. or larger pots (about four or six plants in a pot) when the seedlings are sufficiently large, and protect from winds and heavy rains.

GODETIA.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' BEAUTIFUL DWARF GODETIA, GLORIOSA (*see opposite page*).

The care and culture bestowed upon Godetias have produced some marvellous varieties, far exceeding in size of blossom and brilliance of colouring the older kinds. The appended selection contains the most approved sorts of the present day. Perhaps there is no class of flower producing more abundant blossom. The habit of the species is excellent, and the glossy silky texture of the petals is worthy of inspection. The crystal beauty of Godetia *Lady Satin Rose* and *Gloriosa* is remarkable. The Godetia makes an excellent cut flower, a spike of half-opened buds continuing to develop for a long time if fresh supplies of water be given daily. It also makes an effective pot plant for the conservatory stage when sown at end of summer and kept growing through the winter in a cool house.

GODETIA.

One of the showiest of all annual flowers.

We have grown them in large areas for many years, and were awarded the First Class Certificate of the Royal Horticultural Society for that beautiful variety, Lady Satin Rose, perhaps the finest annual flower ever raised. The Godetia makes an excellent cut flower.

Photographed and Copyrighted by J. C. & Co.

—A new annual plant from East Africa, resembling the Zanzibar Balsam in habit and leaf and shape of blossom. Colour vermilion red. A beautiful plant for half-shady places and pots. Most striking novelty. Awarded a first class certificate, R.H.S., 1905.

No. 738 ... 1 0

Photographed and Copyrighted by J. C. & Co.

KOCHIA SCOPARIA VAR. TRICHOPHYLLA.

No. 750. Kochia Scoparia, or Mock Cypress, is one of those old-time plants that fell out of general cultivation for many years. An improved type has now been evolved, which makes a pretty decorative plant, with a habit much resembling one of the compact evergreen shrubs. In Kochia Trichophylla we have an annual with feathery foliage, which changes as the summer advances from a light green to a rich crimson. The seed should be sown in spring under glass, and the seedlings potted off singly, to be ultimately bedded out or plunged in the pots in which they are growing. The plants should be pinched back and trimmed to shape when necessary. Height about 2 feet.

Price per packet, 6d. and 1s.

Extract from the *Journal of Horticulture*, June 6th, 1907, re Temple Show:—

“Messrs. Carter & Co., High Holborn, occupied the entrance as usual. Their exhibit was of a miscellaneous character, which included a central group of Cinerarias, both of the hybrid and stellata types. Begonias, both double and single, were excellent, as were also Petunias and some grand Gloxinias. The same firm also made a fine display of Verbenas to name, Gladioli, and Schizanthus. Needless to add, this exhibit produced an imposing effect.”

Carter's 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

LOBELIA.

Photographed and Copyrighted by J. C. & Co.
LOBELIA, CARTERS' DARK COMPACT.

Very popular garden plants. The compact-growing varieties are sown in winter under glass, and transplanted into boxes for growing on to be ready by the bedding-out season. The spreading varieties are suitable for hanging baskets and window box edgings, whilst the true perennial species are grown as pot plants or single specimens in beds for summer decoration. We would direct attention to the new double-flowered form on opposite page. This can only be offered in plants.

**CARTERS'
DOUBLE-
FLOWERING
LOBELIA.**

Flowers rich azure blue, very freely produced.

Size of bloom.

Photographed and Copyrighted by J. C. & Co.

This fine introduction does not produce seeds, and we offer it in plants only. It makes a fine thing for hanging baskets, and also does well in borders, and is freely increased from cuttings as it propagates very easily.

PLANTS ONLY.

1s. each; 10s. 6d. per doz.

"Carters' Double Blue Lobelia.—What a splendid decorative plant this new double-flowered blue Lobelia makes. A short time ago in Messrs. Carter & Co.'s nurseries at Forest Hill we saw a large number of plants growing in pots, but so even had the plants grown that the pots were hardly visible. Buds and flowers are most abundant, and we can well imagine what a fine sight the plants in full bloom must have been. Other plants for which the firm of Carter & Co. is famous were finely represented. Even the Cinerarias were not yet over owing to the late season, and we were able to note the many remarkably fine and varied colours that are typical of Carters' strain of Cinerarias. The Calceolarias, too, were very fine, as visitors to the Temple Show had an opportunity of seeing. Of these valuable greenhouse plants Messrs. Carter & Co. possess a strain that is uncommonly good. We were struck with the plants of Schizanthus, which were in full bloom. There are few more valuable decorative plants than the Schizanthus. Well-grown plants, such as we saw at Forest Hill, gave a good idea of the value of the Schizanthus when properly treated. Messrs. Carter & Co. also have a collection of tuberous Begonias that comprises varieties of great merit. Some of the newest varieties are as perfect in form as a Camellia or Rose Bud, while the shades of colour through which they range are indescribable."—*The Garden*, July 7th, 1906.

SILVER KING. LEGION OF HONOUR.

FRENCH MARIGOLD.

This showy annual can be sown in spring and thinned out where expected to bloom, they may also be sown in March in boxes or pots under glass, then transplanted into other boxes, three inches apart, to make sturdy stuff for planting out in June or earlier. Marigolds are profuse bloomers, particularly so if all dead flowers are cut off.

DWARF SINGLE-FLOWERED VARIETIES.

Per packet—s. d.

The following kinds are extremely beautiful in the mixed border, whether singly or in clumps; habit dwarf and bushy, and covered with continuous bloom. 1 foot. First-class annuals.

CARTERS' PERFECTION MIGNONETTE.

A giant red-flowered variety with a delicious scent.

IMPORTANT

Carters' Perfection Mignonette received the Highest Award at the Irish International Exhibition, 1907.

This fine strain is a very great improvement, and owing to its robust habit the seedlings require plenty of room, when they will make bushy plants resembling Intermediate Stocks. The spikes of bloom are larger than any other variety, and the habit much less straggling. If the seed-pods are kept pinched off, the beauty of the plant will extend over a long period, and with care in this respect will continue until cut down by frost.

No. 859. Per packet, 6d., 1s., 1s. 6d., and 2s. 6d.

(For other varieties, see opposite page.)

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

MIMULUS.

Photographed and Copyrighted by J. C. & Co.
CARTERS' QUEEN'S PRIZE MIMULUS.

Half-hardy annual. To those who know only the original kind, the present magnificent specimens will come as a delightful surprise, the blossoms being of grand size and richly coloured. Besides being of service in beds and borders, they make nice pot plants.

Sow in early spring, in pans under glass, and prick off into boxes, and plant out when hardened. For pot work, the seedlings should be pricked out, and potted off in good light compost, and kept in warm frame.

Per packet—s. d.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

DWARF NASTURTIIUM.—*Continued.*

Nasturtiums, both climbing and dwarf, are of the easiest culture, and anyone desirous of having a display of the most brilliant flowers, without any trouble beyond sowing the seed, should select this delightful family, as they will give off their best efforts through the brightest of the summer, merely needing the seed-balls picked off. If these are permitted to mature, the beauty of the plant is soon lost.

Although the colours of the dwarf varieties contain many more shades and tints than the climbing section, both may be grown near the ground if the situation requires it, but the Climbing Nasturtium shows off its best features when climbing over a fence or clambering up rustic woodwork.

Those who recollect the ordinary garden Nasturtium of "sixty years since" can best appreciate the immense advance we have made in the colour, habit, and beauty of these most invaluable adjuncts to every garden; and we are gratified to think that the greater number of new varieties now in cultivation are the result of our own persistent care and attention at our **Seed Farms in Essex**, where in 1858 we raised and exhibited the **Scarlet Tom Thumb** variety, and received a certificate for it from the Floral Committee of the Royal Horticultural Society. They make the most elegant of edging plants to floral walks.

CLIMBING NASTURTIUMS AND TROPÆOLUMS.

Photographed from Nature and Copyrighted by J. C. & Co.

The Climbing Nasturtium has long been a popular annual flowering plant, as when once the seed is sown it requires no further attention. It is invaluable for covering unsightly spots, as when the position does not admit of its climbing, it is equally at home as a creeper. The seeds must not be sown until all chances of frost are over.

NEMESIA, CARTERS' ORANGE PRINCE.

Per packet—s. d.

Nemesia.—Half-hardy annual. Nearly related to the *Linaria*; free-blooming dwarf bushes, for pot culture and open borders. Sow in spring under glass, and transplant; or sow out of doors in May, in patches, where they are intended to flower.

No. 916. *Strumosa*. In a variety of colours. 1 foot 6d. & 1 0

NEW No. 1496. **Nemesia Strumosa Grandiflora.** Spotted ... 1 0

NEW No. 1497. **Nemesia Bicolor.** White, with lilac; most graceful 1 0

NEW No. 1461. **Nemesia Nana Compacta Grandiflora "Orange Prince."**

Gained an Award of Merit of the Royal Horticultural Society, July, 1906.

This newest form of *Nemesia* eclipses previously known varieties, by reason of its large flowers, intense orange colour, and dwarf compact habit, each plant forming a small bush of flowers. It must prove to be one of the most effective bedding or border plants. It can be used both as an annual, or if sown in the autumn with indoor treatment will prove a most brilliant pot plant for spring use.

Height, 6 to 8 inches.

Price 6d. and 1s. per packet.

Per packet—s. d.

Nemophila.—Hardest of annuals, and of the easiest culture. Makes a very effective front row to a bed or border, and should be sown out of doors in spring, in patches, where they are to flower.

PERILLA.—Ornamental foliaged hardy annual. Raise seedlings in heat, prick off into boxes, harden off, and plant out in June.

- No. 945. **Compact Curled.** Rich colour; dark purple foliage. 1 foot 6d. & 1 0
- „ 946. **Nankinensis.** Metallic purple-bronze leaves. 1½ feet per oz., 1s. 6d.; 3d. & 0 6

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

PANSY.

Photographed and Cop righted by J. C. & Co.

- | | | Per packet—s. d. |
|----------|--|------------------|
| No. 947. | Carters' International Prize. —A superb mixture of the largest and best types in every class. Will produce enormous blooms in all the richest colourings and markings. As the name suggests, it is the best of all English and Continental strains, grown under our personal supervision, and acclimatised in this country 1s., 1s. 6d., & | 2 6 |
| „ 948. | Carters' Giant Curled. —Large flowers of striking form and immense fullness, giving them the appearance of being somewhat double. They are variously coloured in all the richest shades, markings, and lacings, and prettily frimbriated. Quite a new class of the greatest beauty 1s., 1s. 6d., & | 2 6 |
| „ 949. | Carters' Prize Show. —The largest blotched and richly belted types. Very fine for exhibition or cultivation in pots 1s., 1s. 6d., & | 2 6 |
| „ 950. | Carters' Fancy Striped. —Elegantly striped, splashed, and mottled, a very curious combination of colours that cannot fail to elicit astonishment. The flowers are large and freely produced, and the habit of the plant dwarf and compact 1s., 1s. 6d., & | 2 6 |
| „ 951. | Carters' Peacock. —The only variety possessing the true Peacock blue colours. Introduced by our House 6d., 1s., & | 1 6 |
| „ 952. | Lord Beaconsfield. —A lovely Pansy, the lower petals being a rich dark velvet blue and the upper ones a silvery blue 6d., 1s., & | 1 6 |
| „ 953. | President Carnot. —One of the prettiest grown. All blue flower with a wide belt of white round the outer edges. Very effective in beds and borders 6d., 1s., & | 1 6 |
| „ 954. | Fairy Queen. —Rich lavender blue, edged with white; very effective and profuse bloomer, but not so large in size as Carters' <i>International Prize</i> 6d. & | 1 0 |
| „ 955. | Silver Edged. —Deep maroon, with pure white margin; very effective and profuse bloomer, but not so large in size as Carters' <i>International Prize</i> 6d. & | 1 0 |

PANSY.--*Continued.*

A PRETTY GARDEN OF PANSIES.

The following selection includes all the largest of the self-coloured varieties :—

		Per packet— s. d.	
No. 956.	Carters' Blue. —True blue ; distinct shade ; very large 6d. &	1 0
„ 957.	„ Jet Black. —The first and best ; rich velvet texture ; extra fine strain ...	6d. &	1 0
„ 958.	„ Giant White. —A lovely flower, without eye ; very pure ...	6d. &	1 0
„ 959.	„ Giant Yellow. —Bright, rich, and pure ; a very effective shade ...	6d. &	1 0
„ 960.	„ Rich Maroon Red. —A beautiful and showy thing ; quite distinct ...	6d. &	1 0
„ 961.	„ Rich Purple. —Large and showy ; bold massive flowers ; very fine ...	6d. &	1 0
„ 962.	Royal Standard. —Red golden yellow	6d. &	1 0
„ 963.	Emperor William. —Blue, with dark eye	6d. &	1 0
„ 967.	Mixed Pansy. —Ordinary	3d., 6d., &	1 0

It is now more than half a century since the late Mr. James Carter took this plant in hand with a view to its improvement in size and range of colourings, and one of our earliest successes was *Jet Black Pansy* (see No. 957). We also introduced the *Peacock Pansy* (see No. 951). Both are still amongst the best in cultivation.

Cultivation.—The Pansy will succeed in any soil that is not too hot and dry, and if a special compost is made for them it should consist of one-third rich loam, one-third leaf mould, and one-third well-decayed dung. In early spring the seed should be sown in frames or in boxes for summer and autumn blooming, and later on sowings may be made about July out of doors in a partially shaded place, transplanting in October or November into where they are intended to flower the following season. The final position should be an open one, and the plants not less than 6 inches apart. There should be no check in their progress either by cold winds, very hard frosts, or long droughts. Nor should they be watered during the hottest months with very cold water. We have classed each type so that Pansy lovers have an opportunity of securing a large and varied choice, all representing the very best strains in cultivation.

“I had a magnificent show of your Pansies early in the season.”—The Rev. G. H. HUDDLESTONE, West Marsh Vicarage, Ash.

“This year my blooms from your seed of *International Prize* are better than ever.”—Mrs. MACMAHON, Bournemouth.

“I should like you to hear of the success of a 2s. 6d. packet of Pansy Seeds I bought in your place in Holborn at the end of May last. It produced 550 good plants, many of which flowered in the autumn. Some of the plants are now full of bloom, and, altogether, the result of the expenditure of 2s. 6d. is highly gratifying.”—Mr. S. W. L. FERNANDES, Doncaster.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' EMPRESS PETUNIA.

Carters' Empress Petunia for Conservatory or Bedding.—We have been many years perfecting this magnificent type, which now embraces many delicate shades of colour, the majority taking the lovely form as shown in the photograph above, which represents a natural bloom. The elegant pencilling in the throat is quite a feature of this modern introduction. It also possesses such a robust but compact habit that it is valuable as a bedding plant, where the fine flowers have a rich effect.

No. 968.—Price per packet, 1s., 1s. 6d., 2s. 6d., and 5s. each.

(For other Petunias, see opposite page.)

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' GRAND STRAINS OF PETUNIA.

As frequently exhibited at the Royal Horticultural Society Shows, and awarded, in conjunction with other Improved Flowers,

MANY SILVER CUPS AND HIGHEST PRIZE MEDALS.

Carters' Emperor Strain of Single Petunia, for Conservatory or Bedding.—A great improvement upon the old-fashioned Petunia; flowers twice as large, some self-coloured, others parti-coloured. A bed of these is an object of great beauty during summer, and they are equally effective as pot plants for the winter decoration of the conservatory.

No. 977.—**All colours, mixed**, price 1s., 1s. 6d., 2s. 6d., and 5s. per packet.

Carters' Empress Strain.—See opposite page.

- No. 969. **Purple Prince.**—Rich velvety, with scalloped edge.
 „ 970. **Crimson King.**—Very showy; rich.
 „ 971. **Clematis Blue.**—Rare shades of light and dark blue.
 „ 972. **Green Bordered.**—A very curious combination of purple and green.

- No. 973. **Queen of Roses.**—Rich cerise; very chaste.
 „ 974. **Laced and Fringed.**—Very pretty, deep fringed edges.
 „ 975. **White Pearl.**—Very pure and fragrant.
 „ 976. **Striped.**—Effective and showy.

Each of the above, price 1s., 1s. 6d., and 2s. 6d. per packet.

No. 65.—Six varieties (small packets), 5s.

Per packet—s. d.

NEW

No. 1498. **Carters' New Marbled.**—The largest blossoms are of great beauty;

in four colours, beautifully blended 1s 6d & 2 6

No. 979. **Carters' Splendid Double Petunia.**—A superb mixture, producing from 25 to 40 per cent. of double flowers.

Per packet, 1s., 1s. 6d., 2s. 6d., and 5s. each.

No. 980. **Double Pigmy, Striped.**—A little beauty for pots.

Per packet, 1s., 1s. 6d., and 2s. 6d. each.

No. 981. **Carters' Holborn Star.**—A new and attractive bedding Petunia of the character of *Inimitable*, with stars on a background of richest purple crimson; compact and floriferous, 6d., 1s., &

No. 982. Countess of Ellesmere 6d. & 1 0
 „ 983. Compacta grandiflora 6d. & 1 0

No. 984. Mixed Ordinary varieties ... 6d. & 1 0
 „ 985. Morning Star. Carmine rose with white star... .. 6d. & 1 0
 „ 986. Crimson 6d. & 1 0

No. 987. Dark Violet... .. 6d. & 1 0
 „ 988. Striped 6d. & 1 0
 „ 989. White 6d. & 1 0

PETUNIAS.

“Last year I took First Prize for your Single Petunias in open competition.”—Mr. J. W. JONES, Pembroke Dock, *March 6th*, 1907.

“It may interest you to know that a bed of Petunia grown from your seed was much admired this summer, and has continued to be a mass of flowers until to-day, October 18th, when 12 degrees of frost brought their gay display to a conclusion.”—L. T. PAWLF, Esq., Rows!am.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1903.

Photographed and Copyrighted by J. C. & Co.

PHLOX DRUMMONDI.

CARTERS' LARGE FLOWERED.

The great advance recently made in both the size and colourings of this popular annual should ensure its again becoming a favourite for growth in beds and borders. It makes a most effective edging if the growths of the taller types are kept pegged down. Another point of importance in the culture of this pretty flower is the fact that it does not like being watered with cold pipe water, especially overhead; it spoils the foliage and ruins the truss. This section may be expected to reach the height of 1 foot.

A BED OF CARTERS' CLUSTER POLYANTHUS PRIMROSES.

The strain grown in the Royal London Parks.

Polyanthus Cluster Primrose.—The superb strain we here offer of these lovely spring flowers improves in extent of colours each year, and there is no other flower which produces such a chaste, brilliant, and enduring effect during the early spring months, either singly or in masses in beds, about the same time as the Hyacinths and Tulips. Sow in spring or summer, in prepared seed bed, and transplant when large enough.

No.		as grown in the Royal Parks.		Per packet—s. d.

“I have got such a grand show from your Polyanthus seed which I had last year. Everyone who has seen them has admired them. All the seeds which you have sent me have come up splendidly.”—Mr. GIBSON, The Gardens, Windy Hall.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Photographed and Copyrighted by J. C. & Co.

CARTERS' GARDEN PRIMROSE.

The Primrose is one of those plants that resents too much coddling, and sometimes when great care is taken over the seeds they refuse to grow. The simplest plan is to sow them in the open ground, in a partially shaded place, from May to July. Just scratch the seed in with a rake and firm the surface, when under the influence of genial showers they will soon come up. The Blue Primrose may be sown in borders at the same season.

						Per packet—s. d.
No. 1028.	Primrose, Blue.	A great novelty in blue in various shades	1s., 1s. 6d., & 2 6
„ 1029.	Primrose, Carters' Choice Mixed.	A mixture of all obtainable colours, continually improved by cross fertilisation	6d., 1s., & 1 6
„ 1030.	Primrose, Yellow	3d., 6d., & 1 0

Photographed and Copyrighted by J. C. & Co.

Carters' "Shirley" Poppy (SILK OR GHOST POPPY).—This lovely garden annual Poppy has probably received its various names from its delicate texture and almost shadowy forms. The shades of colour are endless and we again offer a strain of unusual beauty, as the stock has been **rigidly selected** by its original nominator, the Rev. W. WILKS, Secretary to the Royal Horticultural Society. It makes a delightful border plant, and is fine for sowing at the sides of grassy walks or along paths where nature's growths give a wilderness-like effect to the surroundings.

No. 1031. Price per packet, 6d., 1s., and 1s. 6d.

OTHER SINGLE ANNUAL POPPIES.

								Per packet—s. d.
No. 1047.	PEACOCK (<i>pavonium</i> or <i>unbrosium</i>).	—Charming miniature blossom; crimson with black spot.

„ 1051.	Carters' Superb Annual Poppies.	—A mixture of all sorts and colours; single and double	3d, 6d., 1s., 1s. 6d., &	2 6

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

POPPY (PAPAYER), DOUBLE ANNUAL VARIETIES.

These showy hardy flowers continue to absorb the attention of the greatest number of amateur gardeners, and deserve the position from their varied and intrinsic beauty. Sow thinly in patches, rows, or beds in spring where the plants are intended to bloom during early summer. The show may be extended if the seed pods are kept cut off. When used as cut flowers, they should be picked early in the morning before opening out.

Per packet—s. d.

ICELAND POPPY.

The colourings in this dainty Poppy have been added to considerably during the past few years, and a good collection is an attractive addition to the garden border. It is perennial in character, although when sown very early it often produces flowers the first season.

Iceland Poppy.—The merits of this species are great; of easy growth, adapted for pot or garden work, first class as cut flowers, and neat in appearance. 1 foot.

Sow in patches where plants are to bloom, or in prepared seed bed, and transplant. They make good rockery plants.

Scabious.—See page 218.

PORTULACA GRANDIFLORA

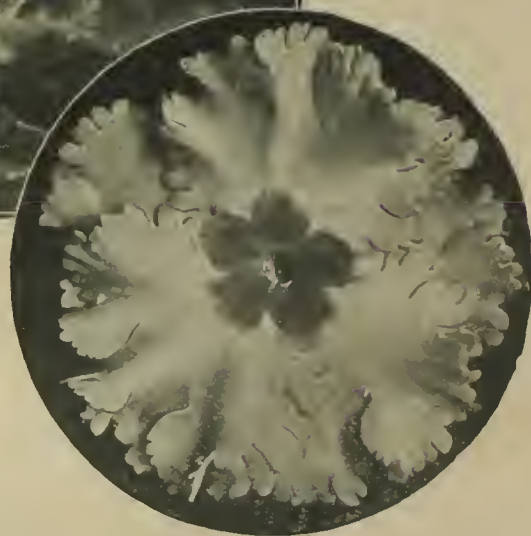

Carters Holborn Coral Primula.

For full description see opposite page.

PRIMULA
HOLBORN
CRESTED.

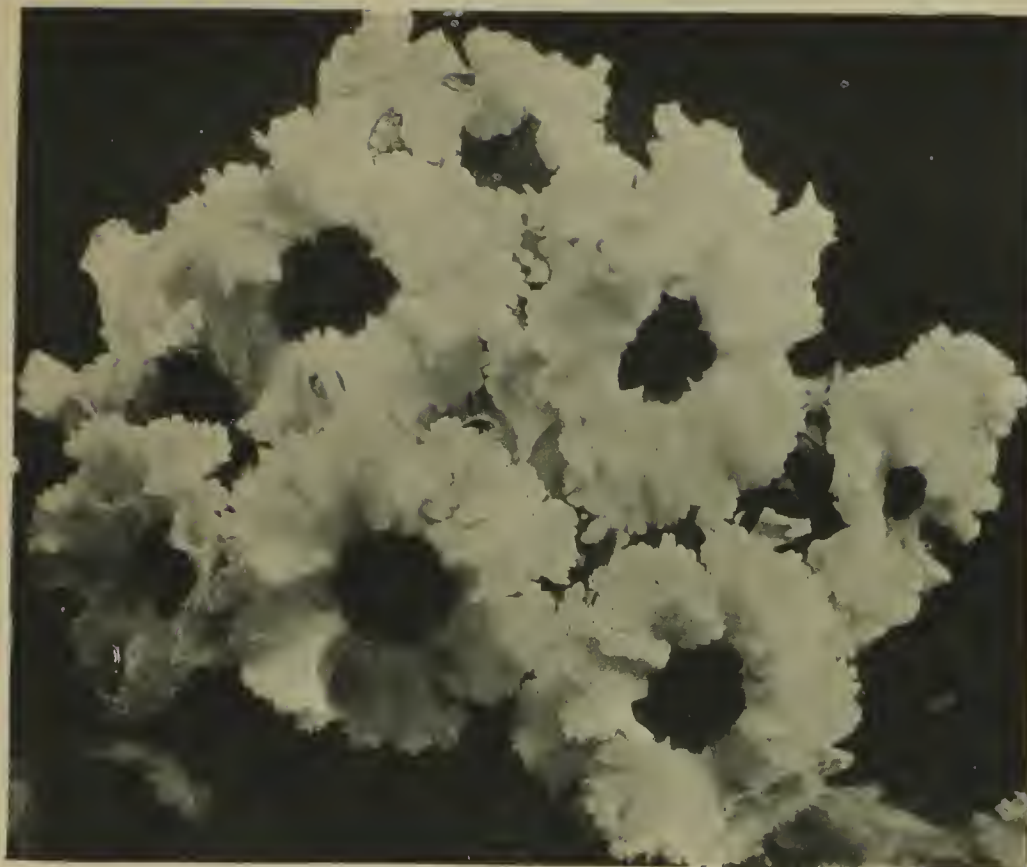

No. 1504. **PRIMULA HOLBORN CRESTED** (*see Photograph above*).—A very distinct and beautiful Primula of the Giant section, the result of a cross between *King Edward* and *Holborn Ruby*. The large pink flowers, beautifully fringed, carried on a fine truss thrown up well from the vigorous green crested foliage, making it a unique variety from all other Primulas.

Per packet, 2s. 6d., 3s. 6d., and 5s.

No. 1464. **PRIMULA HOLBORN CORAL** (*see Photograph on opposite page*).—This Giant Primula is the result of a cross between *Princess May* and *Holborn Salmon*. The trusses of rich coral red flowers of immense substance and size, with a beautiful light green eye, together with a strong habit and dark green foliage, make it a very valuable addition to our Giant type of Primulas.

Per packet, 2s. 6d., 3s. 6d., and 5s.

Photographed and Copyrighted by J. C. & Co. REDUCED IN SIZE.

"You will be pleased to hear that on my first exhibition this year I took First Prize for Primulas, your Carters' Prize Single and Stellata."—J. M. PARAMOR, Esq., Margate.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

No. 1074. **CARTERS' BOUQUET PRIMULA.**—We have during the last half-century conducted a number of experiments each year in the cross fertilisation of Florists' Flowers, and amongst others *Primula sinensis* has received a large share of attention. About ten years ago a curious form presented itself as the result of our efforts in the shape of a type which produces its flowers directly from the base or stool of the plant in the manner of the common Primrose, and these flowers being surrounded with a leafy calyx, in which they remain fixed for a long time, it was suggested that the form might become valuable as a button-hole flower. In addition to this peculiarity, the plant, as growth advances, throws up a centre stem in which several of these tightly fixed flowers appear, being surrounded with a crested leafy growth. The flowers are very large, prettily fimbriated, and of the purest whiteness.

Per packet, price 1s. 6d., 2s. 6d., 3s. 6d., and 5s.

PRIMULAS OF EARLIER INTRODUCTION.

			Per packet—s. d.
No. 1075.	CARTERS' CARMINE.—A lovely rich colour...	1s. 6d., 2s. 6d., 3s. 6d., &	5 0
„ 1076.	CARTERS' WHITE QUEEN.—Dainty white with pale green foliage	1s. 6d., 2s. 6d., 3s. 6d., &	5 0
„ 1077.	CARTERS' ROSE.—A really pure rose colour of exceptional size	1s. 6d., 2s. 6d., 3s. 6d., &	5 0

No. 1079. COMPLETE COLLECTION OF 16 VARIETIES FOR 25s.

CARTERS' DOUBLE PRIMULAS.

No. 1081.	CARTERS' "CARMINE EMPRESS." Rich colour, the deepest of all the double varieties; a free bloomer, of excellent habit, high-class flower 1s., 2s. 6d., &	3 6	No. 1084.	CARTERS' "LILAC QUEEN." Remarkably free bloomer; a good cut flower, superior to that generally sold as double blue	1s., 2s. 6d., &	3 6
„ 1082.	CARTERS' "DAYBREAK." Re- markable colour, varying from apricot rose to terra-cotta 1s., 2s. 6d., &	3 6	„ 1085.	CARTERS' "SNOWFLAKE." A most excellent and useful variety, and in great demand for its earliness in bloom 1s., 2s. 6d., &	3 6	
„ 1083.	CARTERS' "DARK ROSE" (Prince of Wales). A choice variety that has been in great demand for a long period ... 1s., 2s. 6d., &	3 6	„ 1086.	CARTERS' "STRIPED." An indis- pensable variety in forming a complete collection 1s., 2s. 6d., &	3 6	
No. 1087.	Complete Collection of above 6 Choice varieties for 5s.					
„ 1088.	Carters' Prize "Double" Primula, Superb Mixture, 1s., 2s. 6d., 3s. 6d., and 5s. each.					
„ 1089.	Carters' Prize "Fern-Leaved" Single Primula, Mixed, 1s., 2s. 6d., and 3s. 6d. each.					

Culture.—Sow in pans of finely sifted soil in spring, and pot off singly into thumb pots when large enough to handle. They require to be raised in heat and kept growing in cool house or frame through the summer. A cool bottom for pots to stand on is essential. Use a compost of leaf mould and rich fibrous loam when shifting into larger pots.

Carters' Primula Stellata (STAR PRIMULA). *See Photograph above.* This is a delightful and graceful plant, which makes a useful decorative plant on the conservatory stage in spring. Free flowering. Treatment for *Primula sinensis* will suit this species well.

										Per packet—s. d.

CARTERS'
IMPROVED DOUBLE SWEET
SCABIOUS.

SEE COLOURED
PHOTOGRAPH,
page 210.

This bright-flowering plant is usually treated as an annual in our gardens. During recent years it has been greatly improved both in habit and range of colours, and is fast becoming one of the most popular of border flowers. When given plenty of room and the seed-vessels are kept regularly picked off, it will last through the whole of the summer. Owing to its sweetness the bees are very fond of it, and its floral favours also attract all the most beautiful types of butterflies to the neighbourhood.

Sow the seed in heat in February and March in a pan or small box, and transplant the seedlings three inches apart in larger boxes; harden off as spring advances, and set out in the border towards end of May. They may also be sown where intended to grow.

Schizanthus.—Hardy annual.

Interesting and beautiful flowers, useful for pot culture. Sow the seed in spring, in pans, and prick out into boxes for planting out into beds and borders. The plants can be pinched back as required to keep compact. For conservatory decoration, sow in March and August, pot off seedlings, and grow on in cool frame or house, the plants to be brought to conservatory when coming into bloom in spring.

Carters' Large Flowered.

CARTERS' CHOICE HYBRIDS STREPTOCARPUS.

Streptocarpus.—Perennial. A novel race of free-blooming greenhouse pot plants, now in universal demand; bright, cheerful, lasting. The mixture we offer is a carefully fertilised strain, containing all the best colours, including a very large and rich blue. Sow in pans of rich soil in early spring, in heat, and pot off into small pots when large enough to handle. Keep the seed pans moist.

		Per packet—s. d.
No. 1224.	Carters' Choice Hybrids. Superb mixture, the latest type in all colours, as shown in the photograph above	1s. 6d. & 2 6
„ 1225.	Carters' Large-flowered Blue. - Very showy	1s. 6d. & 2 6

Stonecrop (SEDUM).—Hardy perennials. We may safely say that no rockery is complete without the Sedum. We offer, as under, seed best adapted to the general convenience.

No. 1226.	Blue. Annual trailer 6d. & 1 0
„ 1227.	Yellow. Familiar to every cottage wall; useful for garden edging 6d. & 1 0
„ 1228.	Mixed, Carters' Varieties. Perennial kinds for general garden and rockwork 6d. & 1 0

SUNFLOWER (HELIANTHUS).

Sow all varieties in spring, and only transplant if necessary.

237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

CARTERS' LARGE-FLOWERED SWEET PEAS.

Per packet—s. d.

- No. 1308. **Miss Willmott.**—Standard a rich orange-pink, wings a delicate rose; very pretty (see opposite, No. 1) ... 3d., 6d., & 1 0
- „ 1247. **Mrs. Geo. Higginson, Junr.** (see opposite, No. 2).—Very distinct; purest pale blue 3d., 6d., & 1 0
- „ 1473. **Helen Lewis** (*Orange Countess*). (See opposite, No. 3).—Large broad wavy orange standards and pink wings, and has that charming wavy standard peculiar to the *Countess Spencer* type, three to four flowers on a stem ... 3d., 6d., & 1 0
- „ 1264. **Helen Pierce** (see opposite, No. 4).—Colour, bright blue mottled on pure white. It bears three and frequently four blossoms on the stems, all of which face one way. The stems are unusually long and the blossoms of good size ... 3d., 6d., & 1 0
- „ 1256. **Dorothy Eckford** (see opposite, No. 5).—The finest white variety, with no tendency whatever to tinge or go pink; fine-formed flowers, with long stout stalks ... 3d., 6d., & 1 0
- „ 1283. **America** (see opposite, No. 6).—Rich red stripe; very effective ... 3d., 6d., & 1 0
- „ 1251. **King Edward** (see opposite, No. 7).—Bright crimson self; a true giant-flowered variety 3d., 6d., & 1 0
- „ 1474. **Queen Alexandra** (see opposite, No. 8).—Intense self scarlet ... 1 0
- „ 1298. **Hon. Mrs. E. Kenyon** (see opposite, No. 9).—Colour, deep primrose; the nearest approach to a yellow yet introduced ... 3d., 6d., & 1 0
- „ 1252. **Dainty** (see opposite, No. 10).—Charming white flower, with pink edge ... 3d., 6d., & 1 0
- „ 1285. **Black Knight** (see opposite, No. 11).—A deep marone self, clear and shining the standard bearing a bright metallic polish; free bloomer ... 3d., 6d., & 1 0
- „ 1337. **Henry Eckford** (see opposite, No. 12).—An intense shining orange self; absolutely distinct. First Class Certificate and Medal from the N. S. Pea Society ... 1 0
- „ 1294. **Duchess of Westminster.**—Apricot, flushed with rose-pink; on very long stems, sometimes being as much as 20 inches in length when well grown ... 3d., 6d., & 1 0
- „ 1479. **Enchantress.**—Standard and wings beautifully frilled, bright rose pink ... 1 0
- „ 1478. **E. J. Castle.**—Very rich carmine rose, a striking effect, especially in artificial light ... 1 0
- „ 1260. **Evelyn Byatt.**—The richest coloured Sweet Pea yet introduced. It may be termed a self gorgeous, having rich orange-salmon standards, with wings still a trifle deeper, giving a rich fiery orange or deep sunset colour to the whole flower ... 3d., 6d., & 1 0
- „ 1249. **Flora Norton.**—A very pure bright self blue; quite distinct ... 3d., 6d., & 1 0
- „ 1477. **Frank Dolby.**—Pale blue, same shade as *Lady Grisel Hamilton*, but much larger ... 1 0
- „ 1265. **Gladys Unwin.**—Has a very large flower not hooded, but with striking upright crinkled standard with broad wings; colour, pale rosy pink. About 75 per cent. of the long flower stems are with four blooms ... 3d., 6d., & 1 0
- „ 1303. **Lady Grisel Hamilton.**—Pale shining lavender; very fine ... 3d., 6d., & 1 0
- „ 1261. **Miss H. C. Philbrick.**—A lovely shade of deep mauve, with a sheen of pale blue. The well-shaped flowers are borne on long stems well above the foliage, bearing a large percentage of threes and fours gracefully disposed ... 3d., 6d., & 1 0
- „ 1310. **Mrs. Fitzgerald.**—Delicate cream, flushed with rose; a good bold flower, generally three flowers on a stem ... 3d., 6d., & 1 0
- „ 1476. **Mrs. Alfred Watkins.**—Wavy standards, colour much like the *Old Princess Beatrice*, pale pink ... 1 0
- „ 1475. **Nora Unwin.**—Same bold wavy standard as *Gladys Unwin*, a pure white ... 1 0
- „ 1262. **Othello.**—Dark maroon, the standard hoods slightly; the wings are wide, with keel of a lighter shade ... 3d., 6d., & 1 0
- „ 1339. **Scarlet Gem.**—A most dazzling scarlet. It is strong in growth and free flowering 3d., 6d., & 1 0
- „ 1338. **Sybil Eckford.**—Quite distinct, the standards being delicate pink on lemon ground; wings a delicate lemon ... 3d., 6d., & 1 0
- „ 1263. **Unique.**—A perfectly distinct variety in the striped or flake section. The fine flowers are a pale blue flake on a white ground. Highly recommended by the N.S.P.S. ... 3d., 6d., & 1 0
- „ 1259. **THE ABOVE VARIETIES IN MIXTURE**, price per packet, 3d., 6d., 1s., 2s. 6d.; per half-pint, 5s. 6d.

CARTERS' DWARF OR MINIATURE SWEET PEAS.

These dwarf varieties are exceedingly valuable when employed as edgings to beds and borders. They also make very effective pot plants, sown in autumn for spring blooming.

We have grown and are now able to offer Dwarf Sweet Peas in the following range of colours.

Height about 6 inches.

Per packet—s. d.				Per packet—s. d.			
No. 1323.	White.	Pure	... 3d., 6d., & 1 o	No. 1328.	Captain of the Blues.	Violet	...

" 1336.	Carters' Superb Mixture, all colours , price 3d., 6d., 1s., and 2s. 6d. per packet ; 5s. 6d. per half-pint ; 10s. per pint.						
" 1343.	Old Fashioned Tall Sweet Peas , mixed, fine quality, 3s. per lb.; 3d. per packet.						

Cultivation.—It is preferable to sow seed in prepared trenches in spring, but they may also be sown in rows or clumps in flower borders. Protect the young plants from cold and cutting winds, and stick them as soon as they need it. Where a quantity of cut flower is needed, it is advisable to make more than one sowing. To obtain flowers in May they should be sown in autumn in pots, kept under protection, but cool, through the winter and transplanted out in March. If the dead flowers and seed pods are picked off, they will continue blooming all through the summer and autumn.

"Our Sweet Peas especially were the cynosure of the vicinity for miles round the place."—C. MOORE, Esq., Gerrards Cross, *January 19th, 1907.*

"Mr. BENNETT is pleased to say that he took two prizes at the local show last July for Sweet Peas from seed supplied by you. The blooms were excellent."—Tunbridge Wells, *January 9th, 1907.*

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

SWEET WILLIAM, CARTERS' HOLBORN GLORY.

Per packet—s. d.

Sweet William (DIANTHUS BARBATUS).—Perennial. Beyond a good soil this gorgeous plant requires but little attention. Our *Holborn Glory* strain is magnificent, the single blooms being larger than a penny piece. Sow in summer, and transplant when large enough in autumn for blooming the next spring and summer. 1 to 2 feet.

CARTERS' LARGE-FLOWERED WALLFLOWER.

For full description, see opposite page.

"Mrs. BRASS would just like Messrs. Carter to know what splendid results she has had from a 1s. 6d. packet of their Wallflower Seed. She has ten dozen magnificent plants, which are the admiration of everyone around here."—Barnstaple, *May 3rd*, 1907.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

WALLFLOWERS.

(See Photograph opposite.)

The Wallflower is a very old friend in English gardens, but is not grown to the extent it deserves. Now that so many improved forms and bright colours are available, it should be found a place where any collections of spring-flowering plants are brought together. For quite two months, April and May, it adds its best charms, and makes beds and borders quite cheery by its presence and fragrance. The spindly straggling plants too commonly met with are only a mere apology for the effects well-cultivated examples, such as the following highly selected strains, are capable of achieving. The double varieties, although very pretty when well grown, do not always come up to the high standard anticipated, and only occasionally give that real solid satisfaction that can be relied upon with the singles. For real usefulness we recommend the following selections of uniform height and habit, broad petalled, and decisive colours. They flower early, last well, and are off the ground in convenient time for summer bedding. The seeds may be sown from April to August in a partially shaded but airy place. If on poor firm soil it will produce plants of stubby growth and hardy nature, whilst those sown later on in rich ground are often killed in winter. All may be transplanted to blooming quarters from August to November, according to circumstances.

SINGLE VARIETIES.

Carters' Dwarf Sweet-scented Large-flowered Wallflowers.

For beds and borders. 9 to 12 inches. Plants to stand 1 foot apart. Excellent in a bed to themselves or as a front to the taller varieties.

A CURIOUS PLANT FROM CENTRAL ASIA.

MONARCH OF THE EAST.

(As originally named and offered by us.)

This remarkable plant, as shown in the illustration, exhibits one of those extraordinary traits in nature that few are able to understand, for the magnificent flowers, as depicted, actually come out of the dry bulb without being placed in soil and water.

The flower sheath sometimes reaches a length of nearly two feet, is of a red-brown colour, tipped with red and yellow, whilst the inner parts of the flower are equally as brilliant. The bulb of this extraordinary plant needs only to be placed in some fancy receptacle, *without water*, in a warm room, or on the mantelshelf, when, without showing either leaves or roots, the flower makes its appearance, early in the year, thriving entirely upon the nourishment contained within the bulb.

Directly after the flower fades and a growth appears to be coming from the bulb, it should be potted in a large pot in good soil and freely watered. Later on an umbrella-shaped leaf will be formed on a stout stalk spotted with a granite-like colour, and sometimes reaching a height of three feet. In autumn this leaf fades, when water should be lessened, and as soon as it has died off, the bulb is lifted out of the soil, cleaned up, and placed in a dry condition in a warm room, when the previous year's display may be repeated.

We have imported a limited quantity of large bulbs, price 9d. each, carriage free.

Although these plants will produce their flower in any warm, dry place without support, we offer Special Oriental Bowls for holding one Bulb. Price, 9d. and 1s. each.

CARTERS' LILIUM LANCIFOLIUM RUBRUM.

Rich crimson spots, 7s. 6d. per doz. ; 9d. each.

Next to the *Lilium Auratum* we must place the *Lancifolium* or *Speciosum*, so exquisite in form and so easily cultivated. Specimens may frequently be seen flowering abundantly from pots in the squares and on balconies in the very centre of London and other large cities late in summer ; and coming at a time of year when flowers are somewhat scarce makes it doubly welcome. It thrives well out in the border, and, with its pure chaste white, crimson-spotted, rose-spotted flowers, is very attractive.

CARTERS' IMPROVED BUTTERFLY GLADIOLUS.

IMPORTANT.

Carters' Butterfly Gladiolus received the Highest Award at the Irish International Exhibition, 1907.

By carefully selecting those varieties planted specially for hybridization, we claim to now offer absolutely the largest flowered and the grandest mixture of Gladiolus that has ever been produced.

MUCH REDUCED
IN SIZE.

Photographed and Copyrighted by James Carter & Co.
Specimen spike of Carters' Improved Butterfly
Gladiolus, showing type of flower.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

Carters' Improved Butterfly Gladiolus now contains beautiful shades of Carmine, Rose, Scarlet, Blue, and many others of the more delicate colours.

We strongly recommend this choice mixture to our customers, as we feel sure when once grown they will discard all other mixtures and give this the place of honour in their garden.

Strong flowering bulbs.
2s. per doz. ; 15s. per 100.

GLADIOLUS "AMERICA."

Autumn Flowering.

A beautiful soft flesh pink, very light and much like *Enchantress* Carnation, except slightly tinged with lavender, which gives it the delicate colouring of the most beautiful *Laelias*. Words fail to do justice in describing this grand and glorious colour ; it must be seen to be appreciated.

Price 1s. each ; 10s. 6d. per doz.

CARTERS' NEW GLADIOLUS "BLUE KING."

We offer for the first time this superb Gladiolus. Colour deep blue or indigo ; flowers as large as the *Gandayensis* section ; flowering at latter part of July. Height 3 to 4 ft., and often producing 24 flowers on each spike.

Price 5d. each ; 8s. 6d. per doz.

GLADIOLUS SCARLET BRENCHLEYENSIS.

Large handsome spikes of brilliant scarlet.

Extra Large Bulbs.

85s. per 1,000 ; 10s. per 100 ; 1s. 6d. per doz.

Good Flowering Bulbs.

55s. per 1,000 ; 6s. 6d. per 100 ; 1s. per doz.

GLADIOLUS "HOLLANDI."

The Pink Brenchleyensis.

This is a sport from the popular scarlet variety. Colour a most delicate pink, inclined to pale primrose. Summer flowering.

Price 20s. per 100 ; 3s. per doz.

Colours striking and diversified, filling up the gap between the summer and autumn sections.

Price, per 100, 6s. 6d. ; per doz., 1s.

LILY OF THE VALLEY.

By availing ourselves of the modern method of cold storage we are enabled to supply forcing roots of this pretty decorative plant through the winter months. One advantage these retarded roots have over those handled in the ordinary way is the quick time in which the flowers are produced. We have seen dormant crowns put into strong heat and brought into beautiful bloom within three weeks, but we recommend six weeks as the average time for a perfect flower spike.

Carters' Selected Crowns, for forcing.—In bundles of 25, per 1,000, 80s. ; per 100, 8s. 6d. ; per 25, 2s. 3d.

Imported Clumps.—Very fine, per doz., 12s. 6d. ; each, 1s. 3d.

RETARDED LILY OF THE VALLEY.

We have made arrangements by which a continuous supply during winter may be assured.

Giant Flowering Retarded Crowns FOR ALL SEASONS.—Per 100, 10s. 6d. ; per bundle of 25, 3s.

Carters 237 & 238, & 97, HIGH HOLBORN, LONDON.—1908.

DOUBLE SWEET-SCENTED TUBEROSES.

BEAUTIFUL PURE WHITE FLOWERS.

Photographed and Copyrighted by James Carter & Co.—REDUCED IN SIZE.

**Flowering Spike of Double
Sweet-Scented Tuberose**

**Section of House showing a quantity of Double
Sweet-Scented Tuberose in Growth.**

The Sweet-scented Double White Tuberose (*POLIANTHES TUBEROSA*) has become exceedingly popular. It possesses both a character and a perfume distinct from any other flower, and can be induced to bloom at various seasons. At one time they were only obtainable from the South of Europe; now they are specially cultivated in different parts of the world, and can easily be forced into bloom for the Easter festivals. Those who do not cultivate these flowers for winter decoration can procure the bulbs in the spring, when they will come into flower during the summer. The double-flowered Tuberose may be had in succession by potting the tubers and standing them in a cold frame, covering them 4 in. deep with cocoanut fibre refuse; but they will start much more quickly and with greater certainty in a gentle bottom heat. Loam and well-decayed manure, in about equal parts, with a little coarse sand, is the most suitable compost in which to grow them. The pots may be taken out of the frame as soon as the flower stems appear above the leaves; they are then staked and removed to the greenhouse, and placed near the glass.

Carters' Extra Large Bulbs, 17s. 6d. per 100; 2s. 9d. per doz.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

ANEMONES.

CARTERS' "EMPRESS" POPPY ANEMONES.

An easily grown type that should be found in every garden. They are in full bloom during June; in some seasons earlier.

SUITABLE FOR VASE DECORATION, LASTING FOR A LONG PERIOD WHEN CUT.

Price of Dry Roots, 75s. per 1,000; 8s. 6d. per 100; 1s. 3d. per dozen.

CARTERS' "ST. BRIGID" ANEMONE.

THE TRUE IRISH STRAIN

This beautiful strain, raised originally in Ireland and first brought into prominence by our House, deserves more than passing notice. The flowers are semi-double, most varied and beautifully coloured, and if cut before fully out, are most useful for decorative purposes.

Strong Bulbs, price 10s. 6d. per 100; 1s. 6d. per dozen.

CARTERS' ANEMONE, "KING OF THE SCARLETS."

Intense brilliant scarlet, very double. A fitting companion to our well-known Single *Empress* Anemone. The flowers are of great size, intensely double, and remarkably brilliant in colour.

Price 10s. 6d. per 100; 1s. 6d. per dozen.

CARTERS' ANEMONE FULGENS.

We offer the true early single form, fine English-grown roots, of the well-known Scarlet Pau Anemone. A very brilliant scarlet crimson flower, rising from 6 to 9 inches above the rich green palmate foliage; splendid for clumps, in border, in a bed by itself, vase decoration, and also for naturalization in sunny hedgerows or among the grass.

Price, 10s. 6d. per 100; 1s. 6d. per dozen.

CLEMATIS.

Strong Plants in Pots, 1s. 6d., 2s., and 2s. 6d. 18s. and 24s. per doz.

EXPLANATIONS.—*Sections or Type:* Jackmanni, J; Lanuginosa, L; Florida, F; Montana, M; Patens, P; Viticella, V; Coccinea, C.

The Clematis is grouped into several sections, according to the peculiar characteristics in habit of growth, time of flowering, and kinds of flowers. The Jackmanni class have large flowers in profuse masses from July to October on the new wood. Florida class, double-flowered summer bloomers on the old wood. Lanuginosa class, large flowers produced successively on short summer lateral shoots from June to October. Montana class, medium-sized flowers in clusters, on the old wood in the spring. Viticella class, large flowers freely produced on the new wood from July to October. Patens class, large flowers produced on the old wood from May to June. Flammula class, small flowers borne profusely on the new wood in summer.

237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

PLANTS FOR HEDGES.

- PRIVET GOLDEN, $1\frac{1}{2}$ to 2 ft., 50s. per 100; 2 to $2\frac{1}{2}$ ft., 70s. per 100; 3 to $3\frac{1}{2}$ ft., 85s. per 100.
 ,, OVALIFOLIUM, $1\frac{1}{2}$ to 2 ft., 12s. 6d. per 100; 2 to 3 ft., 18s. per 100; 3 to 4 ft., 30s. per 100.
 SWEET BRIARS, very fine, 6s. and 9s. per doz.
 QUICKS, 2 years transplanted, per 1,000, 35s.
 ,, 3 and 4 years extra transplanted, per 1,000, 50s. and 60s.

STRAWBERRY PLANTS.

We grow a large quantity of this popular fruit, and our season's plants are very fine this year. If fruit is desired next summer, it is best to plant out as early as possible, so that they may become established before winter.

From open ground 1s. per doz.; 5s. 6d. per 100.

In pots 3s. ,, 18s. ,,

BICTON PINE, large white fruit.

BRITISH QUEEN, fine large variety.

COMPETITOR, early, very large fruit.

Dr. HOGG, large fruit, one of the best.

KEEN'S SEEDLING, early, good for forcing.

KING OF THE EARLIES, very early, medium size.

LATEST OF ALL, very late, good flavour.

LEADER, large, mid season, good cropper.

MONARCH, second early, good flavour.

NOBLE, early, large fruit, and very free.

PRESIDENT, second early, grand cropper, and useful for forcing.

ROYAL SOVEREIGN, early, good cropper.

SCARLET QUEEN, large fruit and good cropper.

SENSATION, late, good flavour.

SIR C. NAPIER, late, large fruit, good for pot-culture.

SIR J. PAXTON, early, strong grower, and prolific.

PERFECTION, medium-size fruit, very prolific.

VICOMTESSE H. DE THURY, early, good for forcing.

WATERLOO, late, large fruit.

CARTERS' SELECT LIST OF GRAPE VINES.

FRUITING CANES, 1cs. 6d. and 12s. 6d. each, in pots.

PLANTING CANES, 5s. and 7s. 6d. each, in pots.

A few extra strong Fruiting Canes of some of the varieties, so long as unsold, 15s. each.

ALNWICK SEEDLING, black, large oval.

BARBAROSSA, black, large round and sweet, late.

*BLACK HAMBURG, roundish oval, large, very sweet.

BLACK ALCANTE, round, very large, late keeping

*BUCKLAND SWEETWATER, pale amber, large round.

*DUKE OF BUCCLEUGH, amber, very large.

*FOSTER'S SEEDLING, pale amber, roundish oval.

GOLDEN QUEEN, white, large and sweet

GROS COLMAN, dark purple, large and sweet, very late.

GROS MAROC, black, good flavour.

And other good varieties can be supplied.

LADY DOWNES' SEEDLING, large black oval, very sweet.

*MADRESFIELD COURT, black Muscat, very large.

MRS. PEARSON, golden roundish oval.

MUSCAT CANON HALL, roundish oval, very large.

MUSCAT HAMBURG, black, good flavour.

MUSCAT OF ALEXANDRIA, pale amber, large oval.

*ROYAL MUSCADINE, pale amber, round, large and sweet.

TREBBIANO, greenish white, sweet and good, late.

* Can be managed in cool greenhouse.

The rest require a heated greenhouse or vinery.

The Muscats should be grown in a house by themselves.

Those marked † are Climbers.

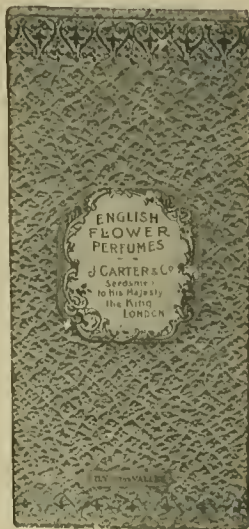

JAPANESE DWARF TREES.

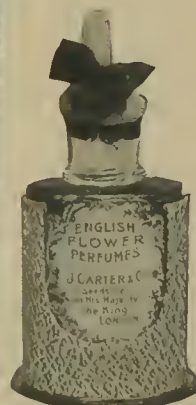

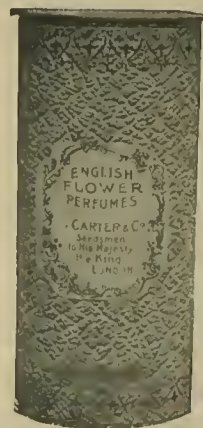

Our collection also contains historic and ancient specimens of dwarf oaks, thujas, larix, cherry, &c., ranging in price from 21s., and we are always pleased to have examples brought up for inspection at our various London Establishments.

*Our Collections have been awarded Silver Cups and Medals of the
Royal Horticultural Society.*

THE SWEET FRAGRANCE OF OLD-FASHIONED ENGLISH FLOWERS.

Appearance of 5s. 9d. bottle and case.

Appearance of 2s. 10d. bottle and case.

REDUCED IN SIZE.

Our Natural Flower Scents are the concentrated essences of living flowers extracted with such skill and care that the perfumes contain unimpaired the delicate and odoriferous constituents of the petals. They do not become stale or stain the fabric.

We have recently added the delicious perfume of the Night Scented Stock, and we are quite sure that the unique and fragrant sweetness of the flower and the novelty and truth to nature and durability of the essence will speedily ensure for it the position of a first favourite.

The little flower (*Mathiola bicornis*) which yields this exquisite perfume is cultivated almost exclusively for its lovely aroma. During the day the flower is an almost inconspicuous object, but as night approaches it unfolds its petals and fills the evening air with a subtle fragrance.

CLOVE CARNATION.	LILAC.	NIGHT SCENTED STOCK.	WHITE CLOVER.

HYACINTH.	NARCISSUS.	WALLFLOWER.	

"Messrs. CARTER.—Please send me a bottle of your 'Night Scented Stock.' It is exactly like the flower, and I can imagine myself in my summer moonlight garden on the coldest winter day if I have some of the scent on my handkerchief. Yours faithfully, MARY CORNWALLIS WEST, Newlands Manor, Lymington, Hants.

"P.S.—Please send also a bottle to my daughter, the Duchess of Westminster, Eaton, Chester."

A Lady writes:—"The Night Scented Stock is the most delicious and lasting I have ever used, and I have been devotedly fond of fine delicate odours during a long life."

All the above are supplied in bottles, and, with the exception of the small size, are packed in decorated card board boxes, suitable for presents.

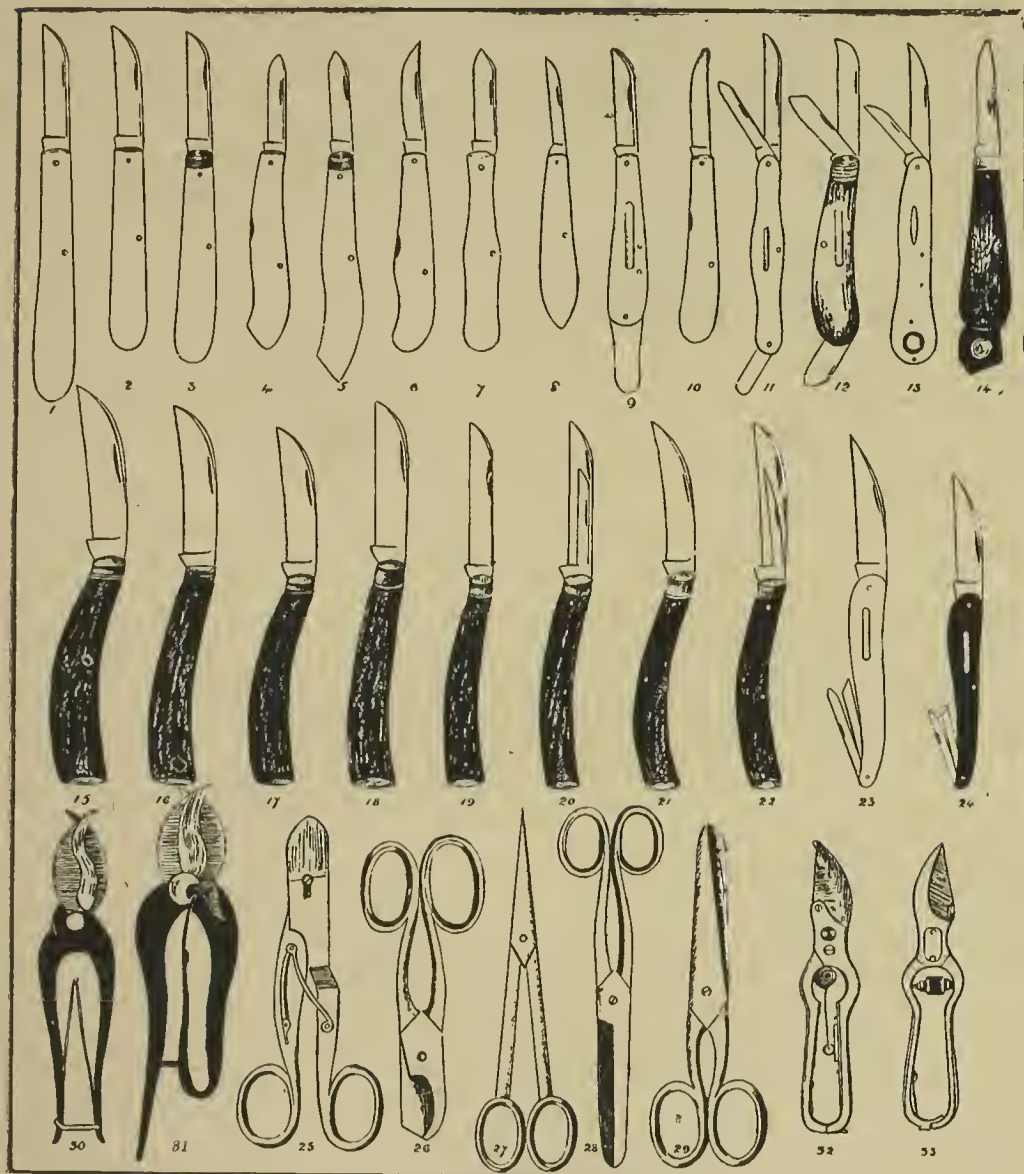

Price 1s. 10d., 2s. 10d., 5s. 9d., 10s. 10d., 15s. 6d. each, packing and carriage free.

Bends for any of these Syringes, 1s. 6d. each.

The attachments to this Syringe are most serviceable for Amateurs who only have a few trees or bushes that require spraying.

(When ordered alone, the Postage on Abol Syringes and Combination Hose Nozzle is 4d. each extra.)

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

USEFUL AND ORNAMENTAL GARDEN VASES.

Constructed on practical lines, enabling trees planted therein to flourish instead of ebbing out a miserable existence in the usual pseudo-artistic garden pottery.

Garden Vases, being placed in prominent situations to be effective, are exposed to all sorts of weather, it is therefore essential they should be designed to contain sufficient soil to withstand scorching sun and drying winds without constant watering.

No. 1 Vase.

Elegant evergreen ornamental shrubs can be supplied and planted, from 5s. to 15s. each.

No. 2 Vase and Pedestal.

No. 2 Vase.

When planted with flowering trees and shrubs these are highly decorative.

No. 1. Garden Vase, with ornamental handles, buff or red terra-cotta, 19 inches diameter across top, 28 inches including handles, 16 inches high. **One Guinea.**

This is a noble looking vase, and remarkably low in price.

„ **2. Garden Vase**, buff or red terra-cotta, 22 inches in diameter, 13½ inches high. **18s. 6d.**

„ **3. Garden Vase**, buff or red terra-cotta, 19 inches in diameter, 11 inches high. **14s. 6d.**

No. 2 Vase with Pedestal (*as Illustration*). (For description of Vase, see above.) Pedestal, 2 feet 6 inches high; combined height of pedestal and vase, 3 feet 7½ inches. **The two complete, £3 3s.**

Many other patterns are in stock.

We invite your inspection.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1508.

POTS FOR SHRUBS.

Elegant and rational designs constructed to give trees a sufficiency of root space. Being of noble appearance, and when planted with a fine specimen tree they give a dignity to the house when placed on the entrance walk, drive, or terrace.

We shall be pleased to supply Pyramids and Standard Bays, 10s. 6d. to 30s. each.
Lawson's Cypress, in variety, 5s. to 15s. each. Golden Yews, 10s. 6d. to 42s. each.
Japanese Cypress, 7s. 6d. to 21s. each.

Hexagonal Pot, in buff terra-cotta.
17½ inches diameter, 16 inches high,
17/6 each.

In green glazed ware, 25/- each.

Circular Pot, in buff terra-cotta.
13 inches in diameter, 12 inches high,
8/6 each.

In glazed colour ware, 10/6 each.

We invite your inspection, having many other patterns of which we cannot issue a Price List owing to changing them from time to time.

Carters 237, 238, & 97, HIGH HOLBORN, LONDON.—1908.

SUNDIALS.

267

A Sundial on a handsome Pedestal would form a useful and ornamental addition to the Flower Gardens and Lawn. Probably nothing gives such an old-world appearance to a garden as a Sundial.

BEST HORIZONTAL DIAL. PLAIN.

No. 4.

Brass Plain Horizontal Sundial,		£	s.	d.

CASH PRIZES FOR 1908.

JAMES CARTER & Co., Seedsmen to His Majesty the King, 237, 238, & 97, High Holborn, London, undertake, upon being furnished with certified evidence, to duplicate First, Second, or Third Money Awards made to the exhibitors who show the products of Seeds and Potatoes from purchases made by the exhibitor from this Catalogue above 10s. in value, and obtained direct from Messrs. Carters' establishment during the twelve months ending June 30th, 1908. The said duplication will be limited to the value of the purchase, but exhibits of exceptional merit will be treated with liberality at the option of Messrs. Carter.

The products to be of the exhibitor's own growth, and in case of any dispute as to purchase, &c., an invoice of the seeds purchased must be produced if required, and the specimens are to be staged in accordance with the regulations of the Society. This offer does not apply to special prizes offered by Firms and other Patrons.

EXAMPLE.—If 10s. or 20s. are offered by the Society as Prizes for, say, the best dish of Peas, James Carter & Co. will award an equal amount if their customer gains one or other of them, providing his purchase extends to 10s. or 20s., and that he has carried out the above conditions.

Customers intending to claim the advantages of these Special Prizes must notify the fact to us a week before the day of the Show, stating the names of the Vegetables, Potatoes, or Flowers they intend to stage, when we will send neatly named cards, *which must be exposed to view on the exhibits during the whole time of the Show, or if not we may withhold the prizes.* We shall also send the applicant a sheet on which to record his prizes to save the Secretary unnecessary work.

IMPORTANT.—If this announcement does not appear in the Prize Schedule of the Horticultural Show in the intending Competitor's district, the offer must be considered cancelled. We are always pleased to hear from our Customers of their intention to compete, and in the event of their winning open prizes, we may decide to give them an honorarium for the trouble.

These Prizes are open to Messrs. Carters' Customers, but not available to Market Growers, Seedsmen, Nurserymen, or Horticultural Traders.

PRIZES IN OPEN COMPETITIONS.

Since our Customers commenced sending records of their Prize-winnings, gained in open competition with the produce of our Vegetable and Flower Seeds at Horticultural Exhibitions in various parts of the Country, we are enabled to compile an extraordinary list of successes. Space will not permit extended reports, but we give below sufficient particulars to convince the most exacting cultivator that CARTERS' TESTED SEEDS maintain their reputation all over the United Kingdom.

16,609 Prizes reported by Customers.

Southern Counties	4,886 Prizes in Open Competition against all Comers.
Eastern Counties	1,630 Prizes in Open Competition against all Comers.
Western Counties	3,118 Prizes in Open Competition against all Comers.
Midland Counties	4,184 Prizes in Open Competition against all Comers.
Northern Counties	1,276 Prizes in Open Competition against all Comers.
Wales, Ireland, Scotland, &c.	1,515 Prizes in Open Competition against all Comers.

TERMS OF BUSINESS.

FREE CARRIAGE OF GOODS.

(Except in cases where the cost of Carriage on the parcel, through being unusually bulky in proportion to value, absorbs the profit on the transaction, when we reserve to ourselves the right to send unpaid.)

We deliver SEEDS, POTATOES, PLANTS, and BULBS, CARRIAGE PAID to any RAILWAY STATION IN ENGLAND and WALES, IRELAND, and SCOTLAND, where practicable, also FREE by PARCEL POST to Purchaser's door where possible.

We occasionally hear of charges being made by the Railway Companies, notwithstanding that our address label bears the imprint in RED letters "Carriage Paid." In cases where a Charge for the Railway Carriage is made, notwithstanding that the Package is labelled "Carriage Paid," Purchasers should on no account pay the demand, but refer the Carriers to us. Charges for delivery from Stations (if any) must be borne by the Consignee.

Glass and other Goods liable to breakage are sent out securely packed, but beyond that we cannot be responsible for damage in transit. Notice of damage should be at once made to, and compensation claimed from, the Carriers.

CONDITIONS OF GUARANTEE OF QUALITY.

We guarantee our Seeds according to the quality purchased to be of the highest average standard of vitality of the season, and it is open to the purchaser to confirm this by submitting the samples to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds sold under this guarantee, or for errors of description; and it must therefore be clearly understood that our responsibility ceases upon the final acceptance of the Goods.

ORDERS.

ALL ORDERS SHOULD BE WRITTEN SEPARATELY FROM GENERAL LETTERS OR LETTERS OF INQUIRY.

Please write your name and address in full, also nearest Railway Station or Shipping Port to which the Goods are to be forwarded.

All letters are opened under the direction of one of our principals, and the orders are given out for execution under personal supervision. Plant orders are sometimes delayed by severe or hot weather, and they at all times take longer to execute than Bulb or Seed orders, in consequence of the time required in lifting and packing, especially in the autumn after the long accumulation of orders.

NEW CUSTOMERS.

We beg respectfully to state that on opening an account it is necessary for us to receive Cash with the order, or a reference to a Banker or some one known to our House.

CASH DISCOUNT.

We allow 5 per cent. discount off the total amount of invoice on all goods paid for with order, or within fourteen days from the date of invoice (but at no later period), UNLESS OTHER TERMS ARE SPECIFIED OR ARRANGED.

TERM OF CREDIT.

OUR FULLEST TERM OF CREDIT IS THREE MONTHS FROM DATE OF INVOICE, AND WITHOUT DISCOUNT, and our books are made up quarterly—i.e., March 1st, June 1st, September 1st, and December 1st. Five per cent. interest will be charged upon overdue accounts.

REMITTANCES.

Postal Orders, Post Office Orders, or Cheques on any Bank are acceptable, and should be drawn in favour of JAMES CARTER & CO., and crossed "London and Westminster Bank."

EMPTY PACKAGES, HAMPERs, BOXES, SACKS, BAGS, &c.

Are charged at cost price, and full price will be allowed on them when returned immediately, carriage paid and in good condition. These should be in every case marked—"Empties from —"; a letter by post informing us of their despatch is also necessary. Booking charges must be prepaid, and a receipt should be taken, so that the value may be recovered if they are lost or mis-sent. Coin, other valuables, or important communications should on no account be enclosed with returned empties. On receipt of a post-card we will send labels

ATTENTION TO CUSTOMERS.

It is our earnest desire that all the requirements and directions of Customers be scrupulously attended to by our assistants, AND WE PRACTISE THE UTMOST PERSONAL SUPERVISION TO SEE THAT THEY ARE CARRIED OUT. We would, therefore, respectfully request that we be informed if at any time there is cause for dissatisfaction, that we may have it rectified at the earliest possible moment.

CHANGE OF ADDRESS.

Please notify to us any change of Permanent Address, in order that we may be able to forward our Catalogues with regularity. The favour of your kind recommendation of our House to those of your friends requiring Seeds for the Garden or Farm, or Plants and Flower Roots for the Garden or Conservatory, is respectfully solicited. We shall be pleased, at all times, to forward our Catalogues to any address we may be favoured with.
